## TESTIMONY

By  
Nadine Stannard, Owner & President  
Associated Material & Supply Company Inc.

Regarding HB 2896

February 15, 2012

Mr. Chairman and Members of the Committee,

My name is Nadine Stannard, President of Associated Material & Supply Co. We own and operate two sand and gravel production sites in South Central Kansas.

Included with this copy of my testimony is a worksheet that was never meant for public display. It obviously serves as an in house tracking document. It is a quick reference sheet for me to keep track of the permits for the two production sites of Associated Material.

I have a file drawer full of permits. I found that was adequate to keep current with various expiration dates, so I devised an index. That wasn't sufficient, so I created the reference sheet and filed it in a date file to review every January 1<sup>st</sup>.

Each time a permit comes due for expiration, DWR writes a letter. I respond with a letter. Seldom is only one letter from each of us sufficient to satisfy the required action. Phone calls are needed for clarification more often than not.

All of this takes time for DWR as well as for me and all other producers. I have included a copy of a recent letter sent to DWR in response to a request for an extension of a permit.

We hear about paper work reduction and reducing the regulations for business. Often it is just talk because no one can find a way to accomplish either.

This legislation will help with both.

I will be glad to answer any question you might have.

Thank you

Nadine Stannard

Re: Appropriation of Water  
File No. 41,209

Dear Sir/Madam:

In response to your request, the Chief Engineer has extended until **December 31, 2021**, the time in which to perfect (develop) the proposed appropriation and maintain records from which the amount of water actually diverted during the calendar year may be readily determined under the above referenced file.

You are required to report your water use each year to the Chief Engineer by March 1 following the end of the previous calendar year so that the extent of use becomes a matter of record to protect your right. A water use report form will be sent annually, to be used by you, for reporting your water use to this office.

If you have any questions, please feel free to contact me (785-296-3494) at this office. If you wish to discuss a specific file, please have the file number ready so that we may help you more efficiently.

Sincerely,

Douglas E. Bush

RE: DWR Term Permit # 20109138

Dear Lane:

Thank you for the recent receipt of Term Permit # 20109138 to cover our wash water operation. I have reviewed the terms and conditions carefully and noticed a requirement for a water meter. The purpose of this letter is to request a waiver of this requirement for the following reasons:

1. The permit is used to cover the diversion to pump clean water into the screening wash plant via a portable floating pump located in the pit. As such, it is almost impossible and certainly cost prohibitive to fit a water meter.
2. In addition, the screening plant itself is portable and subject to relocation within our property as dredging operations progress.
3. The pump, when used, pumps clean water into the wash plant to flush silt and dirt from the sand product; after which almost 100% of the water is returned to the lake. It is a nonconsumptive use.

Associated Material maintains a dredge log and each day registers the hours the dredge and plant components operate. This allows us to keep an accurate record of the hours pumped. This should accurately provide the data on acre/foot diverted should DWR ever need it.

Your consideration of this request is appreciated. Please advise if you have any questions.

Sincerely,

*Nadine Stannard, Pres.*
