Electronic communications for hearings on HB 2330 to be held 1 24 2012, at 1:30 room 784, Docking Building, House and Human Service Committee weekly meeting. Credentials Dr. Brooks J. Kelly, economic development submitted to Governor Brownback in July 2011.

I met Dr. Brooks J. Kelly some 30 years ago through our mutual love of geology and rock collecting. I have studied under and been apprentice to Brooks J. Kelly PhD. since we made acquaintance. Several times law enforcement has seized my computers because they held these files of intellectual property research documents.

Brooks Kelly, PhD

Staff Scientist; Brooks Kelly Research LLC; 2011 (Patent Applications)

1. Formula and preparation method for a Cannabis healing salve
  2. Formula and preparation method for a Cannabis healing spray
  3. Cannabis formulation and extraction methods
  4. Enhancing therapeutic potency and non-psychoactivity of Cannabidiol (CBD) by formulated association with small molecules
  5. Enhancing therapeutic potency of D-9 Tetrahydrocannabinol (D-9 THC) while decreasing psychoactivity by formulated association with small molecules
  6. Enhancing therapeutic potency of D-9 Tetrahydrocannabinol (D-9 THC) while increasing psychoactivity by formulated association with small molecules
  7. Enhancing therapeutic potency of D-9 Tetrahydrocannabinol (D-9 THC) while negating psychoactivity by formulated association with Cannabidiol (CBD) and small molecules
  8. Enhancing therapeutic potency of D-9 Tetrahydrocannabinol (D-9 THC) while decreasing and negating psychoactivity by formulated association with Cannabidiol (CBD) and small molecules
  9. Formula and composition method for healing salve
  10. Formula and composition method for healing soap
  11. Formula and composition method for a healing sore throat spray
  12. Healing syrup derived by formulated association with small molecules
- Former Director of Mycobiological Farms, LLC; Nederland CO; 2005-2010  
Colorado Bioneer; Fungal, Plant and Essential Oil Formulations;  
Bioneer's Conference Colorado State University; 2009  
Former Director of Colorado Organic Mushroom Farms, LLC; Rollinsville CO; 2003-2005  
Postdoctoral Fellowship #2: Human Cancer Genetics; University of Nebraska Medical Center (UNMC); 1996-1997  
Postdoctoral Fellowship #1: Molecular Biology of human brain & inner ear; Boystown National Research Hospital (BTNRH); 1995-1996  
Doctoral Thesis: DNA Repair And The Dictyostelium discoideum Cell-Cycle; PhD in Molecular and Cell Biology; the Pennsylvania State College; 1994  
Graduate Student: DNA Repair and Cell Cycle Research; Department of Molecular & Cell Biology; Pennsylvania State University; 1986-1993  
Bachelors, Biological Science in Biochemistry and Molecular Biology; University of Nebraska-Lincoln; 1980-1986  
High School Diploma; West Holt High; Atkinson, Nebraska; 1976-1980

July 4, 2011, My act of patriotism.  
Governor Sam Brownback  
Representative Gail Finney  
Wichita Mayor Carl Brewer  
Council Member Lavonta Williams  
Dave Vander Griend,  
President and CEO of ICM,  
Board Member Bioscience Authority

I would like to introduce you to an outstanding scientist, and a plan for Kansas to become a major player in the Cannabis Fungi Medical Manufacturing Industry. Mentholethum of the 21st Century.

Brooks J. Kelly, Ph.D., received cannabis license # 000001 in 2001 state of Colorado, Microbiologists, has researched cannabis and fungi for 30 years. When I suggested he contact the Bioscience Authority in Kansas, his comment was "are they advanced enough for my skills."

Dr. Kelly holds numerous patents on medical cannabis, which treat ailments with out the side effects of "high". After 13 years in Colorado, Dr. Kelly is disappointed the humanitarian idealism has been lost to commercialism.

Medical Cannabis Relief can be obtained without smoking the herb, without the side effect of high. Dr. Kelly holds these patents, & or patent applications, to manufacture organic salves, tinctures, targeting arthritis, cancer, dilation of lungs, vision, muscular degeneration, anti-aging, dissolving of tumors, reduce pain. His goal is to market these patents as over the counter preparations at low cost to consumers. Rather than Kansas enduring an economic melt down over future medical cost, proactive response is positioning with organic medicine.

The Bioscience Authority could securely control the drug quality cannabis growth needed to manufacture medicines. The industrial variety necessary for CBD's can be widely cultivated, without any threat to society. The scraps of the industrial hemp after medical qualities are harvested, can be useful in new industries as carpets, animal food, paper, cosmetics, nutritional health, pyroethic conversion of biomass for numerous energy fuels. Hemp Board is the most profitable, and sequesters the greatest amount of carbon for 100 years. In January 2011, I presented Brownback appointed Kansas Deputy Secretary of Agriculture with Hemp Board sample, & numerous products presently market available, sadness, no Kansas farmer profits from cultivation of hemp crop, all imported.

The prompt for urgency, mandated by the collection, and retention of the greatest number of cannabis sativa and indica strains. There will no late players in the Cannabis Industry, only franchisees.

I am not asking the state to legalize marijuana. Recently the DEA rescheduled THC, not the whole plant, to allow pharmacology research. I am suggesting while the opportunity for the vision I offer is rare, the expert microbiologists is possibly available, and his patents and pending patents, will make some location in America quite wealthy. Why not allow Kansas Bioscience Authority to shine, leading other states in resolve of their medical necessity of cannabis. Dr. Brooks J Kelly is an exceptionally skilled intellect.

Brewer, Williams, & Finney, have been provided Dr. Kelly's medical

cannabis scientific research document: part I. Proving cannabis medicine prohibits cancer from the ability to absorb the protein it needs to feed & live, [i.e. From Canada, where actor Michael Douglas went to cure his cancer. - [www.phoenixtears.ca](http://www.phoenixtears.ca) "expected results in 90 to 120 days".] The world knows Cannabis Medical Values, the US denies it. High Plains & Griend in early 1990's grasped pyrolytic conversion, and encouraged the City of Wichita toward energy farming & fuel independence.

"Transforming the Vision Into Reality: How To Make It Happen by Sam Brownback, Kansas Secretary of Agriculture," a fabulously thoughtful document sharing his vision for the future of agriculture in Kansas. So beautifully written. Cannabis Medicine and Hemp are Governor Brownback's vision of "presently unknown crops". Let us allow cannabis to develop economic growth in Kansas. To restore dignity for the plant our forefathers honored by embracing the murals of plenty, prosperity, crowning the rotunda of the Kansas State Capitol with wreaths of hemp leaves. Billions of dollars are on the table, year after year, reliably for decades.

Please Google: Brooks J. Kelly, Ph.D, and appreciate his numerous qualifications. Accepting prosperity for Kansas should the Bioscience Authority recognize, and attract Dr. Kelly's skills. It is my opinion this arrangement would be good for Dr. Kelly, Kansas Bioscience Authority, K-State University, Kansas Farmers, & Kansas Agri-Business Investors. Jobs for Kansas, a good thing.

In Dr. Kelly's own words, "this Jedi works for God"
