RE: SB124
To Whom it May Concern:
As a landowner in Geary County, KS, I take a strong stand that no land should be taken
by any city in the state of Kansas without the written consent of the landowner.
Cities need to fund their city services through other means than the ‘taking’ of land for
their own personal economic agenda.
I hope that as a representative of the people of Kansas in your district that you will
take a strong stand to protect property rights for landowners in Kansas who have
worked hard to acquire and maintain land resources and personal property.
