To the committee,

With JFK Jr. as our Health CZAR I'm really not looking forward to TB nor Measles; still not looking for my grandkids to get polio; and very hopeful that we can quell the current Bird Flu outbreak as we have now stimmed the US Health System where they are no longer doing research for next year's flu virus - so we will all be out here exposed.

At this very juncture in our history - for you to entertain removing the authorization for a county or joint board of health or local office to prohibit public gatherings when necessary for the control of infectious or contagious diseases - looks especially stupid. You are trying to legislate all Kansas outbreaks from the comfort of your Topeka chair. Do you really think local control is this bad? Or are you trying to shove your anti-masking agenda on unsuspecting constituents?

Would you, for example, send your children to school with measles? Are you that parent? The one that thinks their right to exist as diseased as possible and to come to school and give it to our children too - is that you??!!?? Have you thrown your lot in with nonsensical non-science?

No, this is a bad bill. You are usurping local control. I hope you have second thoughts about what you are doing to Kansas and especially to our children. HISTORY WILL REMEMBER. YOUR VOTE IS WRITTEN DOWN.

Please oppose SB29
