

My name is Eric Kueser, and I am handicapped.

I was born with a genetic disorder known as hip dysplasia.

It's very painful, to the point I had trouble even walking.

The alkaloids changed all of that.

Before I started taking them, I was in so much pain that I had to be pushed in a wheel chair at the airport and cruise port.

It was embarrassing.

My love of travel was becoming more difficult

Thanks to 7oh, I can now walk it all myself.

Because of my handicap I had ballooned in weight.

I was 305 pounds.

I couldn't stand for too long, I wasn't sleeping, everything constantly hurt.

My life was miserable.

I started taking Advanced Alkaloids 7oh in December on 2024, and I haven't looked back.

I'm no longer in constant pain, it doesn't hurt to lay in bed, it doesn't hurt to stand, it doesn't hurt to sit too long.

I'm now able to walk.

I am able to walk so good, I am blowing out my daily step counter.

I am able to walk so good that I've lost 95 pounds

I'm healthy. I'm Thriving. I'm here for my life and my family.

I won't die an early obese life thanks to the 7oh Alkaloids.

I never took pills or narcotics for my pain like others have

I never had done street drugs like others have

Opioids are a problem in this country and you are trying to ban a legal natural alternative to opioids and the fentanyl epidemic?

Politicians talk about fentanyl overdoses have dropped and pat themselves on the back claiming it's because of the availability of narcan.

No.

Overdoses have dropped because of a safe, legal alternative

7 O H

7oh Gave me my life back, and I will forever be grateful
