Bill Introductions:

Chairman Powell introduced Susan Kang, Assistant Secretary, Department of Health & Environment, who introduced a bill on the Waste Tire Recycling Grant Program. The issue is to revoke a sunset clause.

Representative Johnson made a motion to introduce the bill. Representative Fund seconded the motion. The motion carried.

Earl Lewis, Assistant Director, Kansas Water Office, gave an overview on the State Water Plan Fund (SWPF) (<u>Attachment 1</u>), and distributed a copy of the Kansas Water Authority 2009 Annual Report (on file at the Kansas Water Office). The fund is used primarily for the purpose of implementing projects and programs identified in the State Water Plan.

The Water Authority, in the mid 80s, also wanted to expand public input in their process and developed the Basin Advisory Committees which provide insight and advice on water issues to the Kansas Water Authority and serve as a forum for community involvement. Each of the state's 12 principal river basins in Kansas has a Basin Advisory Committee. The committees were established in 1985.

Mr. Lewis provided an overview of sources of funding:

- State General Fund
- EDIF (Lottery)
- Fees and Fines
- Clean Drinking Water Fees

Mr. Lewis also reviewed some of the types of Programs and Projects:

- Water Transition Assistant Program is a five-year, pilot project to purchase and retire irrigation water rights in targeted areas; land can be dryland cropped after retirement.
- Conservation Reserve Enhancement Program is a voluntary program for landowners to enroll irrigated acres along the Arkansas City corridor.
- Reservoir Sustainability Initiative is a comprehensive approach to the protection and restoration of our surface water storage system.

In 2009, 60% of the SWPF's monies went to the State Conservation Commission which goes out to conservation and watershed districts and is used for terraces, waterways, and stream and lake stabilization projects, to name a few.

Every pond, lake, and reservoir in Kansas is impacted by sediment to some degree. Watershed and farming practices contribute to sedimentation. Storage capacity lost to sedimentation has the highest percentage at

At the conclusion of the presentation, questions were asked and comments were made by members of the Committee.

The next meeting is scheduled for January 26, 2009.
