

Written-Only Proponent Testimony of HB 2669
 For the Senate Education Committee
 March 19, 2024
 Heather Braum
 Health Policy Advisor, Kansas Action for Children

Chair Baumgardner and Members of the Committee,

Thank you for the opportunity to provide proponent testimony in support of HB 2669 on behalf of Kansas Action for Children, which is a nonprofit advocacy organization working to make Kansas a place where every child has the opportunity to grow up healthy and thrive. We work across the political spectrum to improve the lives of Kansas children through bipartisan advocacy, partnership, and information-sharing on key issues, including early learning and education, health, and economic security for families.

HB 2669 would codify the mental health intervention team (MHIT) into state law. We are very supportive of the MHIT program and applaud its successes.

Since its initial implementation in 2018 through a budget proviso (and in each fiscal year since), the MHIT program has helped students and families navigate mental health services and break down barriers in place for youth to receive mental health services, particularly in school settings.¹ The MHIT program has grown significantly since it was first implemented in 2018.²

PARTICIPATING SCHOOL DISTRICTS			
<u>Fiscal Year</u>	<u>Total Number of Students</u>	<u>Total Number of School Districts</u>	<u>Total Number of Schools</u>
2019	1,708	9	82
2020	3,266	32	180
2021	4,711	56	212
2022	5,117	55	232
2023	6,014	67	349

Now in its sixth year, the program reaches 90 school districts.³ For the first semester of the 2023-2024 school year, more than 5,700 students were served, including 477 foster youth.⁴ The statistics of the program speak for itself; the program is saving kids' lives and changing the trajectory of their lives.

The program reaches many areas of the state⁵ – but needs to continue expanding into more of the state's school districts.

The MHIT program removes numerous barriers to mental health care that negatively impact kids' lives by keeping kids in the classroom to keep learning. They only need to leave class for appointments — not missing hours of class time outside of the building. By receiving care inside the school building, students don't miss valuable class time driving to and from appointments, parents don't have to take time off work to take their kids to appointments, and the care is available year-round. The MHIT program has existed for six years as a budget proviso, and its overwhelming success and growth prove it is time for the program to be permanently codified. This is a program that works for Kansas kids.

Ultimately, we want kids and their families to access mental health care when they need it and wherever they are at. The MHIT program is showing a way to make this happen. It is rare that a program can point to such strong success, growth, and positive outcomes and lifelong trajectory changes.

When this bill was worked on the House side, we submitted neutral testimony due to different perspectives on how decisions would be made to determine which providers may participate in the program. Based on the amended version now before this Committee, we are a proponent, as we believe most of the concerns have been sorted out so we can get to the goal we all want – keeping kids healthy, in school, and getting the care they need when they need it, including in crisis situations.

We urge this Committee to pass out HB 2669 and permanently codify the MHIT program into state law. If I can be of further assistance, please contact me at heather@kac.org.
