Pro SB 29

Dear Sen. Gossage and Committee: I will testify in favor of SB 69 because, to paraphrase a well-known axiom, "The power to ~~tax~~ isolate and quarantine is the power to kill." It is incredible that once again the KDHE attempts to exercise tyranny over We-The-People; 'incredible' because we have just emerged from the dark night of Fauci and the (previously respected) NIH repeatedly lying to us all about Covid and its treatments, not to mention its very definition as a "pandemic". We just opposed them vociferously a few days ago when this committee heard testimony re: SB 19.

"Isolation and quarantine" was used as a political tool recently as aforementioned. We will by no means tolerate more of the same. We all watched as our tyrannical politicians-some cleverly disguised as MDs and health-care workers-forced elderly pts. to die alone in hospitals w/o their family by their side or, in the alternative, forced them to return to the very nursing homes wherein they had been infected with the Covid pathogen. If the KDHE wants to find a population amenable to that, they should go to Red China which "quarantined and isolated" its people by nailing iron bars across the doors of their residences until all inside starved to death. <https://youtu.be/Aj8nfD6cy9s?si=OF0Aujg-f9qEIAEV>
