

Testimony in Support of SB 209

Thank you Committee for having hearings on election integrity and for hearing the voices of concern across the state over their concerns following the election practices over the last few elections. I am well aware that Kansans are not the only ones concerned about this and know for two years several states have tried to tighten their elections where fraud and corruption could take place.

One such concern is the prolonged process of the election. Allowing advance ballots to come in after election day seems rather odd since the people voted that way because they wanted to vote early! People want to have the election settled as much as possible on election day. We have suffered over commercials attacking their opponent being repeated for weeks before the date. We get pretty disturbed when ballots show up mysteriously after the date.

Please vote this bill out of committee to have it debated on the floor of the Senate and thank you again for hearing the voice of the people who want to make sure our elections are truly safe and secure.
