

January 26, 2026

The Honorable Virgil Peck, Chairperson
Senate Committee on Agriculture and Natural Resources
300 SW 10th Avenue, Room 144-S
Topeka, Kansas 66612

Dear Senator Peck:

SUBJECT: Fiscal Note for SB 364 by Senate Committee on Agriculture and Natural Resources

In accordance with KSA 75-3715a, the following fiscal note concerning SB 364 is respectfully submitted to your committee.

SB 364 would reinstate the authority of the Department of Wildlife and Parks to issue resident senior combination hunting and fishing licenses to those 65 years of age or older starting on January 1, 2026. This authority expired on June 30, 2020, and allowed the amount of each license to not exceed one-eighth of the fee for a general combination lifetime hunting and fishing license. Currently for a Kansas kids lifetime combination hunting and fishing license, children five years and younger pay an amount not to exceed \$300 and children six and seven years of age pay an amount not to exceed \$500. Under the bill, children 5 years of age and younger would pay an amount not to exceed \$300 and children six to 15 years of age would pay an amount not to exceed \$400 for the lifetime license. The bill would also remove the expiration date of July 1, 2032, for issuing kids lifetime combination hunting and fishing licenses.

According to the Department of Wildlife and Parks, seniors currently pay a higher price for their hunting and fishing licenses than what is proposed in the bill. They currently pay \$90 for a five-year license (\$180 to purchase two five-year licenses). Senior licenses are for 10 years and would cost \$120 under the bill, therefore, the Department would lose \$60 (\$180 - \$120) per license. Reintroducing the senior combination hunting and fishing license at a substantially reduced price would result in a decrease in revenues of an unknown amount beginning in FY 2027.

The Department states that the changes in the bill relating to the age range and the price of the kids lifetime hunting and fishing license would have an unknown effect on fee fund revenues.

The bill would add ages eight to 15 to be able to obtain a lifetime license, this could increase the number of lifetime licenses sold, which could also reduce the number of yearly licenses sold to the same age group. The agency cannot estimate what the overall fiscal effect would be, but it estimates the long-term effect would be a loss in revenue. The Department also states that the removal of the expiration date for the kids lifetime combination hunting and fishing licenses would not have a fiscal effect.

Because the changes for senior and kids lifetime combination licenses would also require a regulation change, the Department notes that these changes would not take effect until FY 2027. In addition, the revenue from the senior and kids lifetime combination licenses is used to calculate the amount of federal funds the agency receives. However, the agency cannot estimate the potential increase or decrease in federal funds, if any. Any fiscal effect associated with SB 364 is not reflected in *The FY 2027 Governor's Budget Report*.

Sincerely,

A handwritten signature in black ink, appearing to read 'Adam C. Proffitt', followed by a stylized flourish.

Adam C. Proffitt
Director of the Budget
