### MINUTES OF THE SENATE TRANSPORTATION COMMITTEE

The meeting was called to order by Chairman Les Donovan at 8:30 a.m. on March 10, 2004 in Room 527-S of the Capitol.

All members were present except:

Senator David Adkins- absent Senator Edward Pugh- absent

### Committee staff present:

Hank Avila, Legislative Research Department Bruce Kinzie, Revisors of Statutes Marian F. Holeman, Committee Secretary

### Conferees appearing before the committee:

Representative Mario Goico
Terry Heidner, KDOT Dir. Division of Operations
Tom Stoltz, Deputy Chief, Wichita Police Dept.
Lt. John Eichkorn, Kansas Highway Patrol
Mike Crow, Dir., KDOT Division of Operations
Terry Holdren, Kansas Farm Bureau
Robert Miller, Wellington
Leslie Kaufman, Kansas Cooperative Council
Tom Whitaker, Exec. Dir., Kansas Motor Carriers Assn.

Others attending:

See Attached List

### HB 2563: Motor vehicles, increase amount for reporting accidents to \$1,000

Representative Mario Goico, the House sponsor, spoke in support of the bill which would raise the dollar limits for law enforcement investigation and reporting of non-injury accidents from damages in excess of \$500.00 to \$1,000.00. It would not apply in cases of injury, alcohol or drugs. Present reporting requirements involve an astounding amount of police time. It is estimated that the bill at the \$1,500 level would save the city around \$150,000 per year and \$63,000 at the \$1,000 level (Attachment 1). The House bill was amended to increase the threshold to \$1,500.00. Terry Heidner, Director of Planning and Development, Kansas Department of Transportation, described the current system of reporting and the relief they would experience from enactment of this bill. Especially beneficial were the house amendments to set the effective date at January 1, 2005 and to allow "electronic" reporting. He also provided information on the damage threshold used in some other states (Attachment 2). Thomas J. Stolz, Deputy Chief of Police, Wichita Police Department provided details regarding current reporting requirements and detailed savings resulting in the requested change. They would still make a case on all accidents. The only difference would be in filling out the very detailed and complicated state forms required by the present threshold (Attachment 3). Lt. John Eichkorn, Kansas Highway Patrol, testified in support of the bill for the same reasons as the Wichita Police Department. The base damage for reporting has not been increased since 1985, whereas the cost of materials and labor have increased much more rapidly (Attachment 4). Hearing closed

### HB 2624: Cotton modules, intrastate registration, special permits

Mike Crow, Director, Division of Operations, Kansas Department of Transportation (KDOT) advised they support the bill which addresses the transport of over-dimensional cotton modules. Current law only allows transport during daylight hours. This bill allows transport 24 hours a day. All other statutory mandates and regulations remain applicable (Attachment 5). Terry Holdren, Associate State Director, Kansas Farm Bureau (KFB) Governmental Relations urged passage of the bill which is needed in the cotton industry to facilitate the movement of cotton from field to gin during harvest (Attachment 6). Robert Miller (former Speaker of the Kansas House), President, Kansas Cotton Association, explained

#### CONTINUATION SHEET

MINUTES OF THE SENATE TRANSPORTATION COMMITTEE at 8:30 a.m. on March 10, 2004 in Room 527-S of the Capitol.

some aspects of this rapidly expanding new industry in the State of Kansas. The cotton module trucks do not quite fit in with the scheme of things in Kansas. The only place they run is between fields and gins. There are now three gins and they anticipate building more in the near future. Cotton growing and ginning is a very important, new economic development industry in the state. Many water growers and going to cotton because it takes far less water. It conserves both water and gas, as well as the land (Attachment 7). He introduced Gary Feist, Manager of the gin in Anthony. Mr. Miller is chairman of the Board for the Winfield gin. Leslie Kaufman, Director, Government Relations, Kansas Cooperative Council spoke in support of the bill. You may request from her information regarding the water savings in growing this crop. This industry is vital to the economy of the state. It is making a great economic contribution. The growth of this industry has been very rapid and Kansas has not yet developed the infrastructure and regulatory frameworks necessary to support. The transportation arena is where they are trying to fit new vehicles and delivery needs into existing state and federal parameters. That is why this bill is needed (Attachment 8). Tom Whitaker, Executive Director, Kansas Motor Carriers Association, has worked with all interested parties on this issue to accommodate the needs of this new industry and they are happy to support this bill (Attachment 9). Hearing closed.

### **Approval of minutes**

Senator Schodorf moved to approve minutes of the meeting of February 19, 2004. Senator Jackson seconded the motion. Motion carried.

Meeting closed at 9:30 a.m.

The next meeting is scheduled for March 11, 2004.

## TESTIMONY FOR HB 2563

Chairman Les Donovan and fellow committee members:

This bill modifies KSA8-1606 and KSA 8-1611. This law requires law enforcement departments to investigate all accidents with damage in excess of \$500 formally on state accident forms. This bill raises the limits from \$500 damage to require investigation only when a non-injury accident causes damages in excess of \$1000 to any one person's property. The bill was amended in committee to raise the amount to \$1500.

This would reduce the number of minor accidents the police department is required to investigate. This does not apply in cases of injury, alcohol or drugs.

The City of Wichita police officials estimate that over the last five years taxpayers have spent more than \$1,000,000 investigating non-injury accidents where drugs and alcohol were not involved. This bill will save the City of Wichita approximately an estimated \$150,000 per year at \$1500 and \$63,000 at \$1000.

The Wichita Police Department will still provide a courtesy report, the difference is that these reports do not have to comply with the requirements KSA 8-1612. (Which in most accidents takes about 1.5 hours to complete).

The amount of these reports have not been raised since 1985 when it was raised from \$300 to \$500. At the present time \$500 requires investigation of almost all accidents.

The bill as amended by the House changes the transfer of data from tape to electronic form. The implementation is January 1, 2005, in order to use all the forms presently in stock.

### TESTIMONY BEFORE SENATE TRANSPORTATION COMMITTEE

## REGARDING HOUSE BILL 2563 REPORTING OF MOTOR VEHICLE ACCIDENTS

MARCH 10, 2004

Mr. Chairman and Committee Members:

I am Terry Heidner, Director of Planning and Development for the Kansas Department of Transportation (KDOT). On behalf of KDOT, I am here to provide testimony regarding House Bill 2563, which increases the minimum dollar amount threshold for a reportable motor vehicle traffic accident from \$500 to \$1,500.

KDOT, by statute, receives all reportable motor vehicle accident reports that occur in Kansas. We receive the hard copy report, key it into the computer, add some location and highway system information, perform analysis on the data, and disseminate statistics. Each year we receive approximately 80,000 reports. In 2002, 59,327 of those were property damage only accidents. We do not know how many of those 59,327 would not have been reportable if the threshold had been \$1,500.

The proposed increase could be expected to result in less paperwork for law enforcement and less processing for KDOT, but significant reductions are not anticipated. One minor issue to recognize in making the change is that historical accident rate trend lines will always have an anomaly in the year of implementation due to this reduction in the reporting of accidents requiring some explanation in all future statistical reports.

KDOT does support this bill. We appreciate the House amendments to set the effective date at January 1, 2005 rather than mid-year since accident statistical reporting is typically based on calendar year statistics. We also appreciate the amended language to allow "electronic" reporting of accident data since we are beginning to move in that direction with Kansas Highway Patrol and other law enforcement agencies.

We would like to offer some information for your consideration concerning the damage threshold used in other states. According to the National Highway Traffic Safety Administration, there are 20 states reporting at or above \$700 including 16 at \$1,000 and one at \$1,400. There are 30 states reporting at or less than \$500. Five states take all crashes. We would also offer that if you inflate our current \$500 threshold from 1985 to the present using the consumer price index, it comes to just under \$1,000.

2-1

#### **Police Department**

Representative Patricia Barbieri-Lightner Chairperson Insurance Committee State Capitol, Rm 527-N Topeka, Kansas 2/12/04

Subject: Testimony in Support of HB 2563 - State Accident Reporting

The City of Wichita appears in support of HB 2563. This bill would help to reduce the amount of time and paperwork filed by police in response to noninjury auto accidents in which no alcohol or drugs are involved. The proposed change would save money and would enable police officers to spend more time in community policing duties and enhance response times to more serious calls.

This afternoon I will present information regarding the practices under current State law, and the positive changes for police and citizens that would be realized with the passage of HB 2563.

#### **Current Practice/Statistics**

Over the last five years, Wichita Police Officers have responded to an average of 15,000 traffic accidents per year (attachment 1). When an officer arrives at the scene of an accident they must make several immediate determinations of descending priority:

- injury of persons
- traffic control needs
- presence of any drug or alcohol
- total vehicle and property damage
- cause of accident

In the event that a person is injured, there are drugs or alcohol present, or there is a total of over \$500 property damage, the responding officer must fill out the State of Kansas Motor Vehicle Accident Report DOT form #850-W (attachment 2). Over the past five years of study, officers had to fill out State Accident forms regarding approximately 50% of the total accidents in the City – roughly 7500 forms per year. Of the 7500 incidents requiring the State Accident form, approximately 40% - roughly 3000 cases per year -

3-1

SENATE TRANSPORTATION COMMITTEE DATE 03-10-04
ATTACHMENT: 3

City Hall • 455 North Main • Wichita, Kansas 67202

were required because the accident involved an injury or the presence of drugs or alcohol at the scene.

The remaining cases – approximately 4500 cases per year - used a State Accident form because of estimated property damage greater then \$500. Thus, HB 2563 could impact the work process regarding approximately 4500 accident cases per year in the Wichita jurisdiction. Wichita Police estimate that if the property damage assessments are raised from the current \$500 to the proposed \$1000 of HB 2563, then approximately 1000 accidents per year would not require the State Form.

### **Current Practice/Scene Administration**

When police officers arrive on scene and determine that a State Accident form needs to be filed, they must adhere to the following protocol after taking care of any injured persons:

- conduct detailed measurements of vehicle positions which means leaving the vehicles in their original positions after the accident for an extended period
- request help from another police unit(s) for traffic control
- fill out the relatively extensive State form
- data enter the information into the City's computer system so it can be linked to the State of Kansas data base

This practice generally requires an average of 2 ¼ hours of initial responding officer's time from start to finish. It also requires an average of ½ hour of backup officer(s) time to provide traffic control support before the vehicles can be removed from the roadway. In addition, the average data entry time of a State Accident report is ¼ hour for a data entry clerk. Thus, in regard to expense via police time, each accident requiring the State form adds up in the following manner:

- initial officer response time  $-2\frac{1}{4}$  hours x \$22.00/hour = \$49.50
- backup officer time  $-\frac{1}{2}$  hours x \$22.00/hour = \$11.00
- data entry clerk time  $-\frac{1}{4}$  hours x \$12.00/hour = \$3.00
- TOTAL expense in time = \$63.50

When police officers arrive at the scene of an accident and determine that no State Accident form is needed - which means there are no injuries, no drug or alcohol involvement, and damage is under \$500 - the officer only needs to fill out a local preliminary Motor Vehicle Accident Report form (attachment 3). This reporting procedure insures that all driver information is obtained at the scene and that driver's statements are taken. In addition, the responding police officer still gives an opinion as to the cause of the accident and issues citation when fault can be determined. Since no detailed measurements are required for this form, the officer can have citizens move their cars out of the roadway and work the accident investigation out of traffic. The average time spent by an officer on this type of investigation, including data entry which the officer enters, is ½ hour. And in most instances, because the cars will be immediately moved off the roadway, no backup officer(s) is needed for support. Thus, in regard to

expense via police time, each accident worked in this manner adds up in the following manner:

• initial officer response time  $-\frac{1}{2}$  hour x \$22.00 = \$11.00

### Savings and Efficiencies Gained If HB 2563 Gains Passage

If the proposed dollar damage requiring a State Form is raised from \$500 to \$1000, it is estimated that Wichita police will fill out 1000 less State Accident forms and instead work the less cumbersome local Motor Vehicle Accident Report. In real savings this represents a time/dollar savings of \$52.50 per accident or \$52,500 per year. More importantly however, is the fact that officers will be more readily available for other duties that would include time for more proactive community police duties within their neighborhoods and would enable a faster response to major crimes.

### Conclusion

The Wichita Police Department supports HB 2563. We view this bill as a mechanism to save police officer's time and provide greater resource to the community. With passage of this bill, police officers still respond to motor vehicle accidents within the community and will still document the incident with investigation, but they will be able to do so in a much more efficient and time-effective manner.

Sincerely,

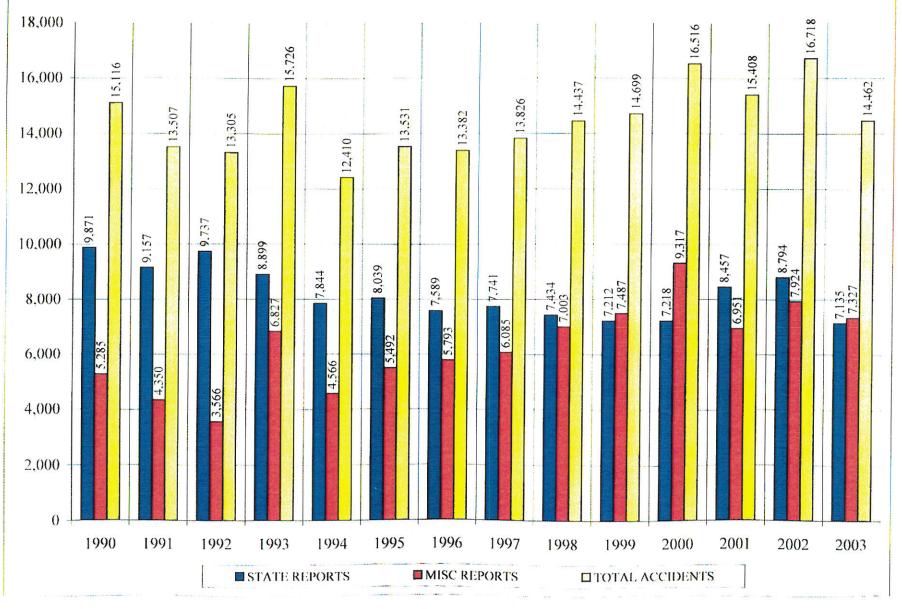

Thomas J. Stolz

387 1

Deputy Chief of Police

Wichita Police Department

### CITIZEN INFORMATION

RECOVERY OF DAMAGES: The recovery of any personal injury or property damages is a civil matter between you and your insurance company or you and the other driver/vehicle owner of this respective insurance company. In the event the other driver/vehicle owner did not have liability insurance in force at the time of the accident, you will need to contact your insurance agent if you have collision coverage on your vehicle. You may want to contact an attorney for advise about any future recovery of damages.

HIT AND RUN: If you have been the victim of a hit and run driver, you may want to contact your insurance agent. The Police Department will assign your accident case to the Accident Follow-Up Unit for further investigation if solvability factors are present. The Officer/Detective may not routinely contact you unless he/she needs additional information no contained in the original accident investigation report. You will be contacted if an arrest is made or if ownership of the hit and run vehicle is verified.

If you have specific facts to provide which might assist in the investigation, please contact the Accident Follow-Up Unit, Monday through Friday, between 8:00 A.M. and 5:00 P.M., at (316) 268-4131. We will keep you informed should the status of your case change in any way.

KEEP THIS REPORT: This is your copy of the information you will need pertaining to the other driver/vehicle owner. Your insurance company may refer any future correspondence to: WICHITA POLICE DEPARTMENT, RECORDS BUREAU, 455 N. MAIN, WICHITA, KS 67202-1684. Include the incident number from the upper right hand portion of this form for reference.

WILLIAM R. SECK, SUPERINTENDENT

KANSAS HIGHWAY PATROL

KATHLEEN SEBELIUS, GOVERNOR

Testimony on HB 2563 to Senate Transportation Committee

> Presented by Lieutenant John Eichkorn Kansas Highway Patrol

> > March 10, 2004

Good morning, Mr. Chairman and members of the committee. My name is Lieutenant John Eichkorn, and I appear before you on behalf of Colonel William Seck and the Kansas Highway Patrol to comment on HB 2563.

HB 2563 proposes to increase the apparent extent of total property damage in a motor vehicle crash from \$500 to \$1500 before a driver must report the incident to police and before a law enforcement officer must submit a written report to the Department of Transportation.

Currently, if a driver is involved in a crash that results in an injury, death, or property damage apparently totaling \$500 or more, the driver must immediately report the incident to law enforcement. Again, HB 2563 would raise the property damage total to \$1500 or more before requiring the driver to report the crash. An injury or fatality would continue to require a driver or another occupant to report the crash.

In 1985, the statutes were amended to raise the reporting requirement's base damage from \$300 to \$500. Over the last two decades, the costs of materials and labor have increased significantly, and it seems appropriate to increase the base cost in these statutes once again.

Relatively minor crashes may result in property damage that would cost \$500 to repair. In some such minor occurrences, the benefits of reporting the crash would not outweigh the time the driver spends reporting it and the time law enforcement officers spend investigating it.

The Patrol appreciates the opportunity to address you today and urges this committee to give HB 2563 a favorable report. I will be happy to stand for any questions you might have.

DEPARTMENT OF TRANSPORTATION DEB MILLER, SECRETARY

KATHLEEN SEBELIUS, GOVERNOR

### TESTIMONY BEFORE SENATE TRANSPORTATION COMMITTEE

### REGARDING HOUSE BILL 2624 TRANSPORT OF COTTON MODULES

MARCH 10, 2004

Mr. Chairman and Committee Members:

I am Mike Crow, Director of the Division of Operations for the Kansas Department of Transportation (KDOT). On behalf of the Department, I am here to provide testimony in support of House Bill 2624, which addresses the transport of cotton modules.

Currently, Kansas law specifies that all over-dimensional loads may only be transported on Kansas highways during daylight hours, which is defined as 30 minutes before sunrise to 30 minutes after sunset. Adoption of this bill would allow over-dimensional cotton modules to be transported 24 hours a day, but would still require adherence to all other statutory mandates for such loads as well as all applicable regulations.

Adherence to all other statutory provisions as well as all other applicable regulation allows KDOT to ensure that these loads can be transported in a safe and efficient manner while allowing this industry to operate according to their unique needs. KDOT is therefore in support of House Bill 2624.

### PUBLIC POLICY STATEMENT

### SENATE COMMITTEE ON TRANSPORTATION

Re: HB 2624—Regulating the Hauling of Harvested Cotton

March 10, 2004 Topeka, Kansas

Testimony by:
Terry D. Holdren
Associate State Director
KFB Governmental Relations

Chairman Donovan and members of the Senate Transportation Committee, thank you for the opportunity to appear today. I am Terry Holdren and I serve as Associate State Director — Governmental Relations for Kansas Farm Bureau (KFB). As you know KFB is the state's largest general farm organization representing more than 40,000 farm and ranch families through our 105 county Farm Bureau Associations.

KFB appears before you today seeking your support and favorable action on HB 2624. This legislation would allow cotton modules to be transported 24-hours per day and would provide for a special use permit under the auspices of K.S.A. 8-1911.

This action and the permit are needed in the cotton industry to facilitate the movement of cotton from field to the cotton gin during harvest.

KFB through its member initiated policy efforts supports regulation of agricultural transportation that is practical and that recognizes the unique characteristics of agriculture, including distance to markets, seasonal complications, and the need to maximize efficiencies in transport.

We would be happy to answer any questions you may have, and encourage your favorable response to this proposal.

Kansas Farm Bureau represents grass roots agriculture. Established in 1919, this non-profit advocacy organization supports farm families who earn their living in a changing industry.

#### **HOUSE BILL 2624**

Robert Miller, President Kansas Cotton Association Wellington, Kansas

The Kansas Cotton Association represents the three cotton gins now operating in Kansas, as well as the cotton producers in the state. The KCA is recognized by the National Cotton Council as the ginner and producer organization in Kansas. The gins are located at Moscow, Anthony, and Winfield. I amy chairman of the Board for the Winfield gin. There may be two more gins constructed this season as well a warelhousing operation.

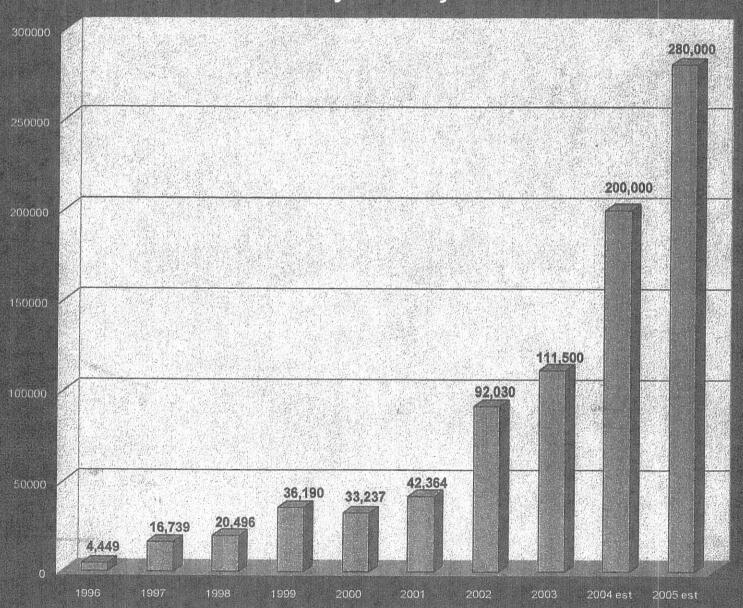

It is unusual for a new industry to develop as fast as we have, without coming to the Legislature for help of some kind. This years production of over \$41,000,000.00 worth of cotton is quite an accomplishment. We have had advice from Kansas State University researchers as well as several economic development agencies, but we have not needed any thing done just to get us going.

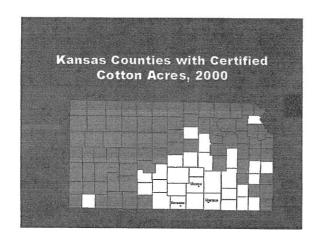

Since cotton is new to Kansas, some of the equipment, labor, environmental issues and marketing techniques are not a smooth fit both in existing laws and customs. The module truck issues have been some of the most perplexing, that is the reason for House Bill 2624. I know of no one who opposes this change. My concern is that is not get lost among more visible pieces of legislation.

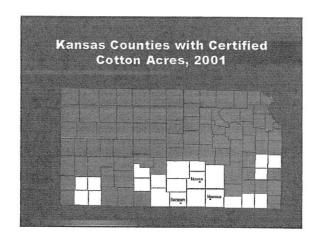

∄ ask that you support HH 2624.

### Leslie Kaufman, Director Government Relations Kansas Cooperative Council

### Senate Transportation Committee March 10, 2004 HB 2624

Chairman Donovan and members of the Senate Transportation Committee, thank you for the opportunity to comment in support of the concept embodied in HB 2624 on behalf of the Kansas Cooperative Council. I am Leslie Kaufman and I serve the Council as Director of Governmental Relations. The Council has a membership of over 180 cooperative businesses. Together, they have a combined membership of nearly 200,000 Kansans. Two of our members are cotton co-ops: Southern Kansas Cotton Growers in Winfield and Northwest Cotton Growers Co-op in Moscow.

Growth of the cotton industry in Kansas has been quite impressive in the last few years. Where as other cotton states have developed the infrastructure and regulatory frameworks for their industry over many decades, Kansas is rapidly trying to put our structures in place. The transportation arena is an area where we are trying to fit new vehicle and delivery needs into existing state and federal parameters.

I was involved in the discussions several years ago that led to the initial permitting of cotton modules. During the 2003 session, we examined the possibility of allowing a double module to be permitted. As the industry grows and develops in Kansas, we are discovering areas where laws and regulations are not keeping pace with rapid changes in the agricultural economy in this state. I am sure other conferees will provide more specific details on the cotton industry, but there is a real need to broaden the operating time frame for hauling modules. As such, we would respectfully request this committee look favorably on the proposal to broaden the time frame for hauling cotton modules.

Thank you.

### Legislative Testimony before the Senate Transportation Committee Senator Les Donovan, Chairman Wednesday, March 10, 2004

## MR. CHAIRMAN AND MEMBERS OF THE SENATE TRANSPORTATION COMMITTEE:

I am Tom Whitaker, executive director of the Kansas Motor Carriers Association. I appear here this morning representing our more than 1,200 member companies in support of House Bill No. 2624 concerning the hauling of harvested cotton transported by specially designed cotton modules.

The specially designed cotton modules must operate under a special permit issued by the Kansas Department of Transportation because the width of the vehicle exceeds the maximum width allowed for all other vehicles. Current operating guidelines only allow the operation of oversized vehicles during daylight hours. We understand that during cotton harvest the cotton gin must operate 24 hours per day. HB 2624 would allow KDOT to issue a special permit to the cotton modules to operate 24 hours a day. These vehicles would be required to meet all lighting and safety requirements of other vehicles operating at night.

KMCA wishes to express our thanks to House Transportation Committee Chairman Gary Hayzlett for including us along with the cotton growers, the Kansas Highway Patrol and the Kansas Department of Transportation in an effort to accommodate the needs of this new agricultural product produced by Kansas farmers.

KMCA asks for your approval of HB 2624. We thank you for the opportunity to appear before you today and would be pleased to respond to any questions you may have.
