HB2609

Good morning,
I am writing in support of the Supported Decision Making agreement bill. My name is Jason Crippen and I am a transition coordinator for the Goddard Special Education Cooperative. I am constantly helping parents and students come up with their goals/ plans for the future and guardianship vs. supported decision making is a large piece of that puzzle. Please push this bill forward as it keeps rights with individuals but also gives them the help they need to make more informed decisions. As with everyone else, we don't want our rights stripped from us, so it should be no different with those with intellectual disabilities.

Thank you for your time

Jason Crippen
