

Approved: 3-11-99
Date

MINUTES OF THE HOUSE COMMITTEE ON ENVIRONMENT

The meeting was called to order by Chairperson Joann Freeborn at 3:30 p.m. on February 4, 1999 in Room 423-S of the Capitol.

All members were present except:

Committee staff present: Raney Gilliland, Legislative Research Department
Mary Ann Graham, Committee Secretary

Conferees appearing before the committee: Maurice Korphage, Director, Conservation Division, Kansas Corporation Commission, 130 S Market Rm 2078, Wichita, KS 67202
Thomas Stiles, Section Chief, Planning and Prevention, KDHE, Forbes Field, Bldg 283, Topeka, KS 66620-0001
Bill Bider, Director, Bureau Waste Management, KDHE, Forbes Field, Bldg 740, Topeka, KS 66620-0001

Others attending: See attached list

Chairperson Joann Freeborn called the meeting to order at 3:30 p.m. She asked if there was a motion to approve minutes of the January 21 and 26 meetings.

Rep. Tom Sloan made a motion the minutes be approved. Rep. Ted Powers seconded the motion. Motion carried.

The Chairperson reviewed the agenda for next week, meetings for February 9 and 11. On Tuesday, February 9, a review of 1998 Kansas Livestock Waste Management Program by Dr. Ronald Hammerschmidt, Director, Div. of Environment, KDHE and Greg Foley, Section Chief, Livestock Management Section, KDHE. On Thursday, February 11, a review by Kansas State University on findings relating to 1998 HB2950 and a report on Lagoon Study by Dr. Jay Ham, Kansas State University.

Chairperson Freeborn welcomed Maurice Korphage, Director, Conservation Division, KCC. He briefed the committee on the Remediation Site Status report (See attachment 1) and the Abandoned Oil and Gas Well Status report. (See attachment 2) During the 1996 legislative session House Substitute for Senate Bill 755 was passed. A part of this legislation created an abandoned Oil and Gas Well/Remediation Fund the expressed purpose of which was to provide funding to the Kansas Corporation Commission with which to both plug abandoned wells and remediate contamination sites related to oil and gas activities. The legislation requires that the KCC prepare an annual Remediation Site Status report for the office of the Governor and certain legislative committees. The legislation also requires that the commission prepare and maintain an inventory of all abandoned wells with a special focus on wells which, the state of Kansas has assumed the plugging liability because of the lack of a potentially responsible party; and pose an ongoing or potential threat to the environment. Mr. Korphage also used over head views for the briefing. Questions and discussion followed.

Chairperson Freeborn welcomed Thomas Stiles, Section Chief, Planning and Prevention, KDHE. He briefed the committee, with the use of slides, on Total Maximum Daily Loads, a water quality approach to protecting and restoring water resources in Kansas. (See attachment 3) Total Maximum Daily Loads is the maximum amount of pollution a water could receive without violating water quality standards or impairing the designated uses of that water. Questions and discussion followed.

The Chairperson opened the hearing on HB2145:

HB2145: An act concerning solid waste; relating to certain permits; amending K.S.A. 1998 Supp. 65-3407 and repealing the existing section.

CONTINUATION SHEET

MINUTES OF THE HOUSE COMMITTEE ON ENVIRONMENT, Room 423-S Statehouse, at 3:30 p.m.
on February 4, 1999

Raney Gilliland, Legislative Research Department, explained the bill.

Chairperson Freeborn welcomed Bill Bider, Director, Bureau of Waste Management, KDHE. Mr. Bider appeared in support of the bill. (See attachment 4) Two changes to the solid waste law are recommended in the bill to improve the permitting provisions set forth in K.S.A 65-3407. The first change involves the transfer of certain landfill permits. The second change addresses land ownership for certain types of landfills. Since drafting the bill, KDHE has identified the need for an additional minor wording change in the suggested amendments. This change is addressed in the attached balloon. (See attachment 5) Questions and discussion followed.

Chairperson Freeborn closed the hearing on HB2145. She thanked the guests for their presentations and Mr. Bider for appearing.

The meeting adjourned at 5:30 p.m.

The next meeting is scheduled for February 9, 1999.

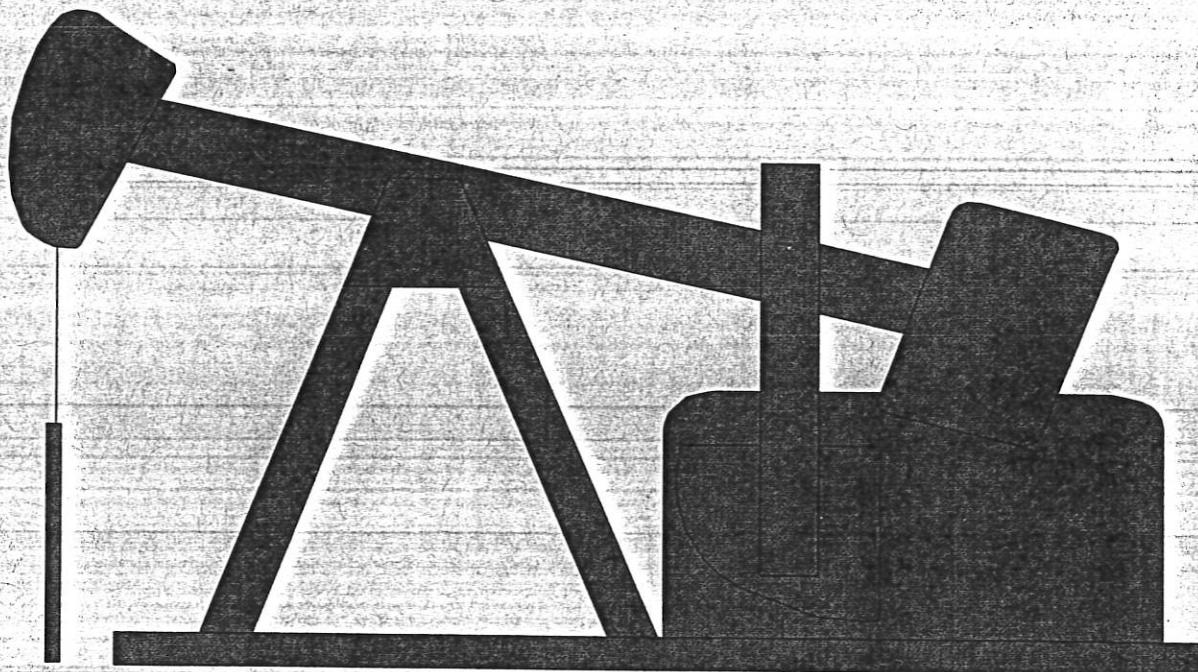

HOUSE ENVIRONMENT COMMITTEE GUEST LIST

DATE: February 4, 1999

KANSAS CORPORATION COMMISSION CONSERVATION DIVISION

REMEDIATION SITE STATUS REPORT

JANUARY 11, 1999

REF: ABANDONED OIL AND GAS WELL / REMEDIATION SITE FUND

*House Environment
2-4-99
Attachment 1*

**Abandoned Oil and Gas Well / Remediation Site Fund
Remediation Sites
Status Report**

Introduction

During the 1996 legislative session House Substitute for Senate Bill 755 was passed. A part of this legislation created an Abandoned Oil and Gas Well / Remediation Fund the expressed purpose of which was to provide funding to the Kansas Corporation Commission with which to both plug abandoned wells and remediate contamination sites related to oil and gas activities. The legislation requires that the Kansas Corporation Commission prepare an annual Remediation Site Status Report for the office of the Governor and certain legislative committees. This report for the period January 1, 1998 through December 31, 1998 contains information for each of the sites with regard to the following: (1) A description and evaluation of the site; (2) the immediacy of the threat to public health and environment; (3) the level of remediation sought; (4) any unusual problems associated with the investigation or remediation; (5) any remedial efforts completed during the review period; (6) current contaminant level; (7) status of the site; (8) direct and indirect costs associated with remedial efforts; and (9) an estimate of the cost to achieve the recommended level of remediation or an estimate of the cost to conduct an investigation sufficient to determine the cost of remediation.

Site Inventory

The inventory of sites listed in the current Remediation Site Status Report consists of 97 sites. This report includes sites that were transferred to the control of the Kansas Corporation Commission (KCC) from the Kansas Department of Health and Environment (KDHE) by legislative action in 1995 and in-house sites already under KCC jurisdiction. Of the original 109 sites, four were combined with other sites and eight were resolved during the initial evaluation period. The previous evaluation period showed nine sites resolved. During this evaluation period, January 1, 1998 through December 31, 1998, nine sites were added and four sites were resolved, resulting in a total of 93 active sites. Summary tables for site impacts and immediacy levels as well as estimated costs are found at the beginning of the report. The tables below provide an overview of distribution of sites with respect to both resources impacted and the range of immediacy levels for required remediation.

Distribution of Sites with Respect to Impacted Resources

Impacted Resources	Number of Sites
Public Water Supply	8
Domestic Supply	40
Stock Supply	18
Irrigation Supply	10
Other	129

*Some sites have impacts to multiple resources

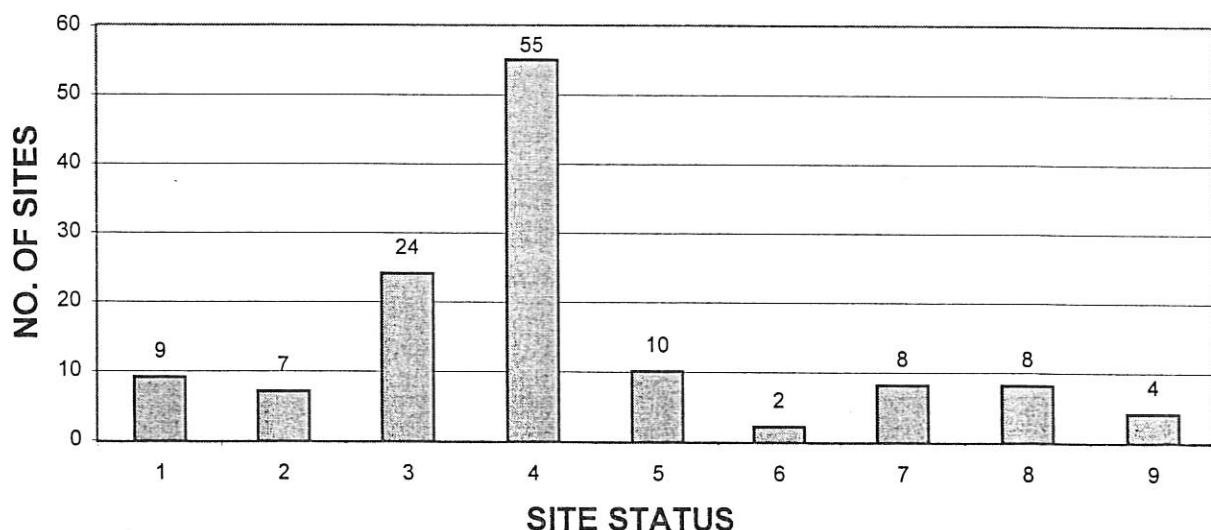

Distribution of Sites with Respect to Immediacy Levels

Range of Immediacy Level	No. of Sites
Low & Low to Moderate	58
Moderate	13
Moderate to High & High	14
Other (Under Remediation)	8
Total	93

Site Status

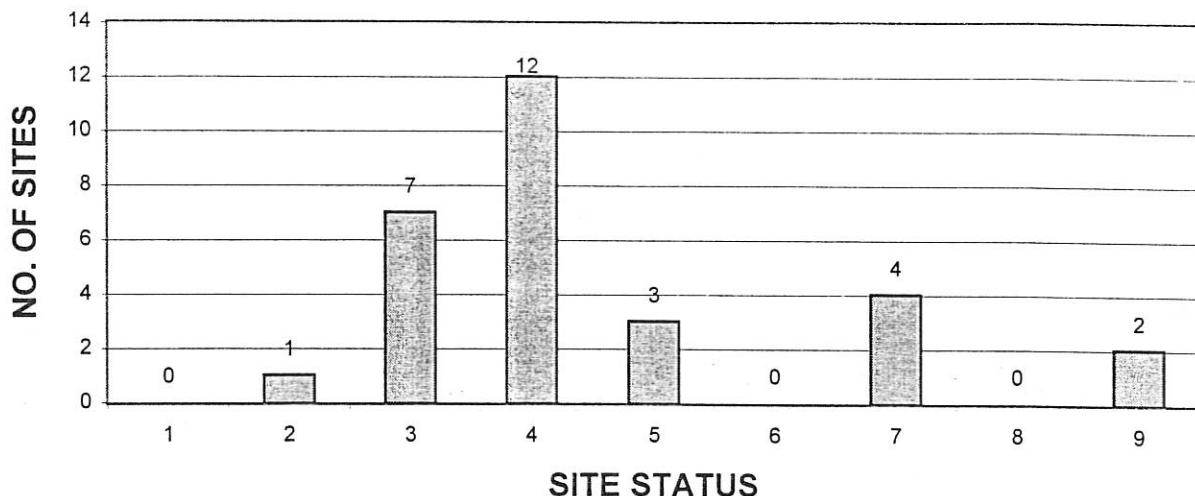

In general each contamination site has a definable life cycle. This cycle follows a sequence of investigatory and remedial activities which move the site towards ultimate resolution. The first phase of the cycle is the site assessment. This phase defines general site parameters and conditions that form the basis for additional efforts at the site. Once the assessment is complete the site moves on to a new phase. This next phase may be short term or long term monitoring followed closely by resolution of the site. While another scenario may include an extensive investigation phase followed by the installation of a monitoring system whose sample results may indicate the necessity for certain remedial activities and additional post remediation monitoring prior to resolution of the site. The following graphs depict the current status of the 93 active sites on a statewide and K.C.C. District basis.

STATEWIDE DISTRIBUTION OF SITES BY STATUS

NUMBER OF SITES RESOLVED (CUMMULATIVE)

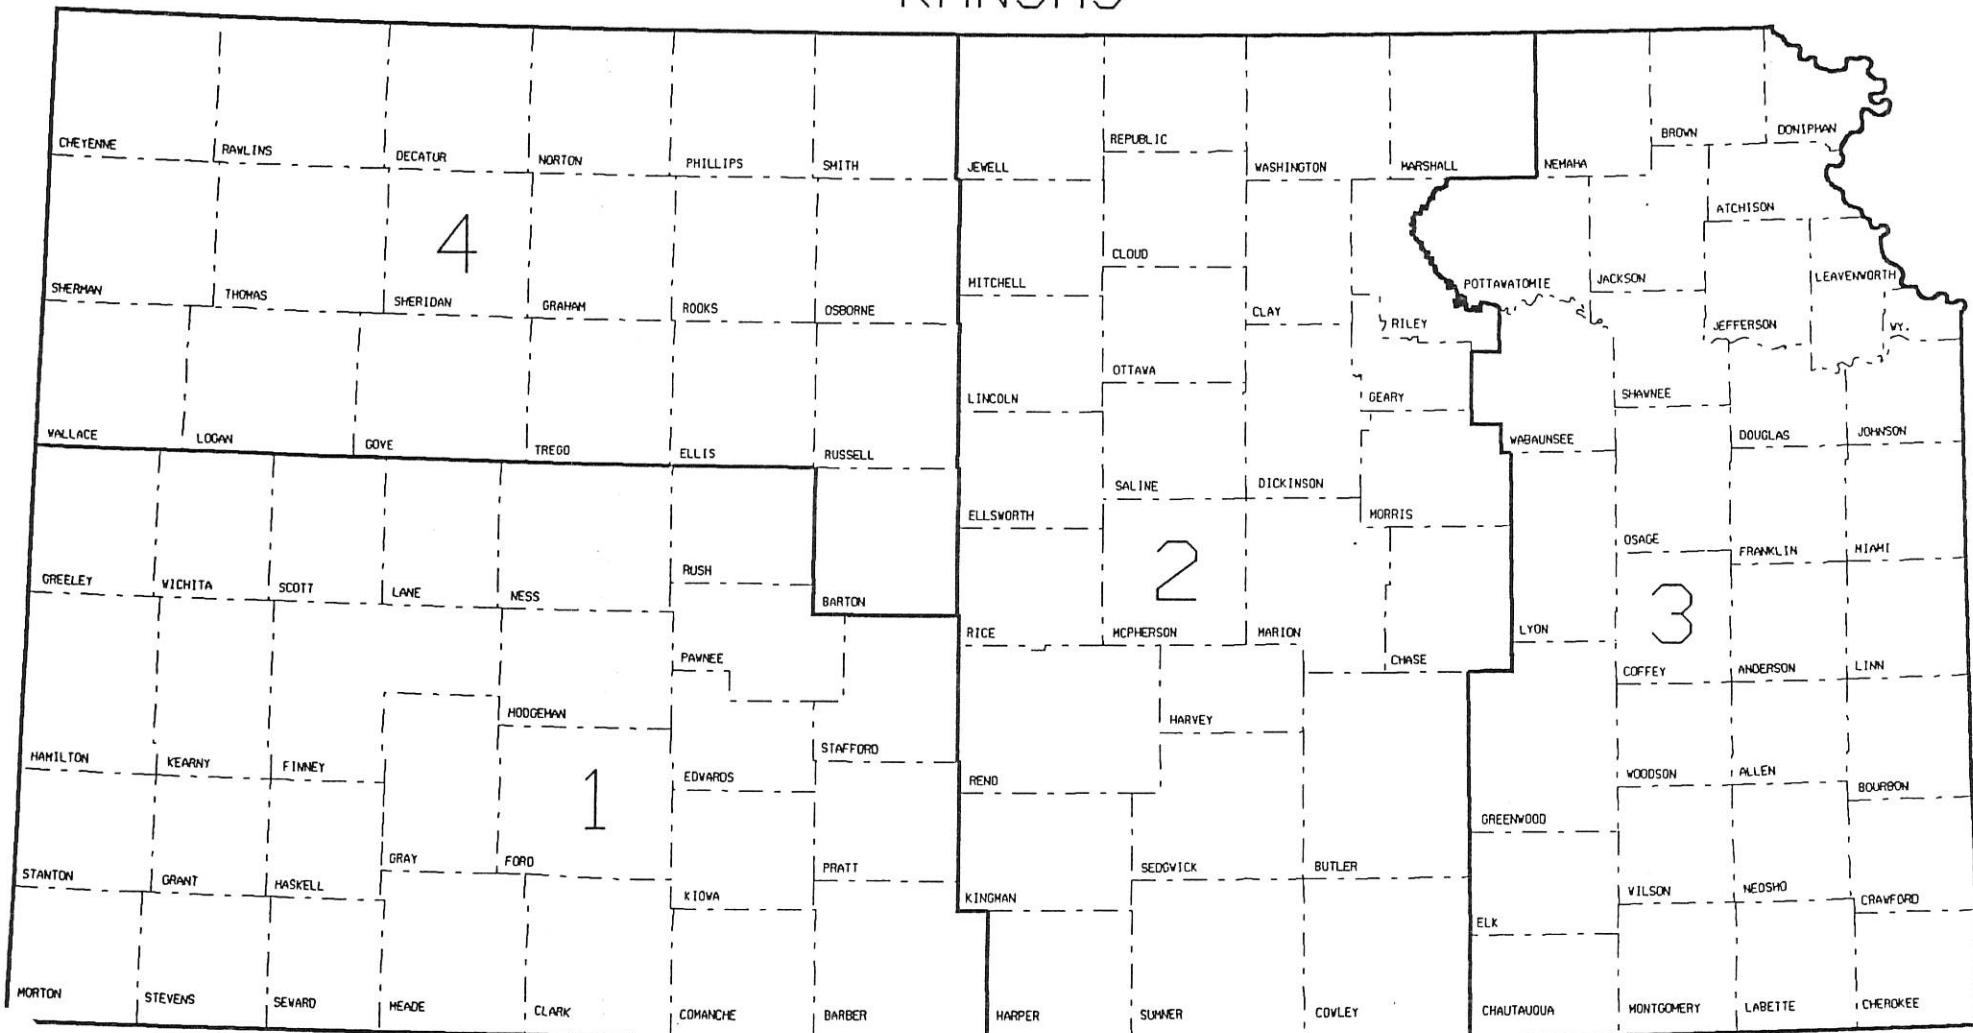

Conclusions

This report provides information concerning the location, resource impact, immediacy level, and site description and status for 93 active contamination / remediation sites related to exploration and production activities in the state. In addition, data is presented with regard to staff expenditures for site management, administration, and inspections, as well as authorization and/or expenditures against the Abandoned Well / Remediation fund for investigatory and remedial activities at the sites.

The Conservation Division of the Kansas Corporation Commission is committed to working with the oil and gas industry of the state, as well as other resource stakeholders within government and the public in general to provide a scientifically sound and technically based remediation program.

CONSERVATION DIVISION DISTRICTS KANSAS

KANSAS CORPORATION COMMISSION CONSERVATION DIVISION

ABANDONED OIL & GAS WELL STATUS REPORT

JANUARY 11, 1999

REF: ABANDONED OIL AND GAS WELL / REMEDIATION SITE FUND

House Environment
2-4-99
Attachment 2

Abandoned Exploration and Production Wells

Introduction

During the 1996 legislative session House Substitute for Senate Bill 755 was passed. As a result of that legislation the Abandoned Oil and Gas Well / Remediation Fund was created for the expressed purpose of providing funding to the Kansas Corporation Commission with which to address the problem of abandoned exploration and production wells located within the state. The legislation requires in part that the Commission prepare and maintain an inventory of all abandoned wells with a special focus on wells which, (1) the State of Kansas has assumed the plugging liability because of the lack of a potentially responsible party (No PRP); and, (2) pose either an ongoing or potential threat to the environment (Priority I). The Commission was further directed to develop and maintain such an inventory on a computer database and report to the office of the Governor and certain legislative committees the status of the inventory as well as the Commission's efforts towards plugging those wells which pose a threat to the public safety and / or environment.

Computer Database / Data Collection

The database application used in the inventory tracking system is a Microsoft Access package on a PC based platform. Field data is collected on site in the four District Field areas. It is then entered into the system where it can be used to create a variety of reports concerning the wells. The amount of information on each well is extremely variable and is primarily dependent on the location of the well and its age. Those wells located in the Eastern portion of the state are in general older wells and there is very little detailed information available from industry or historical Commission files.

Priority Ranking (Priority I)

Wells within the Priority I grouping have been further subdivided on the basis of resources impacted by the location or condition of the individual abandoned well. That is whether the impacts are to surface waters (SW), groundwater (GW), or concern public safety issues (PS). The listing below provides definitions for Priority Action Levels within the Priority I inventory. In general, Level "A" wells are the most serious cases while Level "C" wells are less serious situations.

Priority Action Levels

Level A – Surface Water (SW)

Wells actively discharging oil or brine into surface waters with significant ongoing impacts to surface water. (Includes wells with moderate to high volumes of discharge impacting public water supplies or sole source water supplies.)

Abandoned Wells
Page 2

Level A – Groundwater (GW)

Wells creating significant ongoing or potential impacts to groundwater supplies through water quality degradation or loss of water supplies through downward drainage. (With emphasis on impacts to groundwater supplies used for public water supplies or sole source supplies and cases of active subsidence caused by downward drainage.)

Level A – Public Safety (PS)

Wells creating an ongoing or current threat to public safety. (Includes wells with active gas flows with danger of explosion or open large diameter wellbores or casings in urban or suburban settings.)

Level B – Surface Water (SW)

Wells intermittently to actively discharging oil or brine into surface waters with ongoing impacts to surface water. (Includes wells with low to moderate volumes of discharge impacting water resources outside of public water supplies. Alternative water supplies available.)

Level B – Groundwater (GW)

Wells creating ongoing or potential impacts to groundwater supplies through water quality degradation or loss of water supplies through downward drainage. (Includes wells with impacts to groundwater supplies outside of public water supply areas and cases of strong potential for subsidence.)

Level B – Public Safety (PS)

Wells creating a current or ongoing threat or potential danger to public safety. (Includes wells with active gas flows with danger of explosion and/or open large diameter wellbores or casings located in rural, low population areas.)

Level C – Surface Water (SW)

Wells located in sensitive groundwater areas, which are intermittently discharging oil and/or brine or have potential for discharge into surface waters. (Includes wells located in sensitive groundwater areas, which have low volume to intermittent discharges or high fluid levels.)

Level C – Groundwater (GW)

Wells located in sensitive groundwater areas which have potential impacts to groundwater supplies or loss of water resources through downward drainage. (Includes wells located in sensitive groundwater areas with abnormally high fluid levels.)

Level C – Public Safety (PS)

Wells creating a potential danger to public safety. (Includes secured gas wells in populated areas or large diameter wells in isolated settings.)

Abandoned Wells

Page 3

Priority Ranking (Priority II)

Wells within the Priority II grouping consist of wells of relatively modern construction which do not pose either an ongoing or potential threat to the public safety or the environment. These wells have adequate surface pipe in place with which to protect shallow freshwater aquifers and are generally located in environmentally non-sensitive areas. These wells fall within the lowest priority ranking for authorization of plugging with Abandoned Oil and Gas Well / Remediation Fund monies. It is important that these wells be documented within the inventory and periodically inspected to determine if well conditions have changed to a sufficient degree to warrant upgrading to Priority I status.

Status of the Inventory

The current status of the abandoned oil and gas well inventory stands at 11,427 wells. This total which includes both Priority I and Priority II wells represents a total increase of 854 wells over that reported in January 1998. This increase represents the addition of 822 Priority I wells and 32 Priority II wells to the inventory. The original estimate of wells fitting the criteria of Priority I ranking with no potential responsible party available to fund plugging operations was in excess of 14,750 wells. The field staff has of the date of this report checked and verified 10,751 of these types of wells. As a percentage of the original estimate the statewide inventory is approximately 73% complete. The accompanying map and diagrams provide an overview of the data collected with respect to Priority I severity levels and impacts on both a statewide basis and within individual field areas. The tables below summarize this data.

PRIORITY 1 WELLS

District	Level A	Level B	Level C	Total
1	7	7	31	45
2	83	36	60	179
3	1565	2142	6387	10094

4	347	1	348
Totals	9301	659	9960

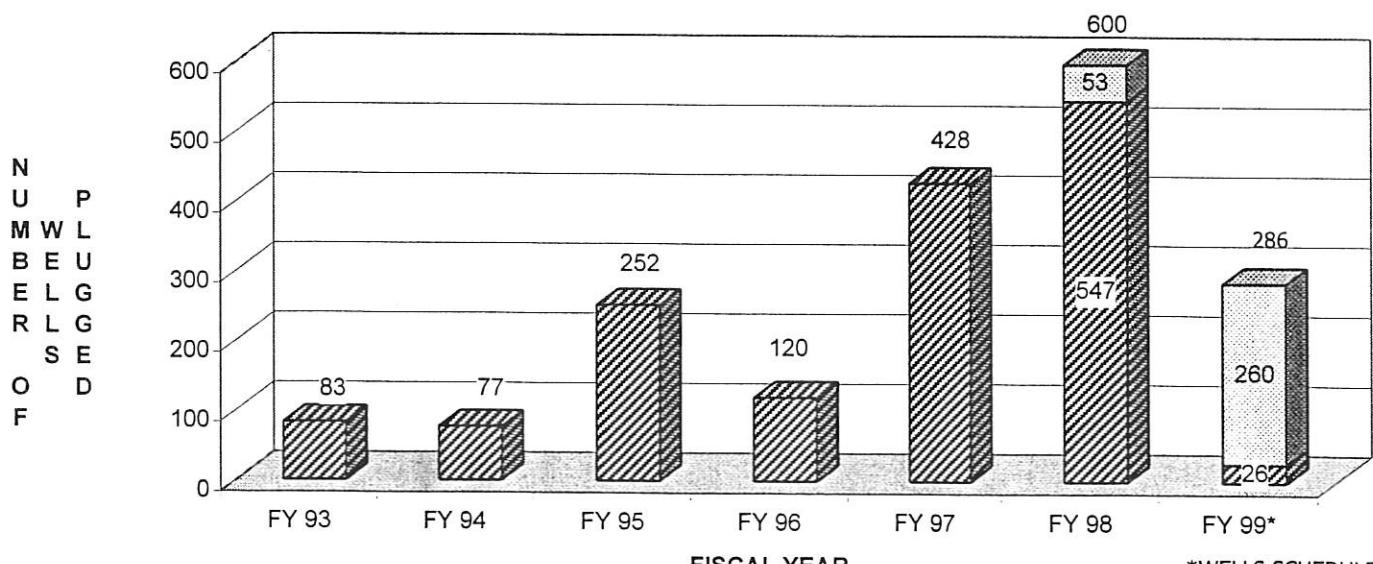

PRIORITY 1 WELLS BY POLLUTION LEVEL - REQUIRING ACTION

District	Level A	Level B	Level C	Total
1	3	0	7	10
2	42	30	45	117
3	683	1879	6265	8827
4	77	128	142	347
Totals	805	2037	6459	9301

It should be emphasized that this inventory is an ongoing and active system that is currently being updated on a weekly basis. While certain trends can be recognized within the system, specific well data must be considered as part of a dynamic process and subject to change as the inventory proceeds.

The complete inventory of individual wells awaiting plugging authorization is provided in Appendix A and B of this report. The wells in these listings show the following data for each well: Priority Level, Lease Name, Well Number, District, County, Spot Location, Section, Township, Range, and Impact. Appendix C provides data for wells which have either been plugged or have been approved for plugging with expenditures from the Abandoned Oil and Gas Well / Remediation Fund. An accounting of approved expenditures to date is also enclosed within this section. The number of wells plugged has increased significantly since the inception of the Abandoned Oil and Gas Well / Remediation Fund. The graph below summarizes this data:

*A Water Quality
Approach To
Protecting And
Restoring Water
Resources In
Kansas*

Kansas Department of
Health and Environment
Building 283, Forbes Field
Topeka, KS 66620

January, 1999

House Environment
2-4-99
Attachment 3

Introduction

**What
does
TMDL
mean?**

TMDL is short for:

- >Total Maximum Daily Load.
 - TMDL is the maximum amount of pollution a water could receive without violating water quality standards or impairing the designated uses of that water.

What does TMDL mean?

1

Introduction

What is a *TMDL*?

A Total Maximum Daily Load (TMDL) involves:

- Quantitative assessment of water quality problems and contributing pollutant sources.
 - A strategic plan for implementing State water quality standards.
 - Establishing a goal for pollution reduction and achieving water quality standards.

What is a TMDL?

2

Introduction

What does a *TMDL* do?

A TMDL:

- Specifies the amount a pollutant needs to be reduced to meet water quality standards.
 - Assigns responsibility for pollutant load reductions among pollutant sources in a watershed.
 - Provides the basis for taking actions needed to restore a waterbody.

What does a TMDL do?

3

What is the goal of a TMDL?

Introduction

The ultimate goal of a TMDL is:

- The attainment of water quality standards in a waterbody that has seen persistent violations, leaving those waters in an impaired state.

What is the goal of a TMDL?

4

Background

Who established the TMDL process?

The TMDL process:

- Is established by Section 303(d) of the Clean Water Act.
 - Focuses on identifying and restoring the Nation's polluted waterbodies.
 - Responsibility for conducting the TMDL process lies with the States.

Who established the TMDL process?

5

Background

What are the requirements of the TMDL process?

Under Section 303(d) of the Clean Water Act, States are required to:

- Identify and list waterbodies where State water quality standards are not being met following the technology-based point source pollution controls, effluent limitations and best management practices.
 - Establish TMDLs for these waters.
 - EPA must review and approve State lists and TMDLs. If State actions are not adequate, EPA must prepare lists and TMDLs.

What are the requirements of the TMDL

6

Water Quality-Based Approach To Pollution Control

- The water quality-based approach emphasizes the overall quality of water within a waterbody and the influences on its quality by sources within its watershed.
 - Previous practices for implementing Clean Water Act Section 303(d) have focused primarily on *point* sources and wasteload allocations.
 - Nonpoint sources must also be addressed over large geographic areas.

Water quality-based approach to pollution 7

7

Definitions Associated With TMDLs

- >Loading Capacity (LC)
The greatest amount of loading that a water body can receive without violating water quality standards. Equivalent to a TMDL.
 - >Total Maximum Daily Load (TMDL)
The total loading capacity of a waterbody composed of WLAs, LAs, and MOS.
 - Margin of Safety (MOS)
A component of TMDL that accounts for the uncertainty about the relationship between the pollutant loads and the quality of the receiving waterbody. MOS normally reduces the allowable pollutant loads which may enter a waterbody.

Definitions associated with TMDLs

8

Definitions Associated With TMDLs

- Water Quality-Limited Segments
 - Those water segments that do not or are not expected to meet applicable water quality standards even after the application of technology-based effluent limitations, other technology-based controls, and best management practices.
 - Waters need TMDLs when certain specified pollution reduction requirements are not stringent enough to implement water quality standards for such waters.

9

Definitions Associated With TMDLs

⌚ Wasteload Allocation (WLA)

The portion of a receiving water's pollutant loading that is attributed to existing or future point sources of pollution.

⌚ Load Allocation (LA)

The portion of a receiving water's loading that is attributed to existing or future nonpoint sources of pollution or to background sources.

10

Definitions Associated With TMDLs

⌚ Point Source

Pollution that can clearly identified as a discharge from a pipe, ditch, or other well-defined source.

⌚ National Pollutant Discharge Elimination System Permit (NPDES)

A permit to regulate and limit the amount of pollutants which may be discharged by a point source.

Definitions associated with TMDLs

11

Definitions Associated With TMDLs

⌚ Nonpoint Source

Water pollution associated with runoff or snowmelt from numerous, dispersed sources over an extended area.

⌚ Best Management Practices (BMPs)

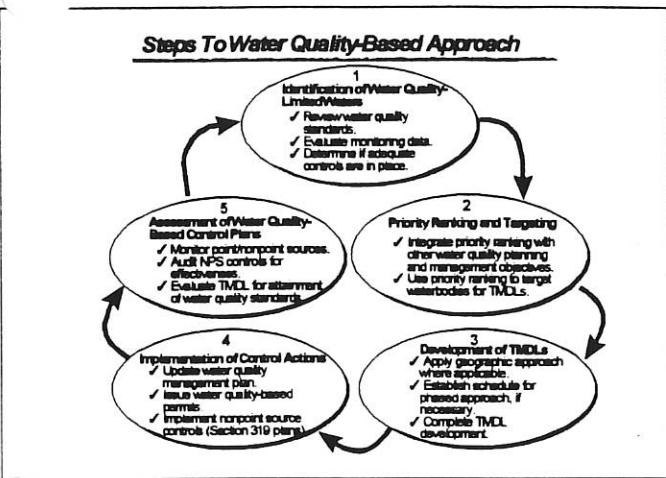

Schedules of activities, prohibitions of practices, maintenance procedures, and other management practices to prevent or reduce the pollution of waters of the State.

⌚ Background Source

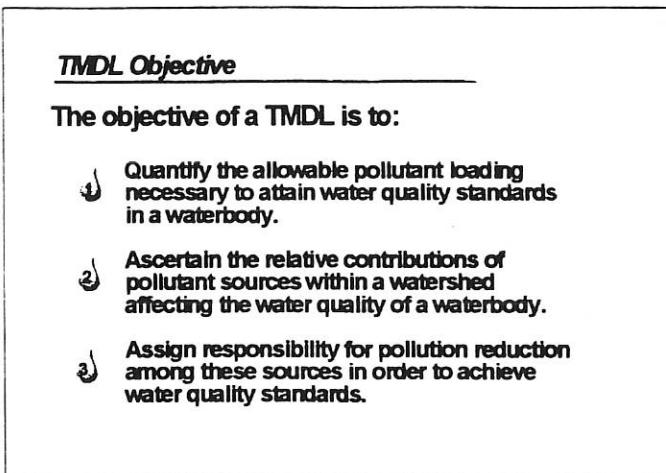

Natural occurring elements associated with a waterbody.

Definitions associated with TMDLs

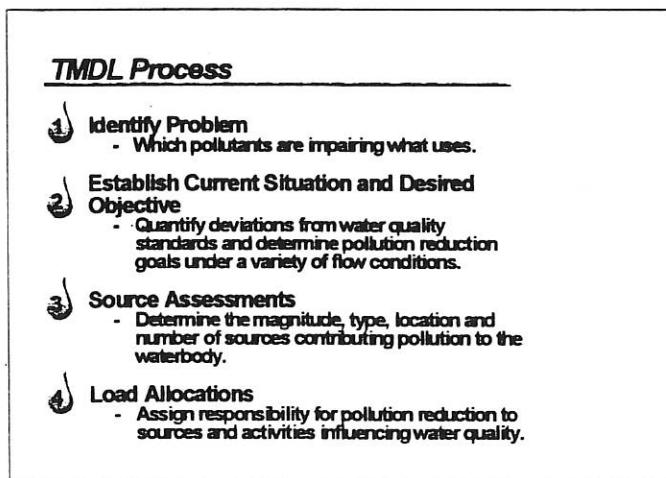

12

The 303(d) process for water quality control 13

14

TMDL process

15

TMDL Process

- Implementation
 - Targeted corrective actions by point and nonpoint sources to reduce pollution contributions from these sources.
 - Monitoring
 - Evaluate impact of implementation on achieving TMDL goal, reduce uncertainty in water quality conditions.
 - Feedback
 - Modify TMDL goals and implementation activities based on monitored results.

TMDL process

16

Kansas TMDL Court Decree

- 1 Establish TMDLs in the 12 river basins between 1999 - 2006.
 - 2 Submit TMDLs for the Kansas - Lower Republican Basin by June 30, 1999.
 - 3 Sequence of submittals will be 1 basin - 2 basins - 1 basin... over the 8 years.

4 Each submittal due at EPA by June 30 of that year.

Kansas TMDL Court Decree

17

Kansas TMDL Court Decree

- 5 TMDLs are for streams and lakes .
 - 6 TMDLs may be done on watershed basis.
 - 7 TMDLs may be pollutant - based or use biomonitoring.

If Kansas does not submit TMDLs, EPA must establish TMDLs.

KANSAS
DEPARTMENT OF HEALTH & ENVIRONMENT
BILL GRAVES, GOVERNOR
Clyde D. Graeber, Acting Secretary

Testimony presented to

House Environment Committee

February 4, 1999

by

William L. Bider, Director, Bureau of Waste Management
Kansas Department of Health and Environment

House Bill 2145

Thank you for this opportunity to provide testimony in support of House Bill 2145 which was introduced by KDHE. The need for this bill became known over the past few years as circumstances arose related to solid waste landfill permitting.

Two changes to the solid waste law are recommended in this bill to improve the permitting provisions set forth in K.S.A. 65-3407. The first change involves the transfer of certain landfill permits. The second change addresses land ownership for certain types of landfills. Since drafting the bill, KDHE has identified the need for an additional minor wording change in the suggested amendments. This change is addressed in the attached "balloon" and discussed below.

Transfer of Certain Landfill Permits

Current state law prohibits the transfer of all solid waste permits. This provision was added to the solid waste statutes to minimize the possibility that a company could buy a Kansas landfill and convert it to a major regional or national landfill without ensuring that such a change was consistent with the county solid waste management plan. This bill would allow landfill permits to be transferred in very limited cases. The allowable scenarios could not result in the conversion of the transferred permit into a large landfill which serves areas outside of the affected county.

The only types of landfill permits which would be transferrable are for facilities which receive only waste which is generated on-site. This could be construction and demolition waste or industrial process waste. The only allowable change in the permit would be a name change caused by a company merger, acquisition, sale, or corporate restructuring. The types and amounts of waste which enter the landfill would not change.

ATTACHMENT 4

February 4, 1999

Page 2

This new provision would allow for smoother business transactions because the on-site landfill could be transferred with the other business assets. There would be no need to carry out the time-consuming landfill permitting process with the possibility that a period of time would occur when no active permit existed for the on-site landfill. The elimination of this requirement also saves both the new and old companies money and staff time by not having to complete the permitting process.

Land Ownership for Certain New Landfills

Current state law does not require landfill permit holders to own the land on which they operate their landfill. KDHE has discovered that several old, and mostly small, municipal solid waste landfills are operated by permit holders on leased land. Despite not needing to own the land, state law does require the permit holder to be responsible for the long-term care of the site for at least 30 years after closing the landfill. A permittee who does not own the land could abandon the site and leave post-closure responsibilities to the landowner, who is usually a farmer or rancher without the resources or expertise to properly care for the site.

To avoid innocent landowner and state liability, KDHE recommends adding a requirement to the law for permit applicants to own the land where they intend to operate landfills which have long-term post-closure liabilities. This requirement would be applied to all applications received after July 1, 1999 for new municipal solid waste landfills and new industrial landfills which have leachate collection systems, gas collection systems, or groundwater monitoring networks. The requirement would not be retroactively applied to existing landfills or horizontal expansions of old landfills onto leased property, if the existing landfills are on leased property. An amendment to the initial bill is needed to clarify that this requirement does not apply to such horizontal expansions. The attached balloon shows this change.

Another factor related to land ownership is that federal and state groundwater monitoring regulations require that the permit holder "own" the property where their required monitoring wells are located. Wells must also be located on the permitted site, so the landfill property must be owned to comply with this regulation. This change in the statute will make the law and regulation consistent. KDHE proposes to maintain a variance to this regulation for the old landfills which were started on leased property long before this regulation was adopted.

If landfill permit holders are required to own the land where they operate their landfill, they will have greater incentives to care for the property to minimize their long-term liabilities and to maximize the value of the property after closure.

KDHE appreciates this opportunity to provide testimony in support of HB 2145.

Session of 1999

HOUSE BILL No. 2145
By Committee on Environment
1-27

9 AN ACT concerning solid waste; relating to certain permits; amending
10 K.S.A. 1998 Supp. 65-3407 and repealing the existing section.
11

12 *Be it enacted by the Legislature of the State of Kansas:*

13 Section 1. K.S.A. 1998 Supp. 65-3407 is hereby amended to read as
14 follows: 65-3407. (a) Except as otherwise provided by K.S.A. 1998 Supp.
15 65-3407c and amendments thereto, no person shall construct, alter or
16 operate a solid waste processing facility or a solid waste disposal area of
17 a solid waste management system, except for clean rubble disposal sites,
18 without first obtaining a permit from the secretary.

19 (b) Every person desiring to obtain a permit to construct, alter or
20 operate a solid waste processing facility or disposal area shall make ap-
21 plication for such a permit on forms provided for such purpose by the
22 rules and regulations of the secretary and shall provide the secretary with
23 such information as necessary to show that the facility or area will comply
24 with the purpose of this act. Upon receipt of any application and payment
25 of the application fee, the secretary, with advice and counsel from the
26 local health authorities and the county commission, shall make an inves-
27 tigation of the proposed solid waste processing facility or disposal area
28 and determine whether it complies with the provisions of this act and any
29 rules and regulations and standards adopted thereunder. The secretary
30 also may consider the need for the facility or area in conjunction with the
31 county or regional solid waste management plan. If the investigation re-
32 veals that the facility or area conforms with the provisions of the act and
33 the rules and regulations and standards adopted thereunder, the secretary
34 shall approve the application and shall issue a permit for the operation of
35 each solid waste processing or disposal facility or area set forth in the
36 application. If the facility or area fails to meet the rules and regulations
37 and standards required by this act the secretary shall issue a report to the
38 applicant stating the deficiencies in the application. The secretary may
39 issue temporary permits conditioned upon corrections of construction
40 methods being completed and implemented.

41 (c) Before reviewing any application for permit, the secretary shall
42 conduct a background investigation of the applicant. The secretary shall
43 consider the financial, technical and management capabilities of the ap-

House Environment
2-4-99
Attachment 5

1 plicant as conditions for issuance of a permit. The secretary may reject
2 the application prior to conducting an investigation into the merits of the
3 application if the secretary finds that:

4 (1) The applicant currently holds, or in the past has held, a permit
5 under this section and while the applicant held a permit under this section
6 the applicant violated a provision of subsection (a) of K.S.A. 65-3409, and
7 amendments thereto; or

8 (2) the applicant previously held a permit under this section and that
9 permit was revoked by the secretary; or

10 (3) the applicant failed or continues to fail to comply with any of the
11 provisions of the air, water or waste statutes, including rules and regula-
12 tions issued thereunder, relating to environmental protection or to the
13 protection of public health in this or any other state or the federal gov-
14 ernment of the United States, or any condition of any permit or license
15 issued by the secretary; or if the secretary finds that the applicant has
16 shown a lack of ability or intention to comply with any provision of any
17 law referred to in this subsection or any rule and regulation or order or
18 permit issued pursuant to any such law as indicated by past or continuing
19 violations; or

20 (4) the applicant is a corporation and any principal, shareholder, or
21 other person capable of exercising total or partial control of such corpo-
22 ration could be determined ineligible to receive a permit pursuant to
23 subsection (c)(1), (2) or (3) above.

24 (d) Before reviewing any application for a permit, the secretary may
25 request that the attorney general perform a comprehensive criminal back-
26 ground investigation of the applicant; or in the case of a corporate appli-
27 cant, any principal, shareholder or other person capable of exercising total
28 or partial control of the corporation. The secretary may reject the appli-
29 cation prior to conducting an investigation into the merits of the appli-
30 cation if the secretary finds that serious criminal violations have been
31 committed by the applicant or a principal of the corporation.

32 (e) The fees for a solid waste processing or disposal permit shall be
33 established by rules and regulations adopted by the secretary. The fee for
34 the application and original permit shall not exceed \$5,000. The annual
35 permit renewal fee shall not exceed \$2,000. No refund shall be made in
36 case of revocation. In establishing fees for a construction and demolition
37 landfill, the secretary shall adopt a differential fee schedule based upon
38 the volume of construction and demolition waste to be disposed of at
39 such landfill. All fees shall be deposited in the state treasury and credited
40 to the solid waste management fund. A city, county, other political sub-
41 division or state agency shall be exempt from payment of the fee but shall
42 meet all other provisions of this act.

43 (f) Plans, designs and relevant data for the construction of solid waste

1 processing facilities and disposal sites shall be prepared by a professional
2 engineer licensed to practice in Kansas and shall be submitted to the
3 department for approval prior to the construction, alteration or operation
4 of such facility or area. In adopting rules and regulations, the secretary
5 may specify sites, areas or facilities where the environmental impact is
6 minimal and may waive such preparation requirements provided that a
7 review of such plans is conducted by a professional engineer licensed to
8 practice in Kansas.

9 (g) Each permit granted by the secretary, as provided in this act, shall
10 be subject to such conditions as the secretary deems necessary to protect
11 human health and the environment and to conserve the sites. Such con-
12 ditions shall include approval by the secretary of the types and quantities
13 of solid waste allowable for processing or disposal at the permitted
14 location.

15 (h) As a condition of granting a permit to operate any processing
16 facility or disposal area for solid waste, the secretary shall require the
17 permittee to: (1) Provide a trust fund, surety bond guaranteeing pay-
18 ment, irrevocable letter of credit or insurance policy, to pay the costs of
19 closure and postclosure care; or (2) pass a financial test or obtain a finan-
20 cial guarantee from a related entity, to guarantee the future availability
21 of funds to pay the costs of closure and postclosure care. The secretary
22 shall prescribe the methods to be used by a permittee to demonstrate
23 sufficient financial strength to become eligible to use a financial test or a
24 financial guarantee procedure in lieu of providing the financial instru-
25 ments listed in (1) above. Solid waste processing facilities or disposal
26 areas, except municipal solid waste landfills, may also demonstrate finan-
27 cial assurance for closure and postclosure care costs by use of ad valorem
28 taxing power. In addition, the secretary shall require the permittee to
29 provide liability insurance coverage during the period that the facility or
30 area is active, and during the term of the facility or area is subject to
31 postclosure care, in such amount as determined by the secretary to insure
32 the financial responsibility of the permittee for accidental occurrences at
33 the site of the facility or area. Any such liability insurance as may be
34 required pursuant to this subsection or pursuant to the rules and regu-
35 lations of the secretary shall be issued by an insurance company author-
36 ized to do business in Kansas or by a licensed insurance agent operating
37 under authority of K.S.A. 40-246b, and amendments thereto, and shall
38 be subject to the insurer's policy provisions filed with and approved by
39 the commissioner of insurance pursuant to K.S.A. 40-216, and amend-
40 ments thereto, except as authorized by K.S.A. 40-246b, and amendments
41 thereto. Nothing contained in this subsection shall be deemed to apply
42 to any state agency or department or agency of the federal government.

43 (i) Permits granted by the secretary, as provided in this act: (1) Shall

1 not be transferable except that a permit for a solid waste disposal area
2 may be transferred if both of the following conditions are met: (A) The
3 area is permitted for only solid waste produced on site from manufactur-
4 ing and industrial processes or on-site construction or demolition activi-
5 ties; and (B) the only change in the permit is a name change resulting
6 from a merger, acquisition, sale, corporate restructuring or other business
7 transaction; and (2) shall be revocable or subject to suspension whenever
8 the secretary shall determine that the solid waste processing or disposal
9 facility or area is, or has been constructed or operated in violation of this
10 act or the rules and regulations or standards adopted pursuant to the act,
11 or is creating or threatens to create a hazard to persons or property in
12 the area or to the environment, or is creating or threatens to create a
13 public nuisance, or upon the failure to make payment of any fee required
14 under this act. The secretary also may revoke, suspend or refuse to issue
15 a permit when the secretary determines that past or continuing violations
16 of the provisions of subsection (c)(3) of K.S.A. 65-3407, and amendments
17 thereto, have been committed by a permittee, or any principal, share-
18 holder or other person capable of exercising partial or total control over
19 a permittee.

20 (j) In case any permit is denied, suspended or revoked the person,
21 city, county or other political subdivision or state agency may request a
22 hearing before the secretary in accordance with K.S.A. 65-3412, and
23 amendments thereto.

24 (k) (1) No permit to construct or operate a solid waste disposal area
25 shall be issued on or after the effective date of this act if such area is
26 located within 12 mile of a navigable stream used for interstate commerce
27 or within one mile of an intake point for any public surface water supply
28 system.

29 (2) Any permit, issued before the effective date of this act, to con-
30 struct or operate a solid waste disposal area is hereby declared void if
31 such area is not yet in operation and is located within 12 mile of a navi-
32 gable stream used for interstate commerce or within one mile of an intake
33 point for any public surface water supply system.

34 (3) The provisions of this subsection shall not be construed to pro-
35 hibit: (A) Issuance of a permit for lateral expansion onto land contiguous
36 to a permitted solid waste disposal area in operation on the effective date
37 of this act; (B) issuance of a permit for a solid waste disposal area for
38 disposal of a solid waste by-product produced on-site; (C) renewal of an
39 existing permit for a solid waste area in operation on the effective date
40 of this act; or (D) activities which are regulated under K.S.A. 65-163
41 through 65-165 or 65-171d, and amendments thereto.

42 (l) Before reviewing any application for a solid waste processing fa-
43 cility or solid waste disposal area, the secretary shall require the following

1 information as part of the application:

2 (1) Certification by the board of county commissioners or the mayor
3 of a designated city responsible for the development and adoption of the
4 solid waste management plan for the location where the processing facility
5 or disposal area is or will be located that the processing facility or disposal
6 area is consistent with the plan. This certification shall not apply to a solid
7 waste disposal area for disposal of only solid waste produced on site from
8 manufacturing and industrial processes or from on-site construction or
9 demolition activities.

10 (2) If the location is zoned, certification by the local planning and
11 zoning authority that the processing facility or disposal area is consistent
12 with local land use restrictions or, if the location is not zoned, certification
13 from the board of county commissioners that the processing facility or
14 disposal area is compatible with surrounding land use.

15 (3) *For any solid waste disposal area permit issued on or after July*
16 *1, 1999, proof that the permittee owns the land where the disposal area*
17 *will be located, if the disposal area is:*

18 (1) *A municipal solid waste landfill; or*
19 (2) *a solid waste disposal area that has: (A) A leachate or gas collec-*
20 *tion or treatment system; (B) waste containment systems or appurte-*
21 *nances with planned maintenance schedules; or (C) an environmental*
22 *monitoring system with planned maintenance schedules or periodic sam-*
23 *pling and analysis requirements.*

24 Sec. 2. K.S.A. 1998 Supp. 65-3407 is hereby repealed.

25 Sec. 3. This act shall take effect and be in force from and after its
26 publication in the statute book.
