**Neutral Testimony on SB 44**

Thank you for the opportunity to testify on SB 44. The Kansas Promise Scholarship Act, first passed four years ago, has been amended nearly every session since. This program is more than just a scholarship; it serves as an innovative economic development tool designed to address one of Kansas' most pressing challenges: the shortage of a skilled workforce.

The Kansas Promise Scholarship is especially beneficial to lower-middle-class students whose parents earn too much to qualify for Pell but still cannot afford to pay for college without taking on significant student loan debt. **The proposed expansion of eligible institutions under SB 44 is not something that Kansas Community Colleges oppose. However, there are concerns about whether there is enough funding to accommodate additional scholarship recipients.** The Promise Scholarship allows students up to 36 months to complete their programs, which means the Kansas Board of Regents (KBOR) must "reserve" funds for students who are still working toward their degree or certificate. This reservation requirement limits the availability of funds for new students.

In fact, this fall KBOR informed colleges that no additional Promise Scholarships could be awarded because the funds were nearly depleted. To avoid this issue when expanding the program to additional institutions, it is critical to increase funding. **The current \$10 million cap needs to be increased to reflect the increased demand. We support the underlying bill's proponent request for an additional \$5M to the scholarship fund and believe increasing the cap to \$15M will ensure the program can continue to support students pursuing education in Kansas' most in-demand fields while living and working in the state for at least two years after graduation. Unlike other scholarships which may pay to educate students and they leave, this is one of the only undergraduate scholarship that requires students to live and work two years in Kansas post-graduation creating a significant return on investment for each scholarship dollar provided.**

For those not familiar with the scholarship, the Kansas Promise Scholarship Act is a "last dollar" program, which means it covers the gap between other financial aid, such as Pell Grants, and the total cost of education. It specifically targets the most in-demand occupations in Kansas, increasing access to two-year skilled trades programs for high school graduates and Kansas residents seeking to reskill or upskill. This approach also serves as a strategic economic development tool by funneling scholarship funds into the state's most critical industries, helping businesses fill urgent talent gaps now and in the future.

To help ensure students "repay" their investment in this program, recipients must live and work in Kansas for two years after completing their certificate, associate's degree, or higher-level program. Kansas Community Colleges believe this residency requirement not only helps retain residents in the state but also provides local businesses with an opportunity to hire highly skilled graduates. The majority of the Kansas Promise Scholarship recipients are studying in health care related occupations, an occupation for which the legislature has been focused on increasing the available workforce.

As a "last dollar" program, the Kansas Promise Scholarship is more affordable than it might seem. The scholarship only kicks in after all other financial aid—such as Pell Grants—has been applied. For example, the average Pell Grant award for Kansas Community College students in the 2023 academic year was \$3,756, while the average cost of tuition, fees, and books/materials per semester is approximately \$2,323. In this case, the Pell Grant would cover the full cost of tuition, fees, and materials, and the student would have remaining funds to apply toward housing. This means that, in many cases, students won't even need to access the Kansas Promise Scholarship because other forms of aid cover their educational expenses. Over 21% of Kansas Community College students receive Pell Grants. The average Promise Act awards for each type of institution currently eligible is listed below:

	Minimum Promise Act Award	Maximum Promise Act Award	Average Promise Act Award	Median Promise Act Award
Community Colleges	\$2	\$16,498	\$3,059	\$2,537
Technical Colleges	\$14	\$20,000	\$5,297	\$4,432
Independent Institutions	\$13	\$8,658	\$3,955	\$3,665
