

Palliative Care 2024 Legislative Priorities Douglas Neal, MPH Palliative Care Program Manager

Karin Porter-Williamson, MD PCQOLIAC Chair Donna Yadrich, MPA Co-chair

Definition of Palliative Care

- Palliative care is comprehensive, interdisciplinary care for patients living with serious, potentially life-threatening or life-limiting conditions, with the goal of improving quality of life for both the patient and family.
- This approach to care prevents and relieves suffering through the early identification, assessment and treatment of pain and other problems, whether physical, psychosocial or spiritual.
- Palliative care is delivered based on needs, not prognosis.
- It is appropriate at any age or any stage of an illness and can be delivered along with curative treatment.

Serious Illness Defined for a Population Health Approach

"Any condition that carries a high risk of mortality and either negatively impacts a person's daily function or quality of life, or excessively strains their caregivers." (Kelley, 2018)

Source: Kelley AS, Bollens-Lund E. Identifying the Population with Serious Illness: The "Denominator" Challenge. J Palliat Med. 2018;21(S2): S7-S16. doi:10.1089/jpm.2017.0548

Palliative Care Council Representation

- Thirteen Legislatively Appointed Members.
- Palliative Care Experience and Expertise in:
 - Interdisciplinary palliative care medical, nursing, social work, pharmacy and spiritual guidance.
 - Delivery models in a variety of inpatient, outpatient and community settings and with a variety of populations including pediatric, youth and adults.
- At least two members shall be board-certified hospice and palliative medicine physicians or nurses.
- At least one member shall be a patient or a caregiver.

KANSAS STATUTES

65-1,261. State palliative care consumer and professional information and education program; creation; duties of department of health and environment.

History: L. 2018, ch. 66, § 4; July 1.

65-1,260. Palliative care and quality of life interdisciplinary advisory council; creation; membership; duties.

History: L. 2018, ch. 66, § 3; July 1.

Palliative Care Ensures Value

- A strong evidence base exists proving its impact on quality, satisfaction, consumer demand, and cost. Because it focuses on the highest need and highest cost patient segment, palliative care is essentially a strategy for population health.
- Palliative care focuses on relieving the symptoms and stress of any serious illness, ideally alongside curative treatment.

Source: CAPC

Improved knowledge of and access to Palliative Care can improve value in KanCare.

- 67% of \$4.4 Billion dollars in KanCare is expended for services of beneficiaries with serious illness, disability and/or older adults/frail.
- 58.2% is spent for their medical services (hospital and physician fees).

National Workforce Shortage

- < 6,400 hospice and palliative medicine physicians in the U.S.
- One palliative care physician to 1,200 people living with serious illness
 - One cardiologist for every 71 persons having a heart attack.
 - One medical oncologist for every 141 people with newly diagnosed cancer.
- Increased Need for Palliative Care
 - Five percent of people with highest health needs account for half of all expenses.
 - Rise in aging population (1 in 5 will be over 65 years by 2030, and today 25% of rural populations are people 65+).
 - Advances in health care allow more adults and children to live with serious and chronic illnesses.

Kansas Workforce Shortage (board/specialty certified)

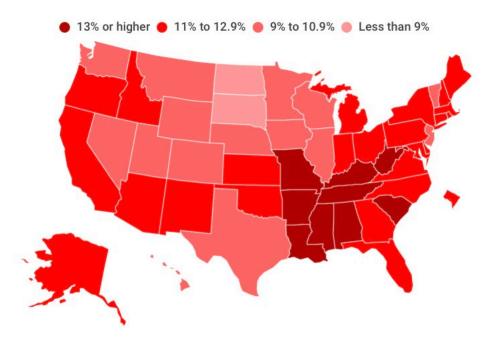

- Physicians
 - 21 palliative care of > 12,000 (10,500 Medical and 1,700 Osteopathic)
- Advanced Practice Nurses
 - 13 palliative care of > 7,500 (5,700 Nurse Practitioners, 1,200 Nurse Anesthesiologists, 466 Clinical Nurse Specialists, 100 Nurse Midwifes)
- Registered Nurses
 - 49 palliative care (no pediatric) of > 50,000
- Social Workers
 - Three palliative care of 7,997

Health Care Chaplain data is not readily available but is likely to be limited in the state of Kansas.

Kansas Workforce Shortage (of adults with illness or isability)

- Unpaid Family Caregivers
 - 340,000 residents are unpaid family caregivers
 - 11.6% of Kansans (National is 11.5%)
 - > 4x licensed Kansas health care workforce
 - Nearly 7x the largest health care workforce
 - Registered nurses = 50,000
 - 340 million hours of care provided
 - \$4.5 billion economic value

Kansas Professional Workforce Shortage and Immediate Needs

- Meager availability of Palliative Care professionals.
- Statewide distribution of these providers accentuates workforce shortages.
- Reliance on Primary Care and Frontline Providers is necessary to meet immediate needs - especially in rural and frontier areas.
- Primary Care and Frontline Providers need additional:
 - Training.
 - Education.
 - Access to sub-specialty care.

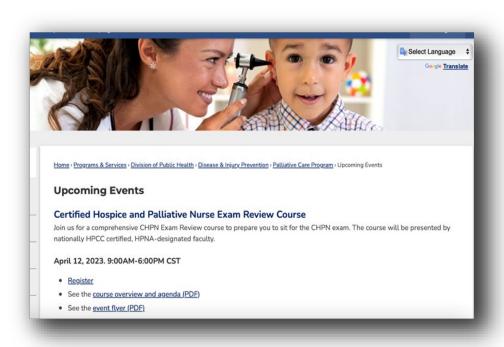

The Council Identified Four Priority Areas in the 5-Year State Plan

- 1. Access
- 2. Education and Health Care Workforce Training
- 3. Public and Community Awareness
- 4. Emergency Preparedness and Disaster Planning

Priority 2: Education and Health Care Workforce Training

- Programs to recruit, train and retain highly skilled palliative care clinicians.
- Education on primary palliative care for all disciplines.
- Enhanced support for unpaid caregivers.
- All of these are crucial in to address our State's palliative care workforce shortage.

Source: kdhe.ks.gov/2000

Education and Health Care Workforce Training Recommendations

- 1. Increase primary palliative care education in the current workforce caring for those with serious illness.
- Increase palliative care in the future workforce caring for those with serious illness.
- 3. Increase community and home-based support to reduce caregiver burden and enhance their knowledge and skillset in caring for someone with serious illness.
- 4. Improve access to community and home-based services to individuals with serious/chronic illness.

Essential Educational Need

- Skill Building for Primary Palliative Care
 - Serious illness conversation/communication skills (for example, initiation of palliative care, goals of care).

Educational Strategy

- Project ECHO (Extension for Community Health Care Outcomes)
 - Moving Knowledge, Not Patients: ECHO brings the right knowledge to the right place, at the
 right time with case-based specialty medical education equipping primary clinicians to care for
 patients in their home community.
 - Research supports ECHO as an effective modality to impact provider and patient outcomes.

Impact of Project ECHO models of medical tele-education: a systematic review. *J Gen Intern Med.* 2019;34(12):2842–2857. doi: 10.1007/s11606-019-05291-1. 2) Osei-Twum JA, Wiles B, Killackey T, Mahood Q, Lalloo C, Stinson JN. Impact of Project ECHO on Patient and Community Health Outcomes: A Scoping Review. Acad Med. 2022 Sep 1;97(9):1393-1402. doi: 10.1097/ACM.0000000000004749. Epub 2022 May 24. PMID: 3561291.

Project ECHO

- Since 2015, The University of Kansas Medical Center has trained over 3755 frontline doctors, advanced practice clinicians, nurses, social workers, pharmacists, and veterinarians in rural, frontier and urban settings.
- 2022 ECHO Series on Palliative Care:
 - "Establishing a Kansas Community of Practice to Improve Lives of People Experiencing Serious Illness"
 - 200+ participants across Kansas attended the four courses in June 2022
 - "Pain Management for People Living With Serious Illness"
 - 138 participants across Kansas attended the five courses in October 2022.
- Over 90% of attendees reported they would like access to a long-term Palliative Care educational option.

The Request

- 1) Establish a mechanism to fund a Project ECHO Palliative Care Center of Excellence for sustainable delivery of Primary Palliative Care education across the State.
 - There is precedent in other states (Missouri, Texas, others)
 - A Center of Excellence will allow a committed community of practice of providers to develop these skills over a period of 24 months.
 - Missouri's ShowMe ECHO, Texas Bill: Providing Project ECHO® to Support Our Community in
 Addressing Child Mental Health Needs When and Where it Matters Most, Medicaid Financing Models for
 Project ECHO, Financing Project ECHO: Options for State Medicaid Programs, Medicaid Financing For
 Project ECHO: Strategies for Engaging State Medicaid Officials requiring annual licensure activities to
 include a minimum of palliative care education hours,
- 2) Create incentive for health care providers to seek the education by requiring annual licensure (physician, nursing, social work) CE activities to designate a portion of existing required hours be focused on pain/symptom management and/or serious illness conversation/communication skills.

Gratitude for Legislative Support

- Prioritizing Palliative Care by funding the program and establishing the Council.
- Lending expertise from Legislator Council colleagues, Senator Gossage and Representative Ellis and appointing Council nominees to fill position vacancies.
- Today's opportunity to strengthen our relationship with you to advance access and workforce priorities.
