MINUTES OF THE HOUSE TAXATION COMMITTEE.

The meeting was called to order by Chairperson John Edmonds at 9:00 a.m. on January 14, 2003 in Room 519-S of the Capitol.

All members were present except:

Rep. Nancy Kirk

Rep. Vaughn Flora Rep. Tom Sawyer

Committee staff present:

Chris Courtwright - Legislative Research Department

April Holman - Legislative Research Department

Gordon Self - Office of the Revisor Carol Doel - Committee Secretary

Conferees appearing before the committee: Chris Courtwright - Legislative Department

Others attending:

See attached list

Chairperson Edmonds opened the meeting with a welcome to all members of the committee and introduction of the Taxation Committee Rules. (<u>Attachment 1</u>)

Next to be presented to the committee by Chairperson Edmonds was the announcement that the floor was open for consideration of introduction of any bill pertaining to taxation.

Representative Powers introduced a bill regarding round-up sales tax patterned after a similar tax in Ohio and Maryland. There were no objections from the committee.

Chairperson Edmonds requested the introduction of several bills with the first dealing with the corporate franchise fee with a provision to remove the cap from the corporate franchise fee. A separate bill in a similar vein would be to remove the cap while simultaneously reducing the rate by half. There were o objections.

Chairperson Edmonds continued with the information that the interim committee this summer looked at the sales tax base. We have a sales tax in Kansas that exempts a number of services. It was the opinion of the interim committee that the appropriateness of those exemptions and exclusions should be reviewed. Consequently he asked for the introduction of a number of bills dealing with sales tax exemptions. This amounted to approximately six-five bills. There were no objections.

Representative Sharp requested the introduction of a bill decoupling from the Feds as many surrounding states have done. This would refer to income tax. There were no committee objections.

Also introduced by Representative Larkin was a bill regarding income tax credits. No objection were heard from the committee.

Introduced by Chairperson Edmonds was Chris Courtwright from the Legislative Research Department who provided each member with a copy of Kansas Tax Facts 2002 Supplement to the Seventh Division as well as delivering verbal information regarding this supplement. (<u>Attachment 2</u>)

Mr. Courtwright also submitted for committee review a report from the US Census Bureau with regions and divisions with state FIPS codes. (Attachment 3)

CONTINUATION SHEET

MINUTES OF THE HOUSE TAXATION COMMITTEE at 9:00 a.m. on January 14, 2003 in Room 519-S of the Capitol.

Following the presentation by Mr. Courtwright, Chairperson Edmonds opened the floor for a questions from the committee.

With no further business, Chairperson Edmonds announced the next meeting would be on Thursday, January 16th with a presentation by Joan Wagnon, Acting Secretary of the Department of Revenue.

Meeting adjourned at 10:35 a.m.

KANSAS HOUSE OF REPRESENTATIVES COMMITTEE ON TAXATION

- 1. In anycase where committee rules do not apply, House Rules shall govern. All powers, duties and responsibilities not addressed herein are reserved to the Chair.
- 2. The Chair shall determine the committee agenda, including scheduling and the order of business.
- 3. The Chair reserves the right to limit testimony that is cumulative in nature and may limit testimony, when necessary, to a specific number of minutes.
- 4. The Chair reserves the right to limit questioning by conferees by committee members in the interest of time and in the interest of fairness to conferees and other committee members. Committee members shall address conferees only when recognized by the Chair.
- 5. Committee members shall not be approached during committee hearings or deliberations by anyone other than fellow legislative members or legislative staff.
- 6. No conferee shall be interrupted during presentations of their testimony, except with the permission of the Chair.
- 7. Questioning of a conferee shall be limited to the subject matter of the agenda item for the day, except as may otherwise be allowed by the Chair.
- 8. No bill or resolution shall be taken up for a committee vote unless it is announced by the Chair.
- 9. Amendments to motions are in order with permission of the committee member making the motion to be amended.
- 10. A substitute motion is in order, but no additional substitute motion shall be in order until the prior substitute motion is disposed of.
- 11. A motion requires a second to be in order.
- 12. A motion to table or take from the table shall be in order only when such item is on the agenda or is taken up by the Chair. The motion requires a simple majority and is, unless otherwise determined by the Chair, non-debatable.
- 13. There shall be no recording, audible, photographically or otherwise, of committee meetings, except by the committee secretary, without permission of the Chair.
- 14. A request from any member that their own vote be recorded shall be granted.
- 15. Granting excused absences is reserved by the Chair.
- 16. The Chair reserves the right to take such action as may be necessary to prevent disruptive behavior in the committee room during the hearings and deliberations.
- 17. The Chair reserves the right to make such amendments to the rules as the Chair deems necessary. Further, the Chair reserves the right to impose special rules for designated situations as the Chair should deem necessary.
- 18. Adjournment is reserved to the Chair.

FOREWORD

The Seventh Edition of Kansas Tax Facts was published in December, 2000. This document is designed to supplement and update that publication by providing data from FY 2001 and FY 2002 and by summarizing significant tax legislation enacted in 2001 and 2002.

Chris W. Courtwright of the Kansas Legislative Research Department is responsible for this publication.

Combined State and Local Tax Revenue

Kansas state and local government net tax revenue totaled \$8.399 billion in FY 2002, which equated to \$3,117 per capita and to 10.91 percent of Kansas personal income in CY 2001. Following are the tax levies or collections, combining state and local tax revenue, in descending order of importance for FY 2002.

Table 1
Kansas State and Local Taxes

		FY 2000	FY 2001	FY 2002	% of FY 02 Total	% increase from FY 01
General Property (a) Sales and Use (b)	\$	2,212,241 \$	2,412,906 \$	2,657,197	31.64%	10.12%
Income and Privilege		2,257,470	2,292,765	2,349,090	27.97%	2.46%
Motor Fuels		2,134,043	2,221,298	1,976,778	23.54%	(11.01)%
- Decorate Control (A. Companiero)		358,569	358,899	374,701	4.46%	4.40%
Various Vehicle (a) (c)		261,241	237,628	255,275	3.04%	7.43%
Unemployment Comp.		107,655	176,337	186,054	2.22%	5.51%
Vehicle Registration		149,586	147,726	148,779	1.77%	0.71%
Insurance Premiums		67,631	77,210	96,894	1.15%	25.49%
Liquor and Beer		73,436	77,531	81,380	0.97%	4.96%
Severance		56,956	109,180	59,871	0.71%	(45.16)%
Cigarette and Tobacco		52,898	52,876	52,342	0.62%	(1.01)%
Estate/Inheritance		62,888	41,196	48,082	0.57%	16.72%

Parimutuel		4,239	3,973	3,813	0.05%	(4.03)%
Wheat		3,432				(1.00)70
All Other (d)		6,548	6,253	5,896	0.07%	(5.71)%
Total	\$	7,899,982 \$	8,306,815 \$	8,398,626	100.00%	1.11%

⁽a) Taxes levied for collection during the fiscal year.

⁽b) Includes state, county, city and municipal university sales and use taxes.

⁽c) Includes motor vehicle, recreational vehicle, 16m and 20m "tagged" vehicles, and rental car excise taxes.

⁽d) Total revenue from eight taxes, the largest of which for FY 2002 was the drycleaning excise tax at \$1.207 million.

State and Local Tax Structure - Overview

Kansas has had a broad-based state and local tax structure since the 1930s when income, sales, and other taxes were adopted. The broadening continued—at least through the 1980s—with the adoption of various privilege, gross receipts, and severance taxes. One result of these changes is that the general property tax, while still by far the most important tax source for local governments, now is far less significant in terms of the overall state and local tax mix.

The 1992 school finance law substantially altered school district property taxes. In 1991, school district general fund property tax levies ranged from 9.12 mills (Burlington) to 97.69 mills (Parsons). The 1992 law established a uniform general fund mill levy rate of 32 mills for 1992, 33 mills for 1993, and 35 mills for 1994 and thereafter. Beginning in 1997, the Legislature provided major reductions in the general fund levy—which is currently set at 20 mills—in addition to an exemption from that levy for residential property to the extent of the first \$20,000 of its valuation.

Some Highlights of this Supplement

- In FY 2002, total state and local tax revenue in Kansas was \$8.399 billion, with state taxes accounting for \$4.901 billion—or about 58 percent—of the total. State and local taxes grew by only 1.1 percent over the FY 2001 figure of \$8.307 billion. State taxes actually declined by about \$184 million, or 3.6 percent, from FY 2001 to FY 2002; local taxes on the other hand increased by about \$276 million, or 8.6 percent. Details are available in Tables 1, 2, and 4.
- Local governments continue to spend most of the state and local tax revenue. In FY 2002, local government tax revenue was \$3.497 billion and local units received another \$2.881 billion from state taxes allocated to or shared with them. Thus, local units received \$6.378 billion, or 76 percent, of total state and local taxes in FY 2002. Almost 59 percent of the state's tax revenue was shared with or allocated to local units, mostly for education.
- While the general property tax is still the most important single revenue producer, its proportion of total state and local taxes has steadily declined over the decades—from 82 percent of the total in FY 1930, to 56 percent in FY 1960, and to 32 percent in FY 2002 (or about 35 percent if the various vehicle taxes, which are levied in lieu of the general property tax, are included). But the trend has reversed itself recently, since in FY 1998 the general property tax was only about 27 percent of the burden (or 31 percent if vehicle taxes were included).
- Income and privilege taxes accounted for 24 percent of state and local tax revenue in FY 2002, compared with only 11 percent as recently as FY 1970 and only 2 percent in FY 1940. Less dramatic, but significant nevertheless, has been the growth of sales and use tax revenue in the state-local tax mix, i.e., rising from 10 percent of the total in FY 1940, to 16 percent in FY 1970, and to almost 28 percent in FY 2002. The spread of local sales taxes has contributed significantly to the growth of sales tax revenue since 1970.

 State and local tax revenue in FY 2002 was 10.91 percent of CY 2001 Kansas personal income. Historically, this figure has remained remarkably constant. (The ratio was 10.77 percent for FY 1970, for example). The following table provides the data for the last five fiscal years.

Taxes as Percent of Personal Income

	State	Local	Both
FY 1997	6.99	4.50	11.49
FY 1998	7.23	4.27	11.50
FY 1999	6.71	4.19	10.90
FY 2000	6.98	4.32	11.29
FY 2001	6.86	4.35	11.21
FY 2002	6.37	4.54	10.91

- The significant increase in local taxes in FY 2002 was primarily due to property tax increases. Of the \$246 million in general property tax increases, schools accounted for \$123 million; counties for \$61 million; and cities for \$49 million.
- It should be noted that while the courts have held that the mandatory school district general fund property tax levy is a state tax, it is treated as a local tax for the maintenance of historical tax tables.

State Tax Revenue

In FY 2002, state tax revenue totaled \$4.901 billion, which was a decrease of \$184 million, or 3.6 percent, below collections in FY 2001. Significant decrease in individual income taxes (\$130 million), the corporation income tax (\$118 million), and severance taxes (\$49 million) were responsible for the reduction. Total state tax collections have now declined in two of the previous four fiscal years.

For FY 2002, Table 3 shows state tax revenues in descending order of importance and how much of such revenue was credited to the State General Fund and to other state funds. In that year, 81.54 percent went to the General Fund and 18.46 percent was deposited in other funds.

Individual income taxes, corporation income taxes, and sales and use taxes accounted for almost 91 percent of SGF tax receipts in FY 2002. The same four sources comprised just over 80 percent of SGF taxes in FY 1985.

State and Local Taxes

The relative balance in the big three sources of state and local tax revenue – sales, income, and property – that Kansas had achieved for a number of years after the 1992 school finance law appears to be eroding. (In FY 1992 – prior to the implementation of that law – property and vehicle taxes comprised 38.7 percent of total state and local revenues; sales and use taxes, 22.7 percent; and income and privilege taxes, 21.1 percent.)

In FY 2002, property and vehicle taxes accounted for 34.7 percent of the burden; sales and use taxes, 28.0 percent; and income and privilege taxes, 23.5 percent. As recently as FY 1998, the figures were much more closely balanced: 30.9 percent for property and vehicles; 28.1 percent for sales and use; and 28.0 percent for income and privilege.

Economists generally believe that with a diversified revenue portfolio not relying too heavily on a single source, Kansas state and local governments are better able to withstand economic downturns. Indeed, the Governor's Tax Equity Task Force in 1995 concluded as a major tax policy objective that:

"The state and local tax system should be balanced and diversified. A diversified tax system offers a blend of economic tradeoffs. Because all revenue sources have their weaknesses, a balanced tax system will reduce the magnitude of problems caused by over reliance on a single tax source. It will also result in lower rates on each tax and reduce the pressure of competition from other states that have lower rates for a particular tax."

Shown below for the last six years are state, local, and combined state and local tax revenues.

State and Local Tax Revenue (in thousands)

Fiscal Year	State	Percent Increase	Local	Percent Increase	State and Local	Percent Increase
1997	4,199,176	6.20	2,704,078	3.12	6,903,254	4.97
1998	4,605,403	9.67	2,723,830	0.73	7,329,233	6.17
1999	4,555,513	(1.08)	2,844,536	4.43	7,400,049	0.97
2000	4,880,939	7.14	3,019,043	6.13	7,899,982	6.76
2001	5,085,371	4.19	3,221,444	6.70	8,306,815	5.15
2002	4,901,421	(3.62)	3,497,205	8.56	8,398,626	1.11

Comparative Kansas Tax Burden

Kansas is not a "high" tax state. Using the two major tax burden comparisons (taxes per capita or as a percent of personal income), the state consistently has finished in the middle of the pack when compared with all other states. For example, Kansas finished #28 in state tax revenue as a percent of personal income and also #25 in per capita state tax revenue in FY 2001, the latest year for which data are available from all states for such statistics. Kansas finished #27 in per capita state and local collections and #32 in state and local collections as a percent of personal income in FY 1999, the latest data for these statistics. Economic development proponents sometimes suggest that the Kansas tax burden figures should be compared more closely with the data from surrounding states. The following table provides this comparison.

50-State Tax Burden Ranking of Kansas and Surrounding States

	FY 2001 State Taxes Per Capita	FY 2001 State Taxes as Percent of Personal Income	FY 1999 State and Local Taxes Per Capita	FY 1999 State and Local as Percent of Personal Income
Kansas	25	28	27	32
Missouri	43	44	37	44
Oklahoma	27	15	45	36
Colorado	36	46	18	41
Nebraska	32	32	25	31

Recommended Tax Policy Objectives

The aforementioned Governor's Tax Equity Task Force in 1995 recommended that all tax legislation "be evaluated with the following objectives in mind."

- Kansas should maintain its enviable reputation as a fiscally responsible state.
- A tax system should produce revenues that are adequate to finance an agreed-upon level of public services over time.
- A tax system should produce adequate revenue during economic downturns and also respond to economic growth.
- State and local taxing and spending decisions should be consistent with economic growth and development.
- Administration of the tax system should be fair and efficient.
- Fiscal accountability should be strengthened by making taxpayers aware of their true tax liabilities.
- Tax revisions should not unduly erode the tax base.
- State fiscal policy should advance the interests of the state as a whole, while facilitating the fiscal autonomy of local governments.
- Policymakers must recognize that tax policy influences economic behavior, and not always in the desired manner.
- Kansans should be able to rely upon a stable tax policy.
- The state and local tax system should be balanced and diversified.

SUMMARY OF 2002 TAX LEGISLATION

Revenue Enhancements and Other Tax Provisions

SB 39 provides a number of revenue enhancements, with the additional revenues earmarked for deposit in the State General Fund (SGF). The bill also provides for several business tax reductions, including an expansion of the business machinery and equipment income tax credit for property taxes paid; an extension of that credit to railroads; a special corporation income tax apportionment formula for investment funds service corporations; and a package of incentives for tire manufacturers and retreaders that includes a provision authorizing that debt service on Kansas Development Finance Authority (KDFA) bonds be paid by utilizing up to 75 percent of employee withholding taxes. The legislation further expands two programs designed to reduce the regressivity of the tax structure - the earned income tax credit and food sales tax rebate programs. Among the bill's provisions:

Revenue Enhancements

- Sales Tax. The state sales and compensating (use) tax rates are increased from 4.9 to 5.3 percent, effective July 1, 2002. The rates will subsequently be reduced to 5.2 percent on July 1, 2004; and to 5.0 percent on July 1, 2005.
- Cigarette Tax. The cigarette tax is increased from 24 cents per pack to 70 cents per pack, effective July 1, 2002, and is further increased an additional nine cents (to 79 cents per pack) on January 1, 2003. A "floor" or inventory tax equivalent to the increases also is imposed, and an adjustment is made to the dealers' discount percentage to assure that all new revenues will be deposited in the SGF.
- Class C Inheritance Tax Reimposition. For estates of decedents dying on or after the effective
 date of this section, an inheritance tax is imposed on interests received by "Class C"
 beneficiaries (generally, persons other than lineal ascendants or descendants and brothers and
 sisters) at rates ranging from 10 to 15 percent. These provisions effectively reenact part of the
 inheritance tax act repealed in 1998.
- Withholding Tax Provisions. A definition of "distribution" is amended to include subchapter S corporations, limited liability corporations, and partnerships to bring Kansas' withholding tax provisions into conformity with federal provisions such that state withholding will occur under the same circumstances as federal withholding. KSA 2001 Supp. 79-31,100a is amended to provide that withholding be applicable to distributions to nonresident shareholders and partners. An additional provision clarifies that any IRS determination relieving payors from withholding responsibilities also will be applicable for Kansas withholding. Finally, the term "wages" is expanded to include prizes and awards paid to professional athletes at sporting events held in the state.
- Corporation and Other Franchise Taxes. Various franchise taxes and fees are increased to
 effectively double the amount of revenue received relative to prior law. (Prior law, for example,
 imposed a tax of \$1 per \$1,000 of shareholder equity on corporations up to a maximum of
 \$2,500. The tax will now be \$2 per \$1,000 of shareholder equity up to a maximum of \$5,000).
- Sales Tax Exemption on Custom Software. The bill repeals a sales tax exemption which had been provided for the sale of custom computer software.

Low-and-Moderate-Income Tax Relief

- Food Sales Tax Rebates. The food sales tax rebate program is expanded beginning in tax year 2002 by indexing the qualifying income thresholds for inflation and by increasing the dollar amounts of the rebates to \$36 and \$72. (Under prior law, refunds of \$60 per person were available for taxpayers with qualifying income of \$0 to \$12,500; and refunds of \$30 were available for those with income of \$12,501 to \$25,000. Based on inflation assumptions used by the Department of Revenue, the program will be expanded for tax year 2002 such that refunds of \$72 per person will be available for those with qualifying income of \$0 to \$12,800; and refunds of \$36 per person will be available for those with income of \$12,801 to \$25,600.)
- EITC. The bill increases the Kansas Earned Income Tax Credit from 10 percent to 15 percent of the federal credit beginning in tax year 2002.

Business and Economic Development Tax Provisions

- Business Machinery and Equipment Credits. The tax credits available for property taxes timely paid on business machinery and equipment are increased from 15 to 20 percent beginning in tax year 2005; and to 25 percent beginning in tax year 2007.
- Tax Credits Extended to Railroads. The machinery and equipment tax credits for property taxes paid will for the first time be made available for railroad property beginning in tax year 2005 (when the amount of the credit will be 20 percent). The railroad property also will qualify for the subsequent credit increase in tax year 2007. Prior to 2005, the Joint Committee on Economic Development will be required to conduct an interim study regarding the necessity of extending the tax credits to railroad property.
- Investment Funds Service Corporations. A special income tax apportionment formula will be
 made available to investment funds service corporations, authorizing such entities to elect to
 have income apportioned to Kansas based on the number of shares owned by resident
 shareholders compared with the total number of shares owned by all shareholders (in lieu of the
 traditional three factor apportionment formula based on property, payroll, and sales).
- Tire Manufacturers. KDFA is authorized to issue up to \$10 million in bonds qualified to tire manufacturing businesses meeting certain criteria and contracting with the Department of Commerce and Housing. Bonds would be issued equal to \$1 for every \$5 pledged to be invested by the qualified business, and the proceeds would be used to acquire or improve real or personal property in Kansas for modernization and retooling of the contracting business. The bonds would be paid with up to 75 percent of moneys collected by the contracting business for withholding of employee individual income taxes.
- Property Tax Exemption. The bill also expands the property tax exemption in KSA 2001 Supp. 79-201w for certain items of machinery, equipment, materials, and supplies with original retail cost when new of \$250 or less to include such items with original retail cost when new of \$400 or less beginning in tax year 2003.
- Use Valuation of Agricultural Land. The statutory formula relating to use valuation of agricultural land for property tax purposes is amended to provide that the capitalization rate for all years beginning in 2003 be set at not less than 11 percent and not more than 12 percent.

Property Tax Provisions—Miscellaneous

- Use Valuation Report. The Director of Property Valuation (PVD) is required to submit a report
 on or before September 1, 2002, relating to the history of agricultural land valuation procedures.
- Delinquent Property Tax Provisions. The bill amends the procedures for sale of property for delinquent taxes to permit a county without a court order to sell lots or tracts previously offered at public auction but which did not sell. In addition, a court may authorize a county to dispose of one or more lots or tracts by negotiated public or private sale or simply to transfer the lots or tracts if the properties have not sold at a prior public auction. (The latter procedure is subject to a notice and hearing procedure.) KSA 79-2401a also is amended to remove Wyandotte County from a special provision of law previously applicable to only Wyandotte and Johnson counties that requires partial redemption payments for delinquent homestead property taxes be credited to the most recent year for which the real estate was carried on the county tax-sale books.
- Boat Valuation. The bill provides for proration of the taxable value of boats which are acquired or sold between January 1 and September 1 of any taxable year. Under prior law, responsibility for taxes on the entire value of the boat is with the party who owns the boat on January 1 of a given year. A specific formula will now be used to establish a prorated share of the taxable value for parties selling and acquiring a boat between January 1 and September 1. The bill requires that the county appraiser be notified within 30 days of the sale or acquisition.

Sales Tax Provisions—Miscellaneous

- Sales Tax on Phone Cards. The bill removes from the sales tax imposition statute a
 requirement that prepaid telephone calling cards or authorization numbers have prepaid value
 measured in minutes or other time units in order to qualify for gross receipts taxation at the point
 of sale. Striking the requirement effectively extends the point-of-sale tax treatment to all prepaid
 calling cards and authorization numbers.
- Local Sales Tax Provisions. The bill grants Douglas County additional local sales tax authority
 of 0.25 percent, provided the revenue is pledged for preservation, access, and management of
 open space and for industrial and business park-related economic development. Anderson
 County also is added to a list of counties authorized to impose a sales tax and retain the entire
 amount of revenues (without sharing such revenues with cities), provided the moneys are
 pledged for financing the construction or remodeling of a courthouse, jail, law enforcement
 center, or other county administrative facility. Anderson County is granted an additional one
 percent of authority relative to the law for such purposes.
- Sales Tax Exemption for Federal Employee Hotel Room Rentals. Another section enacts a new sales tax exemption for the gross receipts received from the rental of rooms by hotels and accommodations brokers to the federal government and its officers and employees when such rentals are made in association with the performance of official government duties.

Income Tax Provisions—Miscellaneous

 Historic Preservation Credits. The bill makes several changes to the Historic Structure Rehabilitation Expenditure Credit which was created in 2001 and authorizes tax credits equivalent to 25 percent of qualified expenditures incurred in the restoration and preservation of a qualified historic structure pursuant to a qualified rehabilitation plan. The bill allows the credits to be claimed against the financial institutions privilege tax and the insurance premiums tax, in addition to the income tax. The bill further clarifies the treatment of business entities claiming the credits against individual income taxes and provides for the transfer of credits.

 PEOs. A Professional Employment Organization (PEO) will be considered an employer for purposes of Kansas income tax withholding. The client will give payroll information for assigned workers to the Department of Revenue for income tax purposes and in order to qualify for certain tax incentives.

Taxpayer Fairness

- Taxpayer Fairness. Other sections of the bill enact the Taxpayer Fairness Act of 2002:
 - Among the new provisions of law are a requirement that Department of Revenue correspondence regarding tax assessments contain detailed, clear and accurate explanations of the assessments demanded, including specific information on the tax and tax year in question, as well as on penalties and interest. Any such correspondence involving amounts in excess of \$750 for individual accounts and \$2,000 for business accounts is required to be reviewed for accuracy by departmental employees prior to issuance and to contain the employee identification number and telephone number of employees performing the accuracy reviews. An additional requirement relating to correspondence seeking to change the tax or refund due on returns filed by taxpayers mandates that the proposed change be explained in simple and nontechnical terms.
 - O If a taxpayer has designated a third party or other representative to discuss Kansas income tax returns, the Department is required to adhere to and comply with such designation and in discussions and correspondence regarding issues related to the returns.
 - The Department also is required to waive civil penalties upon the finding of any circumstance allowing waiver of civil penalties pursuant to the provisions of the federal Internal Revenue Code.
 - Closing letters also are required to be issued within 30 days upon the resolution of assessments to taxpayers or taxpayers' representatives. Taxpayers will be entitled to rely on the closing letters, and the Department is prohibited from maintaining positions against taxpayers inconsistent with the stipulations of the letters.
 - The Department is required to notify in writing persons who are the subject of tax warrant filings. The notification will have to be delivered within five business days of the date the warrant is filed and is required to include in simple and nontechnical terms the amount of unpaid taxes, information on the administrative appeals process available to the taxpayer, and on the provisions of law relating to the release of warrants on property.
 - KSA 79-3226 is amended to change a provision prohibiting additional individual income tax assessments in amounts of less than \$5. Under the new language, additional tax amounts of up to \$100 may be waived when the Department has determined that administration and collection costs involved would not warrant the efforts.

Annual Report on Cost-Effectiveness of Tax Incentives

SB 129 requires the Secretary of Revenue to consult with the President of Kansas, Inc. regarding the development of a questionnaire on the use of state income tax credits and sales questionnaires to develop an annual report on the cost-effectiveness of economic development tax exemptions and credits.

Mobile Telecommunications Sourcing Act

SB 372 conforms Kansas law to the federal Mobile Telecommunications Sourcing Act (MTSA). The MTSA will be in effect as of August 1, 2002. It provides for a uniform method of sourcing tax revenues from the sales of mobile transactions, thereby avoiding multiple taxation of a customer's purchase of wireless telecommunications services. Two key components of the law are establishment of a "place of primary use" and the creation of state databases assigning street addresses to state and local taxing jurisdictions.

Under the law, tax revenues from sales of wireless telecommunications services are sourced to the customer's place of primary use. This is defined as the residential or business street address of the customer, regardless of the state where the individual's calls originate, terminate, or pass through. This address also must be within the licensed service area of the customer's home service provider.

In order to facilitate the new method of sourcing, the MTSA allows for states to create a state-level database assigning each street address within the state to the appropriate set of taxing jurisdictions. Carriers using a state database are held harmless for mistakes in assigning street addresses to taxing jurisdictions. If a state chooses not to create the database, a carrier may develop a database that assigns street addresses to taxing jurisdictions using a nine-digit zip code methodology. So long as the carrier exercises due diligence in creating and maintaining the database, the carrier is held harmless under the law for any under-collected tax liability arising from a good faith mistake in matching street addresses to taxing jurisdictions.

The effective date of the bill is August 1, 2002, to correspond with the effective date of the federal law.

Streamlined Sales Tax; Tax Administration

SB 472 enacts the Kansas version of the streamlined sales and use tax administration act and a number of tax administrative clean-up provisions.

Streamlined Sales Tax

The Department of Revenue is authorized to become a signatory to the multistate streamlined sales and use tax agreement and make preparations for its implementation, which cannot occur until such time as the Legislature has taken further action to bring the state's laws into compliance with the agreement. The Department is required to identify all changes in law and rules and regulations necessary and sufficient to meet the agreement's compliance requirements. The bill also provides that the Secretary of Revenue or his designee is authorized to represent Kansas before other states participating in the streamlined sales tax project or that are signatories to the agreement. Appointees of the Senate President, House Speaker, Senate Minority Leader, and House Minority Leader also will be authorized to represent Kansas at the meetings. All such appointees will be paid compensation, subsistence allowances, mileage, and other expenses.

Tax Administrative Clean-Up

New statutory language clarifies that the Secretary of Revenue is authorized to adopt rules and regulations necessary to administer and enforce, as provided by law, various taxes and that all rules and regulations in existence on the effective date of the act will continue to be in effect.

Amendments to KSA 2001 Supp. 74-2438 and KSA 79-3226 clarify that taxpayers are authorized to appeal to the State Board of Tax Appeals at any time when no final determination has been made by the Department of Revenue after 270 days since the date of request for informal conferences, provided no written agreement exists between the parties agreeing to extend the time for final determination.

Additional amendments to KSA 79-3650 expand the circumstances under which consumers are authorized to file sales tax refund claims directly with the Department in lieu of going through retailers. Refund claims from individuals will be acceptable when accompanied with notarized statements from retailers: (a) disavowing making the same refund claims on behalf of consumers; (b) agreeing to provide documentation of any information to consumers regarding the claims; ©) acknowledging that the tax in question has already been remitted to the state; and (d) stipulating that credits have not been and will not be taken for the amount of tax in question.

Another provision clarifies corporation income tax law regarding how income is reported for Kansas tax purposes by confirming that the state uses a" transactional test" to determine whether income is apportionable business income.

Another section provides statutory authority for the Department of Revenue to setoff a taxpayer's liability for one type of tax against the taxpayer's overpayment of another type of tax. The bill expressly provides that overpayments of estimated income tax will first be applied to any other tax liability, with the balance remaining available for refund or credit. The bill also amends certain statutes to replace references to the "Director of Revenue" with the "Secretary," reflecting the current organizational structure of the Department of Revenue.

KSA 2001 Supp. 75-5154 is amended to add marijuana and controlled substance taxes to the list of other excise taxes that may be abated by the Secretary of Revenue or his designee.

Finally, additional language provides civil penalties and interest provisions for failure to meet requirements relative to filing or payment of royalties for sand, gravel, or other products removed from river beds. The Department of Revenue will enforce the penalties, which may be waived or reduced at the Secretary's discretion.

IMPACT Program Enhancements

SB 565 increases the statutory maximum on the percentage rate of individual income withholding taxes credited to funds within the Department of Commerce and Housing and used for debt service on bonds for the Investments in Major Projects and Comprehensive Training (IMPACT) Program. The bonds are issued to fund grants for training expenses for companies relocating to or expanding in Kansas. The prior statutory maximum rate was 1.0 percent of individual income withholding taxes and was credited to funds for payment of the debt service. SB 565 increases that maximum to 1.5 percent in Fiscal Year 2004 and to 2.0 percent in Fiscal Year 2006. The bill also adjusts the eligibility requirements for participation in the IMPACT program. Previously, companies were required to maintain a minimum of 1,000 retained jobs and make a minimum capital investment of \$250,000,000. SB 565 lowers those minimums to 250 retained jobs and \$50,000,000 in capital investment.

Tax Credit for Port Authority Debt Retirement

HB 2586 provides capital contribution credit similar to an income tax credit for tax years 2002 through 2021 equal to the total amount attributable to the retirement of indebtedness authorized by a single city port authority established before January 1, 2002. The amount of the credit allowed for any one fiscal year is limited to \$500,000, and any unused credit could be carried forward to future tax years.

The Director of Accounts and Reports is required to issue a warrant to such taxpayer for the amount of the credit after the appropriate amount of credit has been certified by the Secretary of Revenue. This warrant mechanism will be in lieu of an actual tax credit and will be deemed to be a capital contribution.

Real Estate Sales Validation Questionnaire

HB 2698 changes the requirement for filling out the real estate sales validation questionnaire to add to the list of exemptions regarding transfers of title. The questionnaire requirement would not apply to transfers of title "from" a trust with no consideration. Prior law allowed the exemption for transfers "to" a trust with no consideration.

Another exception is to be made for the purpose of releasing an equitable lien on a previously recorded affidavit of equitable interest and without additional consideration.

Transportation Tax Enhancements

HB 3011 makes several changes in tax provisions relative to the comprehensive transportation program enacted in 1999.

Motor Fuels Tax Increase

The gasoline and LP-gas motor fuels tax rate are 2 cents per gallon, effective July 1, 2002. Various fees charged for special LP-gas permit users also are increased by complementary amounts. The motor fuels tax rate changes on July 1, 2002, will be as follows: gasoline, increased from 21 to 23 cents per gallon; the special fuels tax increased from 23 to 25 cents per gallon; and the LP-gas tax increased from 20 to 22 cents per gallon. Total motor fuels tax receipts are expected to increase by about \$32.6 million in fiscal 2003.

Motor Vehicle Registration Tax Increase

Motor vehicle registration taxes are increased for passenger automobiles and pickup trucks by \$5; and for various trucks by amounts ranging from \$2 to \$10, effective July 1, 2002. Registration taxes are expected to increase by \$11.6 million in fiscal 2003.

Additional Local Use Tax—Motor Vehicle Situs

HB 3032 imposes an additional local compensating use tax on motor vehicles purchased in the state that is applicable to the extent that the combined local sales tax rates imposed on the situs of such vehicles (the residences or places of business of purchasers) exceeds the combined local rates imposed at the locations of the vehicle purchases.

Any such additional tax imposed will be collected by county treasurers at the time the vehicles are registered. All laws and rules and regulations of the Department of Revenue relating to the use tax will apply to the additional use tax insofar as they may be made applicable.

Revenues from the tax received by counties are required to be apportioned according to the existing formulas for distribution of countywide sales and use taxes.

SUMMARY OF 2001 TAX LEGISLATION

Bundled Telecommunications Services—Taxation

SB 1 provides a system for taxing bundled telecommunications services. Under this system, a retailer with the ability to break down the cost of bundled telecommunications services remits tax for only those services which are taxable. If the retailer's bookkeeping system does not allow for a breakdown of the cost of taxable and nontaxable services, then the combined cost is deemed to be attributable to the taxable services and, as such, the combined total is taxed.

The bill places the burden of proving that a receipt or charge is not taxable on the telecommunications retailer. The bill also provides that, upon request from the customer, the retailer is required to disclose the selling price of taxable services (if a breakdown is provided) and of taxable and nontaxable services (if billed on a combined basis).

The bill also requires that such retailers offering taxable and nontaxable bundled services enter into a written agreement with the Secretary of Revenue identifying the records to be used in determining the taxable portion of the selling price of the combined services within 90 days of billing.

Estate Tax Act—Outstanding Liability

SB 41 amends the Kansas Estate Tax Act to eliminate any outstanding inheritance tax liability as of July 1, 2008, for those estates for which no return has been filed by that date.

Liquor Drink Tax—Statute of Limitation

SB 42 provides a three-year statute of limitations for the liquor drink tax. The statute-of-limitation language, which limits refund requests and assessments to three years, except in cases of fraud, is similar to that previously in place for the sales tax. In the case of a false or fraudulent return with intent to evade the tax, assessments must be made within two years after the fraud is discovered.

Sales Tax—Food Sales Tax Refund Claims

SB 43 changes the appeals process for denials of food sales tax refund claims to provide that aggrieved persons enter into the Department of Revenue's informal appeals process before proceeding to the State Board of Tax Appeals (SBOTA). Final determinations by the Director of Taxation may subsequently be appealed to SBOTA.

Homestead Property Tax Refunds; Property Taxes on Certain Oil Leases

SB 44 makes several changes to the Homestead Property Tax Refund Act and also clarifies a law designed to offset a portion of property taxes paid on certain low-production oil leases.

One series of amendments allows refunds to be paid directly from the income tax refund fund in lieu of the prior methodology, which provided for refunds to be paid from an appropriation.

A second set of amendments to the refund advancement program, which allows certain eligible taxpayers to receive refunds prior to the payment of their property taxes on December 20, clarifies that the certificate of eligibility forms must be issued by the Department of Revenue and that the Department (and not county clerks) is ultimately responsible for the qualification determination.

A final provision clarifies that extant refunds designed to offset part of property taxes paid on the working interest of certain low-production oil leases be paid from the income tax refund fund.

Kansas Income Tax Law

SB 45 modifies Kansas income tax law in several ways. These include the following.

Assistive Technology Individual Development Accounts. The bill enacts the Individual Development Account Program for Assistive Technology, a program which will be administered by the Schiefelbusch Institute for Life Span Studies of the University of Kansas. This program enables eligible families and individuals to establish accounts for the purpose of funding purchases of assistive technology.

Families or individuals with household income less than or equal to 300 percent of the federal poverty level are eligible to open individual development accounts (IDAs) earmarked for assistive technology purchases, which are defined to include "any item, piece of equipment or product system, whether acquired commercially, off the shelf, modified or customized, that is used to increase, maintain or improve functional capabilities of individuals with disabilities." The maximum amount account holders may deposit into an IDA in a calendar year is limited to \$5,000. The total balance of an IDA at any point in time is limited to \$50,000.

The Schiefelbusch Institute (the University of Kansas) will be required to adopt rules and regulations and prepare a request for proposals from nonprofit or charitable community-based organizations seeking to administer the Individual Development Account Reserve Fund (IDARF). The IDARF will be created to fund administrative cost of the program incurred by financial institutions, community-based organizations, and also to provide matching funds for moneys in IDAs. No more than 20 percent of all funds in the IDARF may be used for administrative costs during the first two years of the program, and the limitation will be set at 15 percent in subsequent years.

A program contributor, defined to include "a person or entity who makes a contribution" to an IDARF, is allowed income tax credits up to 25 percent of the contribution amount. The total amount of all such tax credits authorized may not exceed \$6,250 in any fiscal year. These tax credits will not take effect until tax year 2003.

Account holders making nonqualified withdrawals from IDAs are required to forfeit all matching moneys in the accounts, which are then returned to the IDARFs of the contributing community-based organizations. In the event of the death of an account holder, the account holder's money is distributed, without matching moneys, to his or her heirs.

State agencies are directed to disregard IDA funds, including accrued interest, when determining eligibility for public assistance or benefits.

Additional language clarifies that the Schiefelbusch Institute has no contractual expense in recruiting or maintaining community-based organizations or financial institutions willing to administer the program; and that the Institute is under no obligation to provide matching funds if sufficient outside IDARF contributors are not found.

Community Service Tax Credits. The bill extends the Community Service Tax Credit Program to allow charitable contributions by individual taxpayers to qualify for the tax credits available through the program. Under the law, only contributions made to participating charitable organizations by business taxpayers qualify for tax credits.

The bill requires that transfers of Community Service Tax Credits be for at least 50 percent of the value of the credits and a minimum contribution of \$250 is required in order to receive a tax credit.

The bill also reduces the cap on Community Service Tax Credits which may be used in a year from \$5.0 million to \$4.13 million.

Meals on Wheels Check-Off. The bill provides an income tax check-off for the Senior Citizen Meals on Wheels Program, to be placed on each Kansas individual income tax return form beginning for tax year 2002.

Income Tax Statute of Limitations. The bill clarifies that the statute of limitations for assessments is established at three years after the original return was filed or within one year after an amended return was filed, whichever is later. The bill also eliminates the distinction between timely filed returns and late returns regarding refunds and conforms state law with federal income tax statute of limitation provisions.

The statute of limitations for both assessments and refunds attributable to federal revenue agent reports are set at 180 days following receipt of such reports or "within two years of the date the tax claimed to be refunded or against which the credit is claimed was paid," whichever date is later.

Income Tax Credit for Certain Costs Associated with Plugging Abandoned Oil and Gas Wells. An income tax credit equivalent to 50 percent of expenditures incurred in plugging abandoned oil and gas wells is made permanent beginning with tax year 2001. This credit had previously been available, but it sunset at the conclusion of tax year 2000.

Limitation on Alternative Fuel Motor Vehicle Income Tax Credits. The bill places a limitation on an income tax credit already available to taxpayers who make the original purchase of alternative fuel system motor vehicles. For such vehicles capable of operating on a fuel blend of 85 percent ethanol and 15 percent gasoline, the credit of up to \$750 is available only after taxpayers claiming the credit furnished evidence of the purchase of at least 500 gallons of such blend from the date of the purchase of the vehicle through December 31 of the next calendar year.

Estate Tax Apportionment Act

SB 137 enacts the Kansas Estate Tax Apportionment Act. The bill establishes a default rule for the method of payment of federal and state estate taxes and further establishes an apportionment rule whereby each person interested in the estate pays a proportionate part of the total tax.

Property Tax Exemption—Farm Storage and Drying Equipment

SB 138 amends the property tax exemption for farm storage and drying equipment to remove a requirement that property must be "used exclusively" for the storage or drying of enumerated grains in order to qualify for the exemption. This change has the effect of expanding the exemption to include property which is acquired through a lease agreement.

Job Investment Credit Act

SB 146 temporarily expands the sales tax exemption provisions of the Job Investment Credit Act to allow a sales tax exemption for qualified retail businesses located outside of a city in a county having a population of 10,000 or less. This provision applies to retail businesses which locate or expand prior to July 1, 2004. Under prior law, certain retail businesses could qualify for the sales tax exemption but they had to be located within a city having a population of 2,500 or less.

Local Sales Tax—0.1 Percent Incremental Authority for Cities

SB 216 amends KSA 2000 Supp. 12-189 to authorize local sales tax rates in 0.1 percent increments for class A, B, and C cities. Such cities had rate authority in 0.25 percent increments under prior law.

Local Retail Sales Tax—Amendments

SB 253 changes two timing issues related to implementing an approved local retail sales tax. The first change imposes a 30-day deadline for a city or county to notify the Director of Taxation following the adoption of a local retail sales tax. Under prior law, no deadline existed. The second change increases the time between notifying the Director and implementing the sales tax from 60 days to 90 days.

The bill also specifies accounting procedures for "excess" local retail sales tax receipts to require local governments to deposit into their general funds any receipts received in excess of amounts necessary to pay the cost of special projects.

Water Districts—Various Provisions

House Sub. for SB 332 provides a sales tax exemption—under certain circumstances—effective January 1, 2002, for the purchases of various public water districts, including indirect purchases made on behalf of such districts by contractors. Additional language clarifies that the sales tax does not apply to the gross receipts from sales of rural water district benefit units; water system impact or system enhancement or other similar fees; and connection or reconnection fees collected by water suppliers.

A new clean water drinking fee of \$0.03 per 1,000 gallons of water sold at retail by a public water supply system is imposed on and after January 1, 2002 by those public water supply systems which do not elect prior to October 1, 2001 to "opt out" of imposing such fee. Any such election will be irrevocable and would eliminate the application of the aforementioned sales tax exemption for those systems. Public water supply systems which do not opt out and do begin imposing the fee are prohibited from passing on the fee to consumers.

Transient Guest Tax—Information Sharing

HB 2007 authorizes the Director of Taxation to provide monthly transient guest tax reports to cities located within counties imposing such taxes and to counties within which are located in cities imposing such taxes. (Prior law allowed the information to be provided to only those cities and counties levying transient guest taxes.)

City and county officials receiving such information are authorized to divulge it solely to financial officers designated by governing bodies.

Sales Tax Exemptions—Parkinson's Disease and Kidney Foundation

HB 2029 provides a sales tax exemption for sales and purchases of Kansas chapters of the Parkinson's Disease Association when such transactions are related to the purpose of eliminating Parkinson's Disease through medical research and public and professional education.

The bill also exempts sales and purchases of the National Kidney Foundation of Kansas and Western Missouri when such transactions are related to the purpose of eliminating kidney disease through medical research and public and private education.

Income Tax Credit for Business Research and Development

HB 2055 provides a permanent income tax credit for business research and development. The bill authorizes a 6.5 percent credit for research and development expenditures in Kansas, based on the amount by which such expenditures exceed the business' actual expenditures for that purpose in the tax year and the two preceding tax years. In any tax year, the maximum deduction from tax liability is 25 percent of earned credit plus carryover amounts. Any amount by which the allowed portion of the credit exceeds the business' total Kansas tax liability in a given tax year can be carried forward.

Any expenditures that are eligible for a Kansas research and development tax credit also are eligible for a federal itemized income tax deduction or, for an expanded level of research activity, a federal research tax credit. However, if the business receives a federal or state grant and uses grant proceeds for research and development expenditures, that taxpayer cannot claim a state credit for those expenditures.

Property and Motor Vehicle Tax

HB 2063 clarifies that any personal property located in exempt student dormitories also is exempt, and the clarification is retroactive to tax year 1998 as well as being prospective.

The bill further provides for the cancellation of any delinquent motor vehicle property taxes more than one year past due along with any related penalty and interest when the motor vehicle has been donated to a nonprofit charitable organization exempt from federal income taxation.

Finally, the bill amends KSA 79-2801 to provide that if a county has failed to initiate proceedings for a judicial tax foreclosure sale on property located within the corporate limits of a city and if the taxes on such property have remained delinquent for at least three years, the governing body of the city may initiate a tax foreclosure sale. Under such circumstances, the city governing body and the city attorney will have the same powers and duties as the board of county commissioners and the county counselor under the judicial tax foreclosure sale statutes. All other county officers are required to perform the same duties required by law as if such tax sales had been initiated by the county.

Income Tax Credits—Historic Preservation

HB 2128 provides state income tax credits equal to 25 percent of qualified expenditures incurred in the restoration and preservation of a qualified historic structure pursuant to a qualified rehabilitation plan. "Qualified rehabilitation plan" is defined as a project consistent with rehabilitation standards and guidelines adopted by the federal Secretary of the Interior and further approved by either the Kansas State Historical Society's Cultural Resources Division or a local government certified by the Division.

All expenditures of \$5,000 or more under such plans will qualify for the tax credit.

The tax credits are nonrefundable, but any unused portions may be carried forward for up to ten years.

Tax Incentives—Annual Report on Cost-Effectiveness

HB 2591 suspends until the 2003 Legislative Session a pre-existing requirement that Kansas, Inc. prepare an annual report evaluating the cost effectiveness of various economic development income and sales tax incentives.

The bill also requires Kansas, Inc. and the Department of Revenue prior to the 2002 Legislative Session to agree upon procedures regarding the disclosure of tax information and submit whatever proposed changes in law would be necessary as a result of that agreement to the 2002 Legislature.

School Finance

Senate Sub. for HB 2336 modified the school finance formula and addressed various education policy matters and extended the uniform school district property tax rate of 20 mills and the \$20,000 residential exemption for tax years 2001 and 2002.

Premium Tax Changes

HB 2065 concerns premium tax credits allowed to insurance companies. For tax year 2001 and thereafter, insurance companies may claim a credit against any premium tax owed in an amount up to 15 percent of the salaries paid to Kansas employees. However, the credit allowed may not reduce the amount of the tax owed by more than 1.125 percent of premium for an insurance company or 1 percent for companies having affiliates. (Prior law allowed for a credit up to 30 percent of the salaries paid to Kansas employees with a reduction in the amount of the tax not to exceed 1.25 percent for all companies and affiliates.)

Incentives for Independent Power Producers

HB 2266 provides a property tax exemption for certain "independent power producer (IPP) property" which is newly constructed and placed in service on or after January 1, 2001.

Qualifying IPP property will be exempt from property taxation from and after commencement of construction of the generating facility and any pollution control devices installed at the facility and for the 12 taxable years immediately following the taxable year in which construction or installation

of the property is completed. For peak load plants and pollution control devices at such plants, the tax exemption will apply for six taxable years immediately following completion of construction or installation.

Electric Public Utilities—Expanded Use of Construction Work in Progress

HB 2268 provides a number of incentives for the construction of certain electric utility property which is owned or operated by Kansas public utilities, including a property tax exemption for eligible electric generation facilities, pollution control devices at such facilities, and eligible transmission lines. One such exemption applies from and after commencement of construction of such facilities (except for peak load plants) or transmission lines and from and after purchase or commencement of construction or installation of pollution control devices at "non-peaking" plants for ten taxable years immediately following the year in which construction is completed.

A property tax exemption provision for "peak load" plants and pollution control devices installed at such plants is effective for four years following the year in which construction is completed.

SOURCES: Financial reports of the Division of Accounts and Reports and records of tax-collecting agencies. Details might not add to totals due to rounding.

- 1. Taxes levied for collection in the fiscal year as reported by the Department of Revenue, including the state's small share (if any) of certain in-lieu tax levies.
- 2. The state's 1/26 share of the tax.
- 3. Amount received by the state from the motor vehicle and recreational vehicle taxes.
- 4. State receipts only, excluding amounts retained by county treasurers.
- Starting in FY 2001, wheat collections are no longer treated as a tax. Legislation enacted in 2000 privatizing the wheat commission also changed the nature of this levy from a tax to an assessment.
- 6. Includes retaliatory taxes.
- 7. State's 2 percent share of the tax.

Sources: Reports and records of the Department of Revenue.

- Taxes levied for collection in the fiscal year. Includes certain in-lieu taxes, e.g., on industrial revenue bond property. 1.
- 2. Taxes collected on a calendar-year basis.
- 3. Calendar year revenue, e.g., the figure in the FY 2002 column is for CY 2001.
- School districts, community colleges, and municipal universities, including out-district tuition tax levies made by counties and 4. townships. Legislation enacted in 1999 eliminates out-district tuition levies after FY 2003.
- Collections by the Department of Revenue for counties, cities, and municipal universities which impose a sales tax, as reported by 5. the Division of Accounts and Reports.
- Certain vehicles weighing up to 20,000 pounds pay these taxes with liability based upon the motor vehicle tax law but have a 6. payment schedule (December and June) similar to personal property (see KSÁ 2000 Supp. 79-5105a). The state received \$78,000 of the \$4.287 million in CY 2000 collections and \$83,000 of the \$4.847 million in CY 2001 collections. Since the state's share could not be disaggregated for prior years, all revenue is again treated as "local" for the sake of comparison.

Special Note

This table does not include revenue from certain taxes for which annual data are not compiled, e.g., occupation and franchise taxes; "911" taxes; and development excise taxes.

SOURCES: Records of the Division of Accounts and Reports and state budget documents.

- Includes city maintenance payments, Special City and County Highway Fund, County Equalization and Adjustment Fund, County Treasurer's Licensing Fee Fund, aid for public transportation, aid for aviation, and an amount equal to annual receipts from the motor carrier tax credited to the State General Fund which is earmarked for transfer to the Special City and County Highway Fund.
- Excludes payments to the State Firefighters Association and any amount of the tax used for administration.
- 3) Seven percent of the tax is returned to producing areas.
- 4) Amount distributed from the Heritage Trust Fund.
- 5) Taxes accounted for 97.27 percent of General Fund receipts in FY 2002. The "Other" category does not include the motor carrier tax transfer to the Special City and County Highway Fund because those amounts are included in "Highway-User Taxes."
- This category includes aid to school districts, community colleges, Washburn University (including Public TV), local libraries, area vocational schools and technical institutes, the state's contribution for school employees retirement (KPERS-School), arts program grants, and the KUMC telemedicine program. Aid to school districts does not include "excess" local effort remitted to the state by certain districts with exceptionally high assessed valuations; these amounts were included in the tax levies of those districts.
- 7) By law, fixed percentages of state sales and use taxes credited to the General Fund are transferred to the Local Ad Valorem Tax Reduction Fund and the County-City Revenue Sharing Fund, unless the Legislature limits the transfers by separate legislation.
- 8) The principal aids included in "Other" were for community corrections and community conservation camps, local public health, community mental health and retardation and associated community assistance grants, Aging Department programs, and the juvenile community programs.
