

Approved: Carl Dean Holmes
Date 2-14-94

MINUTES OF THE HOUSE COMMITTEE ON ENERGY AND NATURAL RESOURCES.

The meeting was called to order by Chairperson Carl Holmes at 3:30 p.m. on February 1, 1994 in Room 526-S of the Capitol.

All members were present except: Representative Steve Lloyd - Excused
Representative Betty Jo Charlton - Excused
Representative Walker Hendrix - Excused

Committee staff present: Raney Gilliland, Legislative Research Department
Dennis Hodgins, Legislative Research Department
Mary Torrence, Revisor of Statutes
Shirley Wilds, Committee Secretary

Conferees appearing before the committee: Karl Mueldener, Director, Bureau of Water, KDHE
Doug Henkle, KS Groundwater Association
Charles Jones, KS Department of Health & Environment
Janet Stubbs, KS Home Builders

Others attending: See attached list

Chairperson Holmes called the meeting to order, referring Committee members to various written materials before them:

- A letter from the City of Hays regarding **HR 5030** (hearing was heard on previous day) (See Attachment #1)
- A report from the Kansas Corporation Commission (See Attachment #2)
- Copy of Congressman Robert's Safe Drinking Water Act Bill, HR 3686 (See Attachment #3)
- Copy of Congressmen Slattery's HR 3392 (See Attachment #4)
- Copy of report from KDHE with comparisons of the above bills. (See Attachment #5)

Representative McClure informed the Committee that she has arranged to have HR 1701 faxed to her. She said since the bill is quite lengthy she will have it available to any members interested in receiving a copy.

Chairperson Holmes reminded the Committee that Thursday of this week they will be working several bills. He asked members to meet with staff if they have amendments for any of the bills that have been heard and have a balloon draft ready at that time.

Hearing on HB 2666:

Karl Mueldener: (See Attachment #6) Mr. Mueldener reported to the Committee that KDHE is requesting this legislation to clarify the intent of KSA 82a-1203 and 82a-1205. He said presently the statute authorizes the Department to adopt regulations for continuing education for licensed water well contractors. The theory of the original legislation was, the more knowledgeable the well driller the better the wells are constructed, thereby providing better protection for public health and the environment. In addition, the original legislation simply required the water well contractor to pursue continuing education rather than the actual on-site drilling supervisor.

Mr. Mueldener said KDHE's proposed legislation required continuing education of the water well contractors and their designated drillers. However, the Attorney General would not approve those regulations due to lack of authorizing legislation regarding designated drillers.

Doug Henkle. (See Attachment #7) Mr. Henkle stated he is a proponent of **HB 2666**. He is a water well contractor and pump installer, and a member of the Legislative Committee of the Kansas Ground Water Association, adding the leadership and general membership of this Association support his views.

He said the Kansas Groundwater Exploration and Protection Act provides for the licensing of water well contractors and states that "in granting of such licenses due regard shall be given to the interest of the state of Kansas in the protection of its underground water resources." His Association supported the 1991 amendment to this Act, wherein it was required that licensed water well

CONTINUATION SHEET

MINUTES OF THE HOUSE COMMITTEE ON ENERGY AND NATURAL RESOURCES, Room 526-S Statehouse, at 3:30 p.m. on February 1, 1994.

contractors have continuing education; testimony in support of this amendment was presented by his Association at that time.

Mr. Henkle concluded by reporting his Association feels that passage of **HB 2666** would correct an oversight in the original implementation of continuing education requirements.

Hearing on HB 2667:

Charles Jones. (See Attachment #8) Speaking in support of **HB 2667**, Mr. Jones recommended two clarifying revisions to the bill as proposed:

- 1) Page 2, line 7, own facilities “, provided that such abatement projects do not cause, or have the potential to cause, a lead-based paint hazard to persons not directly associated with the abatement project.”
- 2) Page 7, line 27, ~~asbestos~~ abatement project if the business entity “,non-profit organization”
- 3) Page 7, line 32, (c) If a business entity “,non-profit organization,” or state or political or taxing subdivision

Mr. Jones stated the purpose of the bill is to provide KDHE the necessary authority to develop a program that will comply with the lead abatement certification requirements associated with federal Title X Residential Lead-Based Paint Hazard Reduction Act of 1992. He said children are particularly vulnerable to lead poisoning, citing a myriad of negative health repercussions.

The following are some of the major provisions in this proposed legislation, according to Mr. Jones:

1. Established a dedicated lead-based paint hazard fee fund that will allow those fees collected from lead-based paint hazard activities to be utilized to fund the lead program.
2. Provides administrative authority for developing and implementing regulations to license and certify individuals searching for potential hazards, and to review and approve training courses for them.
3. Clarifies authority for KDHE to enter and inspect abatement projects and, when violations are found, to require appropriate action.

It was reported that the first year funding for the lead certification program will be provided through a combination of direct and indirect federal EPA grant funds. The grant monies are scheduled to be awarded by September 30 1994 (application deadline May 1, 1994). Each state that submits a qualifying application will be allocated \$100,000 from the EPA regional office; the EPA funds will be allocated competitively to states, according to a formula designed to reflect each state's relative “lead burden,” (the number of housing units with lead-based paint; number of children under age of seven; the fraction of young children in poverty; and the fraction of low-income housing units with lead-based paint. Mr. Jones reports EPA has calculated that Kansas may be eligible for an additional grant of \$50,000 to \$90,000.

Janet Stubbs. (See Attachment #9) Ms. Stubbs spoke of concerns the Kansas Building Industry has with the very broad authority this legislation is giving to the staff of the Secretary of Health and Environment. She said for the Legislature to approve such a measure would give the Department of Health and Environment the authority to promulgate rules and regulations which go far beyond that which is required by Federal regulators and increase the cost of remodeling significantly. Additionally, she maintains intact lead paint has not been shown to be an immediate hazard to children and the removal of same should be a low priority due to limited resources and the fact that it poses little risk.

She stated within the older inner city properties, abatement often will exceed the equity, thereby leading to an ultimate owner-abandonment of property. A question also arises as to who will pay for the abatement.

When urging the Committee not to permit requirements for the removal of intact lead paint, she emphasized the focus should be on in-place management, repair of defective paint, removal of dust, and maintenance of ground cover in high traffic urban areas where children play.

Ms. Stubbs requested permission to supply the Committee with additional information pending from her National office, considering it to be pertinent to this issue.

Representative Powers moved to approve the Committee Minutes for January 24, 25, 26, and 27. Representative Webb seconded the motion. Motion carried.

Upon completion of its business, the meeting adjourned at 4:55 p.m.

The next meeting is scheduled for February 2, 1994.

Date: February 6, 1994

The Honorable Carl Holmes, Chairman
House Energy and Natural Resources Committee
Room 115-S, State Capital Building
Topeka, KS 66612

RE: HCR 5030

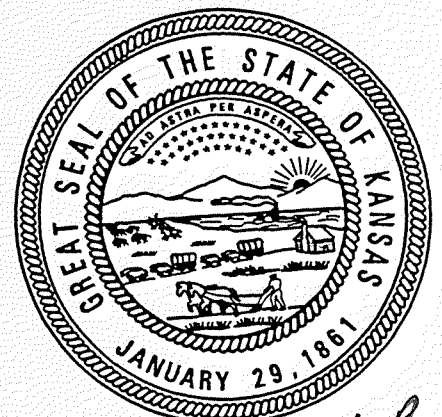

Dear Representative Holmes:

The City of Hays strongly supports HCR 5030 and respectfully requests the House Energy and Natural Resources Committee take favorable action on the resolution. The City is opposed to unfunded mandates in general and is very concerned about the impact of federal safe drinking water quality standards on the City's budget. For example, the City is faced with a potential \$56,000 in increased expenditures in its Water Fund to comply with the proposed Phase II water testing requirements as mandated by the Safe Drinking Water Act. In order to finance this \$56,000 in potential increased expenditures, the City would either have to raise water rates by 3% or absorb these increased costs which would reduce the amount of money available in the water fund for system maintenance and equipment replacement.

Additionally, some of the tests that are required in the proposed Phase II testing requirements are for substances that have little or know probability of being found in the City of Hays' water supply. The City of Hays strongly believes that any testing requirements should be tied to the potential benefit to public health and safety and therefore supports HCR 5030 which urges Congress to eliminate testing requirements that provide little or no benefit to public health.

KANSAS LEGISLATURE
KANSAS CORPORATION COMMISSION**

Energy & Natural Resources

Attachment #2

2/1/94

Report of the Kansas Corporation Commission
to the Kansas Legislature
for Fiscal Year 1993

The Kansas Corporation Commission submits this report in compliance with requirements of K.S.A. 66-117b.

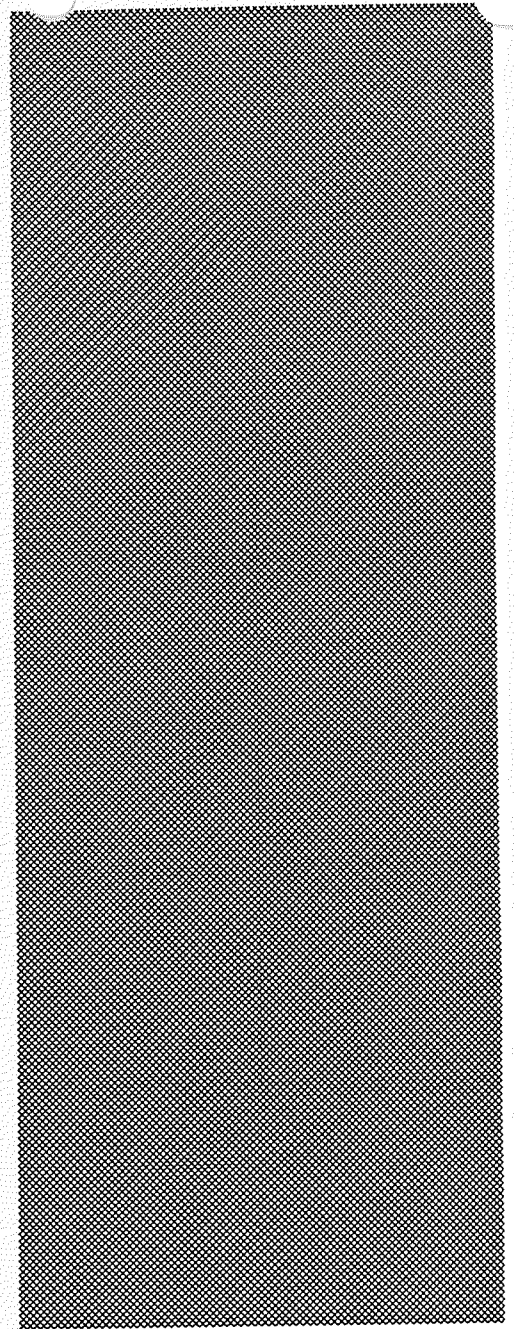

That statute requires the Commission to monitor and report annually to the legislature any changed rate, joint rate, toll, charge or classification or schedule of charges, or any rule or regulation or practices pertaining to service or rates approved by the Commission in the preceding fiscal year for a public utility or common carrier that had \$10 million or more annual operating revenues in the previous calendar year.

This report covers action taken by the Kansas Corporation Commission for the fiscal year beginning July 1, 1992 through June 30, 1993. As in previous reports, this report includes information on Commission actions regarding utilities with less than \$10 million annual operating revenues. Within each industry, information is given separately for three categories: "Formal" cases of companies with more than \$10 million of revenues, "Formal" cases of companies with less than \$10 million revenues, and all "Informal" matters. "Formal" matters are cases which generally involve an application or petition from the company and a formal Commission order.

ELECTRICITY

REPORT TO THE 1994 KANSAS LEGISLATURE
ELECTRIC UTILITY INDUSTRY

In addition to case work, the Commission is engaged in efforts to monitor and respond to developmental changes in the operation and regulation of the electric utility industry. In an ever dynamic world as manifest by changes in technology, customer needs, and regulatory structure it is important for the Commission to stay informed so that it can react to and, where necessary, induce change in an appropriate way. In recent years regulators and companies alike have accepted the idea that one component of least-cost utility planning requires the company to consider the cost-effectiveness of conservation or demand-side resources. The KCC has responded by constructing a set of Integrated Resource Plan (IRP) rules that (when instituted will) offer both guidance and incentives for designing and implementing cost-effective demand-side programs for Kansas customers. More importantly, the IRP rules provide a basis for the company to identify and describe planning goals and the available means for achieving those goals. The IRP process is intended to give all interested parties in the state, including the general public, special interest groups, legislators, regulators, and other utilities, an opportunity to preview a particular utility's plan for the future. Having this opportunity will likely enhance utility planning and result in improved control over possible rate increases in the future.

The Commission is also engaged in implementing standards contained in the Energy Policy Act of 1992 (EPACT). One of the provisions of EPACT is a consideration of possible policy changes in the area of electricity transmission and wheeling. This being just one component of a set of possible policy changes intended to induce a transformation of the underlying structure of the electric industry. The aim of any transformation is the introduction of greater competition and the likelihood of lower rates. Furthermore, the Commission is in the process of instituting a mechanism for reviewing (the prudence of) Compliance Plans required by the Federal Clean Air Act Amendments of 1992. The Commission is also involved in several long-term research efforts concerning rate design issues, questions about fuel selection, the possible influence of environmental externalities, the viability of renewable resources and co-generation, resource acquisition methods (particularly, bidding procedures), and IRP review methods and techniques.

REPORT TO THE 1994 KANSAS LEGISLATURE
ELECTRIC UTILITY INDUSTRY

The Commission staff continues to digitize state and county utility maps as part of the GIS (Geographical Information System) mapping process. This is part of a long term effort to develop "intelligent" digitized drawings of utility systems and territories. When complete, the maps will cross reference Commission databases and will enable graphic projection on geographical maps prepared by other governmental agencies or private industry. This will improve efficiency in information retrieval and also provide the future capability to transfer requested information over modems or fax machines. In addition digitally updating the maps requires less manpower than the manual techniques used in the past.

NATURAL GAS

REPORT TO THE 1994 KANSAS LEGISLATURE
NATURAL GAS UTILITY INDUSTRY

The gas industry is in the final stages of a restructuring prompted, in large part, by a series of Federal Energy Regulatory Commission (FERC) orders initiated several years ago and culmination in Order 636. Thus, in addition to case work, the Commission has monitored the restructuring and inquired into its implications for Kansas gas utilities and customers. The Commission is currently engaged in a study of numerous questions pertaining to the effects of restructuring the gas industry. In the last year, the Commission devised a means for dealing with the expense associated with rewriting gas contracts that contained, so called, take-or-pay provisions. The need to rewrite these contracts stemmed, in part, from the restructuring. Just as for the electric utilities, and with the same general intent, the Commission has constructed a set of IRP rules for the gas utilities. Similarly, there exist several, as yet unresolved, questions concerning the review of gas IRPs. Many of the long-term research efforts and questions identified vis-a-vis the electric industry also hold for the gas industry. Additional research topics include the possible use of futures contracts (for hedging purposes) by local distribution companies (LDCs), reforming the design of the purchase gas adjustment (PGA) mechanism, and the economic development of alternative uses (i.e., markets) for natural gas.

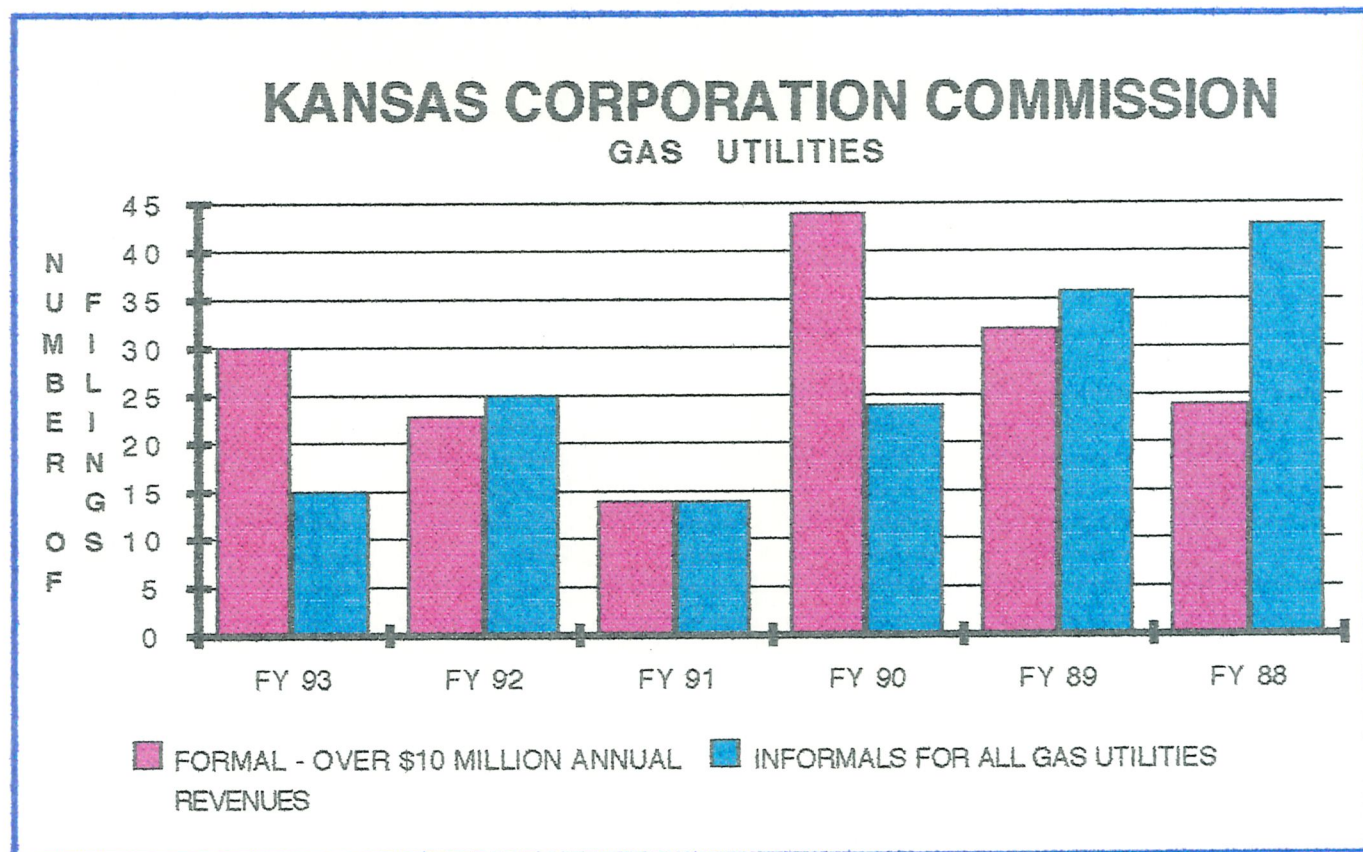

The Commission staff continues to digitize state and county utility maps as part of the GIS (Geographical Information System) mapping process. This is part of a long term effort to develop "intelligent" digitized drawings of utility systems and territories. When complete, the maps will cross reference Commission databases and will enable graphic projection on geographical maps prepared by other governmental agencies or private industry. This will improve efficiency in information retrieval and also provide the future capability to transfer requested information over modems or fax machines. In addition digitally updating the maps requires less manpower than the manual techniques used in the past.

TELECOMMUNICATIONS

REPORT TO THE 1994 KANSAS LEGISLATURE
TELECOMMUNICATIONS INDUSTRY

In fiscal year 1993, the Commission initiated an effort to encourage state-wide implementation of enhanced 911 emergency service. At the Commission's direction, the local telephone companies reduced their facilities rates for 911 to cost. In addition, the Commission staff negotiated a stipulation between regulated telephone utilities and the counties providing 911 service. This stipulation provides for improved cooperation between 911 service providers and the telephone companies in ensuring availability of 911 service. The stipulation also contains additional commitment by the 911 service providers to negotiate the appropriate inter-governmental agreements to allow 911 to operate smoothly between counties and various law enforcement and 911 service staffs. Further, the Commission staff has obtained and disseminated funding information to the counties. With knowledge of funding options, it is hoped the counties would be better able to finance the costs of operating a 911 system.

The Commission has continued to support efforts to link rural areas of Kansas together through interactive video and improved communication systems. Members of the Commission staff participated in a number of user-group meetings, including participation in the Kansas Telemedicine Project sponsored by the Kansas Hospital Association and funded in part by the Wesley Foundation. These user-systems are examining improved and enhanced telecommunications use, including incorporation of interactive video. Interactive video systems are growing in numbers and capability and are allowing a variety of educational, medical and private interest information to flow among rural and more urban communities. Kansas continues to be in the forefront nationwide in the advanced use of telecommunications.

Revised access charges were put into place as scheduled with the resultant cost savings being flowed-through to long distance customers as called for in the stipulation and order. AT&T long distance rates were decreased \$720,000 annually as a result of the access charge plan. As in previous years, most other long distance companies, while not under the same obligation as AT&T under terms in the access stipulation, also reduced rates accordingly to match those of AT&T. Commission staff has begun work on designing the next access plan, since the existing plan will expire at the end of calendar year 1994.

REPORT TO THE 1994 KANSAS LEGISLATURE
TELECOMMUNICATIONS INDUSTRY

The modernization of Southwestern Bell's communications network called for in the alternative regulatory plan called "TeleKansas" continued, as in previous years, slightly ahead of schedule. Southwestern Bell exercised its ability to request streamlined regulatory approval on certain services and received approval to place numerous services into the "Flexibly Priced" service category.

Local telephone companies came to the aid of flood victims during the summer of calendar year 1993. Local telephone company employees took extraordinary efforts to keep central offices functioning and keep communications intact in flood areas. The Commission maintained in contact with the companies and expedited approval of flood relief measures where necessary.

The Dual Party Relay System continued to flourish. The volumes of calls handled by the relay center operators, providing a link between the speech and hearing impaired community and existing telecommunications customers, continued to increase. Commission approval of minor adjustments in the system's operations had been requested by the board which oversees the project at the close of fiscal year 1992. Those adjustments were approved by the Commission in 1993.

103D CONGRESS
1ST SESSION

H. R. 3686

To amend the Safe Drinking Water Act to suspend the requirements of that Act until the costs of implementing those requirements are fully funded by the Federal Government.

IN THE HOUSE OF REPRESENTATIVES

NOVEMBER 22, 1993

Mr. ROBERTS (for himself and Mr. CONDIT) introduced the following bill;
which was referred to the Committee on Energy and Commerce

A BILL

To amend the Safe Drinking Water Act to suspend the requirements of that Act until the costs of implementing those requirements are fully funded by the Federal Government.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SUSPENSION OF SAFE DRINKING WATER ACT.**

4 Title XIV of the Public Health Service Act (the Safe
5 Drinking Water Act) is amended by inserting the following
6 new section after section 1417:

Energy & Natural Resources
Attachment 3
2/1/94

1 **"SEC. 1418. PROVISIONS TO BE TREATED AS VOLUNTARY**
2 **UNTIL FULLY FUNDED.**

3 Notwithstanding any other provision of this Act, the
4 provisions of this title that impose requirements on the
5 States shall be treated as recommendations to the States
6 and compliance with such provisions shall be voluntary on
7 the part of the States until the costs of implementing such
8 provisions (including all costs to units of local government)
9 are fully funded by the Federal Government. The costs
10 of implementing such provisions with respect to a State
11 or a unit of local government shall be determined by the
12 Administrator and the chief official of the State respon-
13 sible for implementing the requirements of this part."

○

REPORT TO THE 1994 KANSAS LEGISLATURE
TRANSPORTATION INDUSTRY

COMMON CARRIERS

Only one common carrier railroad reported Kansas intrastate operating revenue in excess of \$10,000,000 for calendar year 1992. Please note that common carrier railroads, motor carriers and pipelines report on a calendar year basis rather than a fiscal year basis. The Atchison, Topeka and Santa Fe Railway Company reported revenue of \$22,412,000 for 1992. This common carrier railroad did not file any applications for rate increases with this Commission during calendar year 1993, to date. The Atchison, Topeka and Santa Fe Railway Company has not filed any applications to discontinue agency service in 1993.

One common motor carrier reported Kansas intrastate operating revenue in excess of \$10,000,000 for calendar year 1992. That common motor carrier was United Parcel Service, MCID 107100, and it reported Kansas intrastate operating revenue of \$18,424,251 for calendar year 1992. This carrier was granted an increase, effective February 15, 1993, of 4.5% on Kansas intrastate traffic.

No common carrier pipelines reported Kansas intrastate operating revenues in excess of \$10,000,000 for calendar year 1992.

103D CONGRESS
1ST SESSION

H. R. 3392

To amend the Safe Drinking Water Act to assure the safety of public water systems.

IN THE HOUSE OF REPRESENTATIVES

OCTOBER 27, 1993

Mr. SLATTERY (for himself, Mr. BLILEY, Mr. ROWLAND, Mr. HALL of Texas, Mr. COOPER, Mr. PAXON, Mr. UPTON, Mr. LEHMAN, Mr. TAUZIN, Mr. POMEROY, Mr. BEREUTER, Mr. CANADY, Mr. WILLIAMS, Mr. FRANK of Massachusetts, Mr. BARRETT of Nebraska, Mr. BARLOW, Mr. MCHUGH, Mr. SWETT, Mrs. VUCANOVICH, Mr. JEFFERSON, Mr. HUNTER, Mr. GRANDY, and Mr. WALSH) introduced the following bill; which was referred to the Committee on Energy and Commerce

A BILL

To amend the Safe Drinking Water Act to assure the safety of public water systems.

- 1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*
3 **SECTION 1. SHORT TITLE.**
4 This Act may be cited as the "Safe Drinking Water
5 Act Amendments of 1993".

*Energy & Natural Resources
Attachment 4
2/1/94*

1 **SEC. 2. GOAL.**

2 Title XIV of the Public Health Service Act (the Safe
3 Drinking Water Act) is amended by inserting the following
4 before section 1401:

5 **“SEC. 1400. GOAL.**

6 “It is the goal of this Act to ensure the quality and
7 safety of drinking water provided to the public by public
8 water systems, and to protect the public health from the
9 threat of disease caused by water-borne contaminants.”.

10 **SEC. 3. DEFINITIONS.**

11 Section 1402 of title XIV of the Public Health Serv-
12 ice Act (the Safe Drinking Water Act) is amended as
13 follows:

14 (1) Amend paragraph (1) to read as follows:

15 “(1) The term ‘primary drinking water regulation’
16 means a regulation which—

17 “(A) applies to public water systems;

18 “(B) specifies one or more contaminants sub-
19 ject to regulation under section 1412;

20 “(C) specifies for each such contaminant
21 either—

22 “(i) a maximum contaminant level, or

23 “(ii) a treatment technique; and

24 “(D) contains criteria and procedures to assure
25 a supply of drinking water which dependably com-
26 plies with such maximum contaminant levels or

1 treatment technique; including quality control and
2 testing procedures to ensure compliance with such
3 levels or treatment technique and to ensure proper
4 operation and maintenance of the system, and re-
5 quirements as to (i) the minimum quality of water
6 which may be taken into the system, and (ii) siting
7 for new facilities for public water systems.”.

8 (2) Amend paragraph (4) by striking the sec-
9 ond sentence and inserting: “Such term includes (A)
10 any collection, treatment, storage, and distribution
11 facilities under the ownership of such system and
12 used primarily in connection with such system, and
13 (B) any collection or pretreatment storage facilities
14 not under such ownership which are used primarily
15 in connection with such system.”.

16 (3) Amend paragraph (6) by inserting before
17 the period the following: “which is of public health
18 or welfare concern.”.

19 (4) Add the following at the end thereof:

20 “(15) The term ‘risk reduction benefits and
21 costs’ means the public health benefit achieved by
22 changing the level of a contaminant from one level
23 to another, taking cost into consideration.”.

1 **SEC. 5. NATIONAL DRINKING WATER REGULATIONS.**

2 Section 1412 of title XIV of the Public Health Serv-
3 ice Act (the Safe Drinking Water Act) is amended as
4 follows:

5 (1) Amend the second sentence of subsection
6 (a)(1) to read as follows: "No such regulation shall
7 be required to comply with the standards set forth
8 in subsection (b)(3) unless such regulation is amend-
9 ed to establish a different maximum contaminant
10 level (or treatment technique) after the enactment of
11 the Safe Drinking Water Act Amendments of
12 1993."

13 (2) In paragraph (3) strike ", (2), or (3)" and
14 insert "or (2)".

15 (3) Amend subsection (b) to read as follows:

16 "(b)(1) In the case of those contaminants listed in
17 the Advance Notice of Proposed Rulemaking published in
18 volume 47, Federal Register, page 9352, and in volume
19 48, Federal Register, page 45502, for which national pri-
20 mary drinking water regulations have not been promul-
21 gated as of the date of enactment of the Safe Drinking
22 Water Act Amendments of 1993, the Administrator
23 shall—

24 "(A) publish maximum contaminant level goals
25 and promulgate a national primary drinking water
26 regulation in accordance with paragraph (3) for

1 those contaminants which he finds, based on data
2 available under section 1445, occur in drinking
3 water and are of public health concern, and

4 “(B) not later than 18 months after enactment
5 of the Safe Drinking Water Act Amendments of
6 1993, eliminate monitoring, compliance and enforce-
7 ment requirements for those contaminants which the
8 Administrator finds, based on such data, do not
9 occur in drinking water at levels of public health
10 concern.

11 “(2) Not later than 36 months after enactment of
12 the Safe Drinking Water Act Amendments of 1993, and
13 every 5 years thereafter, the Administrator shall promul-
14 gate maximum contaminant level goals and national pri-
15 mary drinking water regulations for new contaminants se-
16 lected in accordance with this paragraph. The Adminis-
17 trator shall review the national drinking water occurrence
18 data base maintained under section 1445. After notice and
19 opportunity for public comment, the Administrator shall
20 assess all occurrence and public health information avail-
21 able with respect to each. Based on such assessment, the
22 Administrator shall determine with respect to each con-
23 taminant listed under section 1445 based upon occurrence
24 and public health concern whether promulgation of a na-
25 tional primary drinking water regulation is or is not ap-

1 appropriate, or whether additional health effects or occur-
2 rence information is necessary before a determination can
3 be made. For those contaminants the Administrator
4 makes a determination that a national primary drinking
5 water regulation is not appropriate, the Administrator
6 shall also make a determination on continuation of mon-
7 itoring under section 1445.

8 “(3) Each maximum contaminant level goal estab-
9 lished under this subsection shall be set at the level at
10 which no known or anticipated adverse effects on the
11 health of persons occur and which allows an adequate
12 margin of safety. Each national primary drinking water
13 regulation for a contaminant for which a maximum con-
14 taminant level goal is established under this subsection
15 shall specify a maximum level for such contaminant which
16 is achievable by public water systems with the use of the
17 best technology, treatment techniques and other means,
18 taking public health risk reduction benefits and cost into
19 consideration, which the Administrator finds are available,
20 after examination for efficacy under field conditions, and
21 not solely under laboratory conditions. In addition, the Ad-
22 ministrator shall establish in each national primary drink-
23 ing water regulation best technology treatment techniques
24 for public water systems serving less than 1,000 people,
25 best technology treatment techniques for public water sys-

1 tems serving between 1,000 and 10,000 people, and best
2 technology treatment techniques for public water systems
3 serving more than 10,000 people. In addition to tech-
4 nology, watershed protection and pollution prevention
5 shall be considered appropriate best technology for pur-
6 poses of compliance with national primary drinking water
7 regulations.

8 “(4) Notwithstanding the provisions of paragraph
9 (3), the Administrator shall promulgate national primary
10 drinking water regulations for radionuclides, disinfection
11 byproducts, sulfate, and corrosion byproducts which will
12 be protective of public health and take into account—

13 “(A) the health benefits to be achieved by re-
14 ducing the level of such contaminants in drinking
15 water relative to reducing the level of such contami-
16 nants in other media;

17 “(B) the availability of technology—

18 “(i) that is effective in removing or other-
19 wise treating such contaminants under field
20 conditions reflecting a representative range of
21 water qualities (and not just under laboratory
22 conditions), and

23 “(ii) which does not cause significant ad-
24 verse impacts on—

1 “(I) other elements of drinking water
2 quality,

3 “(II) other environmental media, in-
4 cluding impacts related to disposal of
5 treatment residuals, or

6 “(III) the efficacy of other drinking
7 water treatment or processes; and

8 “(C) the costs to consumers of such regulation.

9 “(5) Each national primary drinking water regulation
10 which establishes a maximum contaminant level shall list
11 the technology, treatment techniques, and compliance
12 timeframes and other means which the Administrator
13 finds to be available for purposes of meeting such maxi-
14 mum contaminant level, but a regulation under this sub-
15 section shall not require that any specified technology,
16 treatment technique, or other means be used for purposes
17 of meeting such maximum contaminant level.

18 “(6)(A) The Administrator is authorized to promul-
19 gate a national primary drinking water regulation that re-
20 quires the use of a treatment technique in lieu of establish-
21 ing a maximum contaminant level, if the Administrator
22 makes a finding that it is not economically or techno-
23 logically feasible to ascertain the level of the contaminant.
24 In such case, the Administrator shall identify those treat-
25 ment techniques which will be protective of public health

1 and which take into account the factors specified in para-
2 graphs (3) and (4) of this subsection as appropriate. Such
3 regulation shall specify each treatment technique known
4 to the Administrator which meets the requirements of this
5 paragraph, but the Administrator may grant a variance
6 from any specified treatment technique in accordance with
7 section 1415(a)(3).

8 “(B)(i) Not later than 18 months after the enactment
9 of the Safe Drinking Water Act Amendments of 1986, the
10 Administrator shall propose and promulgate national pri-
11 mary drinking water regulations specifying criteria under
12 which filtration (including coagulation and sedimentation,
13 as appropriate) is required as a treatment technique for
14 public water systems supplied by surface water sources.
15 In promulgating such rules, the Administrator shall con-
16 sider the quality of source waters, protection afforded by
17 watershed management, treatment practices (such as dis-
18 infection and length of water storage) and other factors
19 relevant to protection of health.

20 “(ii) In lieu of the provisions of section 1415 the Ad-
21 ministrator shall specify procedures by which the State de-
22 termines which public water systems within its jurisdiction
23 shall adopt filtration under the criteria of clause (i). The
24 State may require the public water system to provide stud-
25 ies or other information to assist in this determination.

1 The procedures shall provide notice and opportunity for
2 public hearing on this determination. If the State deter-
3 mines that filtration is required, the State shall prescribe
4 a schedule for compliance by the public water system with
5 the filtration requirement. The schedule shall take into ac-
6 count the time which is reasonably necessary for the public
7 water system to plan, design, finance, and construct filtra-
8 tion facilities and adjust operating practices necessary to
9 achieve compliance with the filtration requirement.

10 “(iii) Within 24 months from the time that the Ad-
11 ministrator establishes the criteria and procedures under
12 this subparagraph, a State with primary enforcement re-
13 sponsibility shall adopt any necessary regulations to imple-
14 ment this subparagraph. Within 12 months of adoption
15 of such regulations the State shall make determinations
16 regarding filtration for all the public water systems within
17 its jurisdiction supplied by surface waters.

18 “(iv) If a State does not have primary enforcement
19 responsibility for public water systems, the Administrator
20 shall have the same authority to make the determination
21 in clause (ii) in such State as the State would have under
22 that clause. Any filtration requirement or schedule under
23 this subparagraph shall be treated as if it were a require-
24 ment of a national primary drinking water regulation.

1 “(7) Not later than 48 months after the enactment
2 of the Safe Drinking Water Act Amendments of 1993, the
3 Administrator shall propose and promulgate national pri-
4 mary drinking water regulations requiring disinfection as
5 a treatment technique for all public water systems. The
6 Administrator shall simultaneously promulgate a rule
7 specifying criteria that will be used by the Administrator
8 (or delegated State authorities) to grant variances from
9 this requirement according to the provisions of section
10 1415(a)(1)(B) and 1415(a)(3). In implementing section
11 1442(g) the Administrator or the delegated State author-
12 ity shall, where appropriate, give special consideration to
13 providing technical assistance to small public water sys-
14 tems in complying with the regulations promulgated under
15 this paragraph.

16 “(8)(A) National primary drinking water regulations
17 promulgated prior to the Safe Drinking Water Act
18 Amendments of 1993 shall be reviewed not later than 30
19 months after enactment of such amendments. If the Ad-
20 ministrator determines, based on data available under sec-
21 tion 1445, that any contaminant subject to regulation does
22 not occur in public water systems at levels of public health
23 concern, he shall eliminate monitoring, compliance and en-
24 forcement requirements from such contaminant regula-
25 tion. Such regulations shall also be reviewed not later than

1 5 years after enactments of such amendments, and if the
2 Administrator determines that a regulation is not consist-
3 ent with the factors specified in paragraph (3) or (4) of
4 this subsection as appropriate, he shall promulgate a re-
5 vised regulation in accordance with such factors.

6 “(B) Each national primary drinking water regula-
7 tion promulgated after the enactment of the Safe Drinking
8 Water Act Amendments of 1993 shall include a schedule
9 for periodic review of such regulation. Such reviews shall
10 include an analysis of new health effects and occurrence
11 data, and innovations or changes in technology, treatment
12 techniques or other activities that have become available
13 since the promulgation of such regulation. If the Adminis-
14 trator determines that the contaminant subject to regula-
15 tion no longer occurs in drinking water at levels of public
16 health concern, the Administrator shall eliminate monitor-
17 ing, compliance and enforcement requirements from such
18 contaminant regulation, and if he determines that the reg-
19 ulation is not consistent with the factors specified in para-
20 graph (3) or (4) of this subsection as appropriate, the
21 Administrator shall promulgate a revised regulation in ac-
22 cordance with such factors.

23 “(9) National primary drinking water regulations
24 promulgated under this subsection (and amendments
25 thereto) shall take effect in accordance with schedules pro-

1 mulgated by the Administrator in each such regulation ex-
2 cept such schedule including monitoring requirements
3 shall not be less than 24 months. Such schedules shall
4 take into account the time which is reasonably necessary
5 for public water systems to plan, design, finance, and con-
6 struct treatment facilities and adjust operating practices
7 necessary to achieve compliance with the regulation. Regu-
8 lations under subsection (a) shall be superseded by regula-
9 tions under this subsection to the extent provided by the
10 regulations under this subsection.

11 “(10) No national primary drinking water regulation
12 may require the addition of any substance for preventive
13 health care purposes unrelated to contamination of drink-
14 ing water.”.

15 (4) Amend the second sentence of subsection
16 (e) to read as follows: “The Board shall respond, as
17 it deems appropriate, and the Administrator shall
18 publish the findings and recommendations of the
19 Board, if any, as part of the notice of proposed rule-
20 making.”.

21 (5) Add the following at the end thereof:

22 “(f) NEGOTIATED RULEMAKING.—The Adminis-
23 trator may utilize negotiated rulemaking procedures found
24 in the Negotiated Rulemaking Act (5 U.S.C. 581–590)

1 whenever he determines it will facilitate the promulgation
2 of regulations required by this section.”.

3 **SEC. 4. STATE PRIMARY ENFORCEMENT RESPONSIBILITY.**

4 Section 1413 of title XIV of the Public Health Serv-
5 ice Act (the Safe Drinking Water Act) is amended as
6 follows:

7 (1) Amend paragraph (1) of subsection (a) to
8 read as follows:

9 “(1) has adopted within 24 months of promul-
10 gation by the Administrator, drinking water regula-
11 tions which are no less stringent than the national
12 primary drinking water regulations promulgated by
13 the Administrator under sections 1412(a) and
14 1412(b);”.

15 (2) Amend paragraph (4) of subsection (a) to
16 read as follows:

17 “(4) If it permits variances from the require-
18 ments of its drinking water regulations which meet
19 the requirements of paragraph (1), permits such
20 variances under conditions and in a matter which is
21 not less stringent than the conditions under, and the
22 manner in, which variances may be granted under
23 section 1415; and”.

1 **SEC. 6. ENFORCEMENT OF DRINKING WATER REGULA-**
2 **TIONS.**

3 Section 1414 of title XIV of the Public Health Serv-
4 ice Act (the Safe Drinking Water Act) is amended as
5 follows:

6 (1) Strike “or an exemption under 1416” in
7 each place it appears.

8 (2) Strike “or an exemption under section
9 1416(f) in each place it appears.

10 (3) In subsection (b) strike “or exemption” and
11 strike “or 1416”.

12 (4) Amend so much of subsection (c) as follows
13 paragraph (1) to read as follows:

14 “(2) if the public water system is subject to a
15 variance granted under section 1415(a)(1)(A) or
16 1415(a)(2) for an inability to meet a maximum con-
17 taminant level requirement—

18 “(A) the existence of such variance, and

19 “(B) any failure to comply with the re-
20 quirements of any schedule prescribed pursuant
21 to the variance.

22 The Administrator shall by regulation prescribe the fre-
23 quency for giving notice under this subsection. Within 15
24 months after the enactment of the Safe Drinking Water
25 Act Amendments of 1993, the Administrator shall amend
26 such regulations to provide for different types and fre-

1 quencies of notice based on the seriousness of any poten-
2 tial adverse health effects which may be involved. Notice
3 of any violation designated by the Administrator as posing
4 a serious potential adverse health effect shall be given as
5 soon as possible, but in no case later than 14 days after
6 the violation. Notice of violations judged to be less serious
7 shall be given no less frequently than annually. The Ad-
8 ministrator shall provide guidance as to the form, manner
9 and content of notice to be used to provide information
10 as promptly and effectively as possible taking into account
11 both the seriousness of any potential adverse health effects
12 and the likelihood of reaching all affected persons. States,
13 in consultation with public water systems, shall determine
14 the actual form, manner, and content of such notices. The
15 Administrator may also require the owner or operator of
16 a public water system to give notice to the persons served
17 by it of contaminant levels of any unregulated contami-
18 nant required to be monitored under section 1445(a). Any
19 person who violates this subsection or regulations issued
20 under this subsection shall be subject to a civil penalty
21 of not to exceed \$25,000.”.

22 (5) In subsection (f)(2) strike “or exemption”.

1 **SEC. 7. VARIANCES.**

2 Section 1415 of title XIV of the Public Health Serv-
3 ice Act (the Safe Drinking Water Act) is amended to read
4 as follows:

5 **"SEC. 1415. VARIANCES.**

6 "Notwithstanding any other provision of this part,
7 variances from national primary drinking water regula-
8 tions may be granted as follows:

9 "(1) A State which has primary enforcement
10 responsibility for public water systems may grant
11 one or more variances from an applicable national
12 primary drinking water regulation to one or more
13 public water systems within its jurisdiction.

14 "(2) A variance may only be issued if the State
15 has determined that the water system cannot afford
16 to install the BAT or other technology that has been
17 identified by the Administrator as appropriate for
18 the system size category to meet the maximum con-
19 taminant level, and if it is not feasible for the water
20 system to connect with another source of water that
21 will meet the standards. If the State determines that
22 a water system is unable to comply with a des-
23 ignated BAT, the system will be required to comply
24 with a best available affordable technology (BAAT)
25 as designed by the Environmental Protection Agen-
26 cy. Such measures may include, but not be limited

1 to, requirements for public education and notifica-
2 tion, and use of alternative technologies that, while
3 they cannot bring the contaminant level below the
4 maximum contaminant level, will not result in an
5 unreasonable risk to health.

6 “(3) After a variance is issued, it shall be re-
7 viewed by the State every 3 years to determine if the
8 conditions for granting the variance still exist. It
9 shall be the responsibility of the water system to
10 provide documentation to the State indicating that
11 current BAT for the system size is still unaffordable
12 and the system is still unable to connect with an-
13 other source of water that meets the standards.

14 “(4) Before a determination to grant a variance
15 is made by the State, the State shall provide notice
16 and opportunity for a public hearing on the deter-
17 mination. Each State that grants a variance shall
18 promptly notify the Administrator of the granting of
19 such variance. Such notification shall include the
20 reasons for the variance and the documentation used
21 to grant the variance.

22 “(5) The Administrator, in consultation with
23 the States shall develop affordability guidance within
24 18 months of enactment of the Safe Drinking Water
25 Act Amendments of 1993. Such affordability criteria

1 will be reviewed by the Administrator and States
2 every 5 years to determine if changes are needed to
3 the criteria.”.

4 **SEC. 8. EXEMPTIONS.**

5 Section 1416 of title XIV of the Public Health Serv-
6 ice Act (the Safe Drinking Water Act) is repealed.

7 **SEC. 9. RETURN OF WATER.**

8 Title XIV of the Public Health Service Act (the Safe
9 Drinking Water Act) is amended by adding the following
10 after section 1417:

11 **“SEC. 1418. PROHIBITION ON THE RETURN OF WATER TO**
12 **PUBLIC WATER SYSTEMS.**

13 **“(a) IN GENERAL.—**

14 **“(1) PROHIBITION.—**Other provisions of law
15 notwithstanding, except as provided in paragraph
16 (2), no treated drinking water may be removed from
17 a public water system used for any purpose or rout-
18 ed through any device or pipes outside the public
19 water system, and returned to the public water
20 system.

21 **“(2) EXCEPTIONS.—**The prohibition in para-
22 graph (1) shall not apply to pipes and devices totally
23 within the control of one or more public water sys-
24 tems or to connections between water mains.

1 “(b) STATE ENFORCEMENT.—The requirements of
 2 subsection (a) shall be enforced in all States effective 24
 3 months after enactment of this section. States shall en-
 4 force such requirements through State or local plumbing
 5 codes, or such other means of enforcement as the State
 6 may determine to be appropriate.”.

7 **SEC. 10. TAMPERING.**

8 Section 1432 of title XIV of the Public Health Serv-
 9 ice Act (the Safe Drinking Water Act) is amended by
 10 striking subsection (d) and inserting:

11 “(d) DEFINITION OF TAMPER.—For purposes of this
 12 section, the term ‘tamper’ means—

13 “(1) to introduce a contaminant into a public
 14 water system with the intention of harming persons;

15 “(2) to otherwise interfere with the operation of
 16 a public water system with the intention of harming
 17 persons; or

18 “(3) to inject water that has gone out of a pub-
 19 lic water system, back into such system in violation
 20 of section 1418.”.

21 **SEC. 11. RESEARCH, TECHNICAL ASSISTANCE, INFORMA-**
 22 **TION, AND TRAINING OF PERSONNEL.**

23 Section 1442 of title XIV of the Public Health Serv-
 24 ice Act (the Safe Drinking Water Act) is amended as
 25 follows:

1 (1) In subsection (a)(1) strike “may” and in-
2 sert “shall”.

3 (2) Before the period at the end of subsection
4 (a)(2) insert: “and for other purposes, including

5 “(i) the development and dissemination of
6 advisory measures to protect against contami-
7 nants which have not been found to occur in
8 drinking water at levels of public health con-
9 cern;

10 “(ii) assistance in achieving compliance
11 with the public notification requirements of sec-
12 tion 1414(c), and

13 “(iii) the development and dissemination of
14 minimum guidance for the certification of lab-
15 oratories that perform drinking water analyses,
16 and for the certification of individuals who op-
17 erate public water systems, for use by the
18 States in ensuring the validity of monitoring re-
19 ports by regulations issued under section 1445,
20 and the competence of system operators.”.

21 (3) Amend subsection (f) to read as follows:

22 “(f)(1) There are authorized to be appropriated to
23 carry out the provisions of this section, other than sub-
24 sections (a)(1) and (a)(2)(B) and provisions relating to
25 research, \$15,000,000 for the fiscal year ending June 30,

1 1975; \$25,000,000 for the fiscal year ending June 30,
 2 1976; \$35,000,000 for the fiscal year ending June 30,
 3 1977, \$17,000,000 for each of the fiscal years 1978 and
 4 1979; \$21,405,000 for the fiscal year ending September
 5 30, 1980; \$30,000,000 for the fiscal year ending Septem-
 6 ber 30, 1981, \$35,000,000 for the fiscal year ending Sep-
 7 tember 30, 1982.

8 “(2) There are authorized to be appropriated to carry
 9 out the provisions of subsection (a)(1) not more than the
 10 following amounts:

“Fiscal Year	Amount
1994	\$20,000,000
1995	20,000,000
1996	20,000,000
1997	20,000,000
1998	20,000,000.

11 “(3) There are authorized to be appropriated to carry
 12 out subsection (a)(2)(B) \$8,000,000 for each of the fiscal
 13 years 1978 through 1982. There are authorized to be ap-
 14 propriated to carry out subsection (a)(2)(B) not more
 15 than the following amounts:

“Fiscal Year	Amount
1987	\$7,650,000
1988	7,650,000
1989	8,050,000
1990	8,050,000
1991	8,050,000.

16 “(4) There are authorized to be appropriated to carry
 17 out the provisions of this section (other than subsection
 18 (g), subsection (a)(1), subsection (a)(2)(B), and provisions

1 relating to research), not more than the following
2 amounts:

"Fiscal Year	Amount
1987	\$35,600,000
1988	35,600,000
1989	38,020,000
1990	38,020,000
1991	38,020,000."

3 **SEC. 12. GRANTS FOR STATE PROGRAMS.**

4 Section 1443 of title XIV of the Public Health Serv-
5 ice Act (the Safe Drinking Water Act) is amended as fol-
6 lows:

7 (1) Amend the table in subsection (a)(7) to
8 read as follows:

"Fiscal Year	Amount
1987	\$37,200,000
1988	37,200,000
1989	40,150,000
1990	40,150,000
1991	40,150,000
1994	100,000,000
1995	125,000,000
1996	150,000,000
1997	150,000,000
1998	150,000,000."

9 (2) Amend paragraph (1) of subsection (c) by
10 striking "and exemptions" in both places it appears
11 and by striking "and 1416".

12 **SEC. 13. RECORDS, OCCURRENCE DATA, AND INSPECTIONS.**

13 Section 1445 of title XIV of the Public Health Serv-
14 ice Act (the Safe Drinking Water Act) is amended to read
15 as follows:

1 "SEC. 1445. RECORDS, OCCURRENCE DATA, AND INSPEC-
2 TIONS.

3 "(a) IN GENERAL.—(1) Every person who is a sup-
4 plier of water, who is or may be otherwise subject to a
5 primary drinking water regulation prescribed under sec-
6 tion 1412 or to an applicable underground injection con-
7 trol program (as defined in section 1422(c)), who is or
8 may be subject to the permit requirement of section 1424
9 or to an order issued under section 1441, or who is a
10 grantee, shall establish and maintain such records, make
11 such reports, conduct such monitoring, and provide such
12 information as the Administrator may reasonably require
13 by regulation to assist him in establishing regulations
14 under this title, in determining whether such person has
15 acted or is acting in compliance with this title, in admin-
16 istering any program of financial assistance under this
17 title, in evaluating the health risks of unregulated con-
18 taminant, or in advising the public of such risks. In requir-
19 ing a public water system to monitor under this sub-
20 section, the Administrator may take into consideration the
21 system size and the contaminants likely to be found in
22 the system's drinking water. Compliance monitoring regu-
23 lations promulgated under this paragraph shall permit the
24 States with primary enforcement responsibility under sec-
25 tion 1413 to tailor monitoring requirements for any indi-
26 vidual public water system, or class of systems, based on

1 occurrence data and other information concerning such
2 system or class which is available to the State.

3 “(2) Not later than 18 months after enactment of
4 the Safe Drinking Water Act Amendments of 1993, the
5 Administrator shall promulgate regulations specifying a
6 monitoring program for unregulated contaminants. The
7 regulations shall require monitoring of drinking water sup-
8 plied by the system and shall vary the frequency and
9 schedule of monitoring requirements for systems based on
10 the number of persons served by the system, the source
11 of supply, and the contaminants likely to be found. Each
12 system required to monitor shall conduct such monitoring
13 at least once every 5 years after the effective date of the
14 Administrator’s regulations unless the Administrator re-
15 quires more frequent monitoring.

16 “(3) Not later than 18 months after enactment of
17 the Safe Drinking Water Act Amendments of 1993 and
18 every 5 years thereafter, the Administrator shall promul-
19 gate revised regulations under paragraph (2) listing not
20 more than 30 unregulated contaminants to be monitored
21 by public water systems and included in the national
22 drinking water occurrence data base maintained pursuant
23 to subsection (b) of this section. Public water system serv-
24 ing 10,000 or more people shall monitor for all listed con-
25 taminants. In addition, each State shall develop a rep-

1 representative monitoring plan to assess the occurrence of un-
2 regulated contaminants in systems serving fewer than
3 10,000 people, which plan shall require monitoring by sys-
4 tems representatives of different sizes, types and geo-
5 graphic locations within the State. Environmental Protec-
6 tion Agency shall make available to the States, on request,
7 laboratory capacity to analyze samples taken pursuant to
8 the plan.

9 “(4) Public water systems conducting monitoring of
10 unregulated contaminants pursuant to this section shall
11 provide the results of such monitoring to the primary en-
12 forcement authority.

13 “(5) Notification of the availability of the results of
14 the monitoring programs required under paragraph (2),
15 and notification of the availability of the results of the
16 monitoring program referred to in paragraph (6), shall be
17 given to the persons served by the system and the Admin-
18 istrator.

19 “(6) The Administrator may waive the monitoring re-
20 quirement under paragraph (2) for a system which has
21 conducted a monitoring program after January 1, 1983,
22 if the Administrator determines the program to have been
23 consistent with the regulations promulgated under this
24 section.

1 “(7) Any system supplying less than 150 service con-
2 nections shall be treated as complying with this subsection
3 if such system provides water samples or the opportunity
4 for sampling according to rules established by the Admin-
5 istrator.

6 “(8) There are authorized to be appropriated
7 \$30,000,000 in the fiscal year ending September 30,
8 1987, to remain available until expended to carry out the
9 provisions of this subsection.

10 “(b) OCCURRENCE DATA BASE.—Not later than 24
11 months after enactment of the Safe Drinking Water Act
12 Amendments of 1993, the Administrator shall assemble
13 and maintain a national drinking water occurrence data
14 base, using information on the occurrence of both regu-
15 lated and unregulated contaminants in public water supply
16 systems obtained under subsection (a) of this section, and
17 information from other public and private sources. Such
18 data shall be used by the Administrator in making any
19 determination under section 1412 with respect to the oc-
20 currence of any contaminant in drinking water at levels
21 of public health concern. The Administrator shall periodi-
22 cally solicit recommendation from the National Academy
23 of Sciences and any person may petition the Administrator
24 with respect to contaminants that should be included in
25 the national drinking water occurrence data base, includ-

1 ing recommendations with respect to additional unregu-
2 lated contaminants which should be listed in regulations
3 promulgated under paragraph (3) of subsection (a) of this
4 section.

5 “(c) ENTRY AND INSPECTION.—(1) Except as pro-
6 vided in paragraph (2), the Administrator, or a represent-
7 ative of the Administrator duly designated by him, upon
8 presenting appropriate credentials and a written notice to
9 any supplier of water or other person subject to (A) a na-
10 tional primary drinking water regulation prescribed under
11 section 1412, (B) and applicable underground injection
12 control program, or (C) any requirement to monitor an
13 unregulated contaminant pursuant to subsection (a), or
14 person in charge of any of the property of such supplier
15 or other person referred to in clause (A), (B), or (C), is
16 authorized to enter any establishment, facility, or other
17 property of such supplier or other person in order to deter-
18 mine whether such supplier or other person has acted or
19 is acting in compliance with this title, including for this
20 purpose, inspection, at reasonable times, of records, files,
21 papers, processes, controls, and facilities, or in order to
22 test any feature of a public water system, including its
23 raw water source. The Administrator or the Comptroller
24 General (or any representative designated by either) shall
25 have access for the purpose or audit and examination to

1 any records, reports, or information of a grantee which
2 are required to be maintained under subsection (a) or
3 which are pertinent to any financial assistance under this
4 title.

5 “(2) No entry may be made under the first sentence
6 of paragraph (1) in an establishment, facility, or other
7 property of a supplier of water or other person subject
8 to a national primary drinking water regulation if the es-
9 tablishment, facility, or other property is located in a State
10 which has primary enforcement responsibility for public
11 water systems unless, before written notice of such entry
12 is made, the Administrator (or his representative) notifies
13 the State agency charged with responsibility for safe
14 drinking water of the reasons for such entry. The Admin-
15 istrator shall, upon a showing by the State agency that
16 such an entry will be detrimental to the administration
17 of the State’s program of primary enforcement respon-
18 sibility, take such showing into consideration in determin-
19 ing whether to make such entry. No State agency which
20 receives notice under this paragraph of an entry proposed
21 to be made under paragraph (1) may use the information
22 contained in the notice to inform the person whose prop-
23 erty is proposed to be entered of the proposed entry; and
24 if a State agency so uses such information, notice to the
25 agency under this paragraph is not required until such

1 time as the Administrator determines the agency has pro-
2 vided the Administrator with satisfactory assurances that
3 it will no longer so use information contained in a notice
4 under this paragraph.

5 “(d) PENALTY.—Whoever fails or refuses to comply
6 with any requirement of subsection (a) or to allow the Ad-
7 ministrator, the Comptroller General, or representatives of
8 either, to enter and conduct any audit or inspection au-
9 thorized by subsection (b) shall be subject to a civil pen-
10 alty of not to exceed \$25,000.

11 “(e) TRADE SECRETS.—(1) Subject to paragraph
12 (2), upon a showing satisfactory to the Administrator by
13 any person that any information required under this sec-
14 tion from such person, if made public, would divulge trade
15 secrets or secret processes of such person, the Adminis-
16 trator shall consider such information confidential in ac-
17 cordance with the purposes of section 1905 of title 18,
18 of the United States Code. If the applicant fails to make
19 a showing satisfactory to the Administrator, the Adminis-
20 trator shall give such applicant 30 days notice before re-
21 leasing the information to which the application relates
22 (unless the public health or safety requires an earlier re-
23 lease of such information).

24 “(2) Any information required under this section (A)
25 may be disclosed to other officers, employees, or author-

1 ized representatives of the United States concerned with
 2 carrying out this title or to committees of the Congress,
 3 or when relevant in any proceeding under this title and
 4 (B) shall be disclosed to the extent it deals with the level
 5 of contaminants in drinking water. For purposes of this
 6 subsection the term 'information required under this sec-
 7 tion' means any papers, books, documents, or information,
 8 or any particular part thereof, reported to or otherwise
 9 obtained by the Administrator under this section.

10 “(f) DEFINITION OF GRANTEE.—For purposes of
 11 this section, (1) the term ‘grantee’ means any person who
 12 applies for or receives financial assistance, by grant, con-
 13 tract, or loan guarantee under this title, and (2) the term
 14 ‘person’ includes a Federal agency.”.

15 **SEC. 14. JUDICIAL REVIEW.**

16 Section 1448 of title XIV of the Public Health Serv-
 17 ice Act (the Safe Drinking Water Act) is amended by
 18 striking out “or exemption” each place it appears and by
 19 striking out “or 1416”.

20 **SEC. 15. CITIZENS CIVIL ACTION.**

21 Section 1449 of title XIV of the Public Health Serv-
 22 ice Act (the Safe Drinking Water Act) is amended as
 23 follows:

24 (1) Strike the period at the end of subsection
 25 (b)(1)(B) and insert “; or” and add the following:

1 “(C) against a public water system which
2 is operating under the terms of an—

3 “(i) administrative compliance order,

4 “(ii) administrative consent agree-
5 ment, or

6 “(iii) judicial consent decree, and

7 is in compliance with the terms of such order,
8 agreement or decree; or”.

9 (2) Strike “or 1416” and “or exemption” in
10 subsection (b)(2).

○

Issues	Current Law	(Slattery/Bliley) H.R. 3392	S.1547 (Baucus)	EPA Proposal	NRDC Proposal
Definition of Public Water System	All systems serving more than 25 people or 15 connections Facilities "under control" of operator	No Change Limit to facilities owned by the system	No Change	No Change	No Change
Definition of Contaminant	Any substance or matter in water	Substance or matter in water of "public health concern."	No Change	No Change	No Change
Maximum Contaminant Level Goals	Set at level at which no known or anticipated adverse health effects occur with an adequate margin of safety	Goals established as in current law but no requirement to set standard as close as feasible	No Change	No Change	No Change
List of 83 Contaminants	Must regulated all 83 contaminants	Regulate all 83 contaminants but eliminate monitoring and compliance for those that are no longer of public health concern in drinking water	Monitoring requirements may be reduced based on occurrence.	No Change	No Change
Triennial Priority Lists	Requires a new list of potential contaminants every three years	Deletes requirement and requires that new contaminants be selected from occurrence database	Replaces 25 mandated regulations to mandate assessment of 15 contaminants first three years, 7 every three years there after. Regulation not mandated.	EPA and SAB select contaminants. Track 1 contaminants would require regulation. Track 2 contaminants would require further study.	No Change
Triennial regulation of 25 contaminants	Requires 25 new MCLs every 3 years	Deletes requirement and requires that contaminant must occur in drinking water at levels of public health concern	Deleted. Replaced with above.	Deleted. Replace with above.	No Change
Standard Setting	MCL set as close to MCLG as feasible, using technology, treatment and other means effective under field conditions and available taking cost into consideration for BAT.	Standards established based on best technology taking incremental risk reduction benefits and cost into consideration. EPA required to establish multiple BAT based on system size with single standard. Allows watershed protection and pollution prevention as BAT. Provides for anomalies which do not fit standard setting process.	Provides for regulation of radon as an anomaly and substitution for sulfate.	No Change	No Change

Testimony presented to

House Energy & Natural Resources Committee

by

The Kansas Department of Health and Environment

House Bill 2666

KDHE requests this legislation to clarify the intent of KSA 82a-1203 and 82a-1205 pertaining to the licensure of water well contractors and their designated water well drillers. Present statute authorizes KDHE to adopt regulations for continuing education for licensed water well contractors. Proposed amendments include designated driller as being required to complete continuing education. The theory of the original legislation was the more knowledgeable the well driller, the better wells are constructed and public health and the environment are protected. The original legislation simply required the water well contractor to pursue continuing education rather than the actual on-site drilling supervisor, commonly referred to as the driller.

KDHE has adopted regulations requiring continuing education for the contractor. KDHE's proposed regulations required continuing education of the water well contractors and their designated drillers, but the attorney general would not approve those regulations due to lack of authorizing legislation regarding designated drillers. During the regulatory hearing process, those making comments were supportive of the requirement being placed on the driller as well as the water well contractor.

Testimony presented by:

Karl Mueldener
Director, Bureau of Water
February 1, 1994

TESTIMONY BEFORE the HONORABLE CHAIRMAN AND MEMBERS
of the
HOUSE ENERGY and NATURAL RESOURCES COMMITTEE
HOUSE BILL 2666

Chairman Holmes and Members of the Committee, I appreciate the opportunity to testify before you this afternoon as a proponent of House Bill 2666. My name is Doug Henkle and I am a water well contractor and pump installer from Garden City and a member of the Legislative Committee of the Kansas Ground Water Association. The views I will present this afternoon have the support of the leadership and general membership of that organization.

The Kansas Groundwater Exploration and Protection Act provides for the licensing of water well contractors and states that "in granting of such licenses due regard shall be given to the interest of the state of Kansas in the protection of its underground water resources". The Kansas legislature and this committee has done much over the years to ensure that the quality of our state's precious ground water is protected. In 1991, in order to further assure the quality of Kansas groundwater, the Kansas legislature amended the Groundwater Exploration and Protection Act to require continuing education for the licensed water well contractor in order that he would be familiar with current Kansas water law and well construction standards. Our association, then known as the Kansas Water Well Association, supported that amendment and provided testimony to this committee stating as much.

When the Kansas Department of Health and Environment proposed rules and regulations to implement the amendment to the Act they determined that often times, as is the case in my own firm, the licensed water well contractor who is now required to have continuing education, is not always the driller who is on the job, constructing the well. Rather, the driller who is in the field daily may be an employee of the licensed contractor working under the contractor's direction and not required to have any continuing education. In light of that fact, House Bill 2666 has been proposed.

The Kansas Ground Water Association supports House Bill 2666 and we feel that your passage of the bill would correct an oversight in the original implementation of continuing education requirements for water well contractors in Kansas.

I would be glad to answer any questions you may have.

State of Kansas

Joan Finney, Governor

Department of Health and Environment

Robert C. Harder, Secretary

Testimony presented to

Energy and Natural Resources Committee

by

The Kansas Department of Health and Environment

House Bill 2667

The Kansas Department of Health and Environment is pleased to provide testimony in support of House Bill 2667 and to recommend two clarifying revisions to the bill as proposed. The purpose of this bill is to provide the agency the necessary authorities to develop a program that will comply with the lead abatement certification requirements associated with the federal Title X Residential Lead-Based Paint Hazard Reduction Act of 1992. This federal law was enacted to prevent and eliminate lead poisoning among children. Lead is a highly toxic metal, producing a broad range of adverse health effects, including nervous and reproductive system disorders, delays in neurological and physical development, cognitive and behavioral changes, and hypertension. Children are especially vulnerable to this problem, since most lead poisoned children do not appear to be sick. Childhood lead poisoning resulting from environmental exposures is estimated by the Centers for Disease Control (CDC) to affect 17 % of children from ages six months to six years. Preliminary results from blood lead screenings conducted in the State of Kansas indicate that these estimates are representative of the risk in Kansas.

There are many environmental sources of lead, including soil and dust contaminated by leaded gasoline, drinking water contaminated by lead plumbing, and lead-containing glazes on dishware, but the most preventable source of high-intensity exposures, is deteriorating lead-based paint. Such paint was widely used in residential and institutional structures before being restricted in 1978. The federal legislation requires the U.S. Environmental Protection Agency (EPA) and the U.S. Department of Housing and Urban Development (HUD) to develop comprehensive rules and regulations governing the abatement of lead-based paint in properties not managed by HUD. EPA is responsible for the development of a model accreditation program whereby individuals involved with lead-based paint inspection and abatement work must be trained and accredited. The objective of the lead certification program is to assure that lead abatement contractors use proper procedures, so as to prevent widespread lead contamination from abatement operations.

Energy & Natural Resources

The federal legislation also provides grant funds, administered through HUD, that can be used to abate private residences that have been identified at high risk of child lead exposure and that meet HUD income criteria requirements. Congress authorized \$125,000,000 for federal fiscal year 1993 and \$250,000,000 for federal fiscal year 1994 to implement the federal residential lead abatement program. Each state may be eligible for up to \$6,000,000 for qualifying projects. However, to be eligible for these funds, states must develop and implement a lead abatement certification program. This proposed legislation will provide KDHE with the necessary statutory authorities to implement a certification program that meets the criteria required to make Kansas eligible for U.S. HUD funds.

Currently, the Secretary of the Department of Health and Environment has authority under K.S.A. 65-5301 et.seq. the Asbestos Control Act, to license and certify individuals who engage in the removal and encapsulation of friable asbestos-containing materials. The lead certification requirements proposed by EPA, for individuals involved in lead-hazard detection and lead-hazard reduction activities are very similar to those of the asbestos certification program. Such requirements will include attending approved certification training, passing a written examination, and payment of any required certification fees. Building upon the success of the asbestos certification program, the agency has recommended revising existing statutes, in lieu of introducing new legislation.

The proposed legislation contains the following major provisions:

1. Establishes a dedicated lead-based paint hazard fee fund that will allow those fees collected from lead-based paint hazard activities to be utilized to fund the lead program.
2. Provides administrative authority for developing and implementing regulations to license and certify individuals who detect or abate lead-based paint hazards.
3. Provides authorities for developing and implementing regulations that would allow KDHE to review and approve training courses for individuals who would be responsible for the detection or abatement of lead-based paint hazards.
4. Clarifies authorities for KDHE to enter and inspect abatement projects and when violations are found, to require that appropriate corrective action be taken.

The first year funding for the lead certification program will be provided through a combination of direct and indirect federal EPA grant funds. EPA has advised that approximately ten million dollars in grant monies will be available nationwide to fund the development and implementation of state lead certification programs. The grant monies will be awarded by September 30, 1994, with the application deadline of May 1, 1994. EPA reports that the monies will be divided into two parts. Each state that submits a qualifying application will receive a minimum amount of \$100,000 from the EPA regional office. The second pool of EPA funds will be allocated competitively to states according to a formula designed to reflect each state's relative "lead burden". EPA defines lead burden as meaning: 1) the number of housing units

with lead-based paint; 2) the number of children under the age of seven; 3) the fraction of young children in poverty; and 4) the fraction of low-income housing units with lead-based paint. EPA has calculated that Kansas, utilizing 1990 census data, may be eligible for an additional grant of \$50,000 to \$90,000.

It is anticipated that the lead certification program will attract interest by at least 50 firms in licensing under the program, not including commercial painting, and renovation firms that may be involved in this work.

Attachments 1 and 2 to this testimony contain agency recommendations for two revisions to the bill. The first clarifies the types of abatement projects that are exempt from the licensing and certification requirements to assure that the general public is fully protected from any lead that might be released from this type of work. The second revision includes authority to exempt non-profit organizations from the licensing and certification requirements upon approval by KDHE provided that public health protection requirements are met.

Testimony presented by: Charles Jones
Director
Division of Environment
February 1, 1994

1 entity shall engage in an asbestos *abatement* project unless the entity
2 holds a license issued by the secretary for that purpose.

3 (b) Except as provided in this subsection, the provisions of this
4 act do not apply to a business entity which uses its own employees
5 in removing or encapsulating asbestos to perform an *abatement*
6 project for the purpose of renovating, maintaining or repairing its
7 own facilities. A business entity which is exempted from appli-
8 cability of the provisions of this act and which assigns an em-
9 ployee to remove or encapsulate asbestos shall provide noti-
10 fication to the secretary in the manner prescribed by the
11 secretary of their intent to conduct such activities and shall
12 provide training on the health and safety aspects of the removal
13 or encapsulation including the federal and state standards ap-
14 plicable to asbestos projects. The training program shall be
15 available for inspection, review and approval by the secretary.

16 Sec. 3. K.S.A. 65-5303 is hereby amended to read as follows:
17 65-5303. The secretary shall administer the provisions of this act. In
18 administering the provisions of this act, the secretary shall:

19 (a) Prescribe fees for the issuance and renewal of certificates and
20 licenses. The fees shall be based upon the amount of revenue de-
21 termined by the secretary to be required for proper administration
22 of the provisions of this act;

23 (b) conduct at least one on-site inspection annually of procedures
24 being utilized by a licensee for removing and encapsulating as-
25 bestes to perform *abatement* project activity during an actual as-
26 bestes *abatement* project;

27 (c) inspect and approve asbestos *abatement* project waste dis-
28 posal sites; and

29 (d) adopt rules and regulations necessary for the administration
30 of this act including, but not limited to, requirements, procedures
31 and standards relating to asbestos *abatement* projects as are nec-
32 essary to protect the public health and safety.

33 Sec. 4. K.S.A. 65-5304 is hereby amended to read as follows:
34 65-5304. In order to qualify for a license, a business entity shall:

35 (a) Ensure that each employee or agent of the business entity
36 who will come into contact with asbestos or who will engage in
37 an asbestos *abatement* project is certified;

38 (b) demonstrate to the satisfaction of the secretary that the busi-
39 ness entity is capable of complying with all applicable requirements,
40 procedures, standards of the United States environmental protection
41 agency and, the United States occupational safety and health ad-
42 ministration and the secretary;

43 (c) have access to at least one approved asbestos *abatement* pro-

, provided that such abatement projects do not cause,
or have the potential to cause, a lead-based paint
hazard to persons not directly associated with the
abatement project.

7-8

HB 2667

7

1 (c) Before any license or certificate is denied, suspended or re-
2 voked, the secretary shall conduct a hearing thereon in accordance
3 with the provisions of the Kansas administrative procedure act.

4 (d) Any individual person or business entity aggrieved by a de-
5 cision or order of the secretary may appeal the order or decision in
6 accordance with the provisions of the act for judicial review and civil
7 enforcement of agency actions.

8 (e) (1) If the secretary finds that the public health or safety is
9 endangered by the continuation of an *asbestos abatement* project,
10 the secretary may temporarily suspend, without notice or hearing
11 in accordance with the emergency adjudication procedures of the
12 provisions of the Kansas administrative procedure act, the license of
13 the business entity or the certificate of any person engaging in such
14 *asbestos abatement* project.

15 (2) In no case shall a temporary suspension of a license or cer-
16 tificate under this section be in effect for a period of time in excess
17 of 90 days. At the end of such period of time, the license or certificate
18 shall be reinstated unless the secretary has suspended or revoked
19 the license or certificate, after notice and hearing, or the license has
20 expired as otherwise provided under this act.

21 Sec. 11. K.S.A. 65-5311 is hereby amended to read as follows:
22 65-5311. (a) In an emergency that results from a sudden, unexpected
23 event that is not a planned renovation or demolition, the secretary
24 may waive the requirement for a license.

25 (b) The secretary may approve, on a case-by-case basis, an al-
26 ternative to a required public health protection procedure for an
27 *asbestos abatement* project if the business entity^{or state or political} |, non-profit organization
28 or taxing subdivision of the state submits a written description of
29 the alternative procedure to the secretary and demonstrates to the
30 satisfaction of the secretary that the proposed alternative procedure
31 provides equivalent protection.

32 (c) If a business entity^{or state or political or taxing subdivision} |, non-profit organization,
33 of the state is not primarily engaged in the removal or encapsu-
34 lation of *asbestos abatement projects*, the secretary may waive the
35 requirement for a license or employee certification if public health
36 protection requirements are met or an alternative procedure is ap-
37 proved under subsection (b).

38 Sec. 12. K.S.A. 65-5312 is hereby amended to read as follows:
39 65-5312. (a) No state agency or political or taxing subdivision of the
40 state shall accept a bid in connection with any *asbestos abatement*
41 project from a business entity which does not hold a license at the
42 time the bid is submitted.

43 (b) No state agency or political or taxing subdivision of the state

TESTIMONY
for
HOUSE ENERGY & NATURAL RESOURCES COMMITTEE

February 1, 1994

Mr. Chairman and Members of the Committee:

My name is Janet Stubbs appearing today on behalf of the Kansas Building Industry today to express our concern with the very broad authority this legislation is giving to the staff of the Secretary of Health & Environment under HB 2667. For the Legislature to approve such a measure would give the Department of Health & Environment the authority to promulgate rules and regulations which go far beyond that which is required by Federal regulators and increase the cost of remodeling significantly, thus preventing the ability of some owners to do the project.

HUD estimates that the cost of covering all lead paint in the 57 million private dwellings with lead paint at \$363 billion and the cost of removing it at \$499 billion. The average per unit cost of abatement is \$5,453 for encapsulation and \$7,700 for removal. In 4.7 and 9.2 percent of units, respectively, the cost exceeds \$25,000.

Interior and exterior lead dust from deteriorated lead paint and past fallout from leaded gasoline emissions, is the most significant source of lead exposure in children. Intact lead paint has not been shown to be an immediate hazard to children. However, when the lead paint is chipping, peeling, or flaking, or becomes dust through sawing, dry sanding, and dry scraping, the hazard is immediate. Public and private resources should be directed to in-place management efforts. Removal of intact paint should be a low priority due to limited resources and the fact that it poses little risk.

In the areas of greatest need, older inner city properties, the cost to abate will often exceed the owner's equity and sometimes even the entire value of the property. Abatement requirements could lead to abandonment of property.

Questions arise as to who will pay for the abatement? Can Federal, State and Local government afford these costs? Government cannot afford the billions required for public housing and FHA and VA properties upon which foreclosure has taken place, let alone to potential sum of one-half trillion for the private sector.

How far does the State of Kansas intend to go with this mandate? We urge you not to permit requirements for the removal of intact lead paint. Instead, the focus should be on in-place management, repair of defective paint, removal of dust, and maintenance of ground cover in high traffic urban areas where children play.

These are very brief remarks due to the material being forwarded by our National office not arriving. I would request permission to supply the committee with additional information received which may be deemed pertinent.
