

THE OFFICIAL SPONSOR OF BIRTHDAYS.™

TO:

SENATE FEDERAL AND STATE AFFAIRS COMMITTEE

SENATOR PETE BRUNGARDT, CHAIR

FROM:

CHRISTOPHER J. MASONER,

AMERICAN CANCER SOCIETY

DATE:

MARCH 15, 2012

RE:

SB 462 – RELATING TO CIGARETTES AND OTHER TOBACO PRODUCTS

Senator Brungardt, Members of the Committee, thank you for the opportunity to provide testimony in support of SB 462.

The American Cancer Society actively encourages increases in the excise taxes levied against cigarettes and other tobacco products as a public health "win" that will reduce the use of these harmful products—especially among Kansas kids.

Other Tobacco Products Should Not Receive Preferential Taxation

In Kansas, there is a large difference between the way cigarettes are taxed and the way all other tobacco products are taxed. The excise tax on a pack of cigarettes is set at \$0.79 per pack, or just under four cents per cigarette. However, the tax on all other tobacco products (OTP)—such as chew, snuff, snus, and cigars—is only 10% of the wholesale sales price. By comparison, the cigarette tax is roughly equal to 30% of the wholesale price. In practical terms, a pack of cigarettes can cost around \$5.00 or more, while a pack of snus, little cigars, or a can of chew may cost only \$2.50. This difference makes OTP much cheaper per dose than cigarettes, and effectively encourages users—especially kids with less disposable income—to choose the lower-priced OTP. There is no logical reason for OTP to receive preferential treatment, and the law needs to be changed.

- Other Tobacco Products Cause Health Problems, Too. The health problems associated with cigarettes are well-known and have been for many years. Thanks to misleading tobacco company marketing, however, some may still believe that other tobacco products are a safe alternative to cigarettes. The fact is that there is no tobacco product that is risk-free. In particular, smokeless tobacco has been shown to cause cancer in the mouth, esophagus, stomach, and pancreas.
- Other Tobacco Products Are The "Future of Tobacco". As more people have grown to
 appreciate the health hazards associated with smoking, cigarette use has declined.
 Several years ago, tobacco companies marketed smokeless tobacco as a "safer"

Senate Federal and State Affairs Committee SB 462 March 15, 2012

alternative to cigarettes in order to keep smokers addicted and to initiate new tobacco users. In recent years, as smoke-free laws have become more and more prominent, tobacco companies have begun to market smokeless products as a way for smokers to get their "fix" in places where they cannot smoke. Brands like Camel and Marlboro market their snus with slogans such as "Be Free" and "Go Anywhere" to appeal to younger smokers and promote dual tobacco use (cigarettes and smokeless). One company (Stonewall) even calls its dissolvable tobacco mints "The Future of Tobacco."

- Kansas Laws On Taxation Of OTP Are Badly Out-Of-Date. The Kansas tax on OTP was first enacted in 1972, and the law has not been updated since then. In that time, every state in the nation has updated its OTP laws to keep pace with the tobacco industry, while Kansas has fallen farther behind. As a result, Kansas ranks among the lowest OTP taxes in the nation. We have attached a chart compiled by the Campaign for Tobacco Free Kids providing a state-by-state breakdown of OTP rates.
- The Tax On OTP Should Be Equalized With The Cigarette Excise Tax. In order to equalize the tax on OTP with the cigarette excise tax, the OTP rate should be raised to 30% of the manufacturer's price. The tax on OTP should also be "pegged" to the cigarette excise tax such that tax disparities are avoided in the future.
- <u>Little Cigars Should Be Taxed As Cigarettes</u>. So-called "little cigars" are tobacco products that are the same size and shape as a cigarette, have filters like cigarettes, are sold in packs of 20 like cigarettes, and are smoked like cigarettes. The <u>only</u> difference between a cigarette and a little cigar is that one is wrapped in paper and the other is wrapped in a paper-like substance made from tobacco leaves. However, because of the way the tax laws are written, cigarettes are taxed at \$0.79 per pack, while the tax on little cigars may only be around \$0.20 per pack (depending on the manufacturer's price). This is a loophole that needs to be closed by providing that little cigars are treated as cigarettes for tax purposes.
- New Revenue Could Fund Tobacco Control Programs. If the above policies are implemented, the Campaign for Tobacco-Free Kids estimates the State of Kansas would see approximately \$10.8 million in new revenue. The State's Tobacco Use Prevention Program is currently funded at a level of \$2.3 million (though the current House Appropriations bill cuts that funding by \$650,000), compared to the Centers for Disease Control's recommendation of \$32.1 million. Dedicating the new revenues generated from fixing the OTP tax to tobacco control measures would multiply the impact and help reduce tobacco consumption even more.

STATE EXCISE TAX RATES FOR NON-CIGARETTE TOBACCO PRODUCTS

Smokeless Tobacco Taxes, http://www.tobaccofreekids.org/research/factsheets/pdf/0180.pdf initiation. See Campaign Factsheets, Smokeless Tobacco and Kids, www.tobaccofreekids.org/research/factsheets/pdf/0003.pdf and Benefits from Increasing use smokeless tobacco.1 It is important to raise tax rates on all tobacco products to prevent switching to a lower-taxed and lower-priced tobacco product or WV also have two of the highest rates of smokeless use by high school males (21.3% and 24.2%). Nationwide, 15.0% of high school boys and 2.2% of girls those states that tax moist snuff at a percentage of price, the average rate is roughly 39%, despite very low rates in SC (5%), TN (6.6%), and WV (7%). TN and Every state except for PA has at least some tax on non-cigarette tobacco products. FL does not tax cigars, but does tax all other tobacco products. The highest rates, as a percentage of wholesale/manufacturer's price, are in WI (100%), WA (95%), VT (92%), MA (90%), RI (80%) ME (78%), and AK (75%). Of

² Each state defines "snuff" differently, but it is usually defined as any powdered, finely cut, or ground tobacco that is not intended to be smoked.

³ California's other tobacco product tax is based on the state's cigarette tax rate and changes every year.

^{*} Dry snuff only. A unit is defined as a container less than 1.5oz. Moist snuff is taxed at the same rate as chewing tobacco

Campaign for Tobacco-Free Kids, March 6, 2012 / Ann Boonn

Sources: Orzechowski & Walker, The Tax Burden on Tobacco, 2010; press reports; state tax officials; U.S. Alcohol and Tobacco Tax and Trade Bureau; USDA Economic Resource Service. Manufacturer's (Mfr.) Price is the price charged to wholesalers/distributors by the tobacco company that makes the product. Wholesale (w/s) Price is either the price charged to retailers by the wholesalers/distributors or, in some states, equal to the Manufacturer's Price. Parallel tax rate is based on the cigarette tax and the taxable wholesale price of cigarettes versus other tobacco products.

More information on other tobacco product taxes is available at http://www.tobaccofreekids.org/facts issues/fact sheets/policies/tax/other products/.

BENEFITS TO KANSAS FROM INCREASING ITS TAX RATES FOR OTHER TOBACCO PRODUCTS

Kansas' different tobacco tax rates are inconsistent – taxing tobacco products other than cigarettes at much lower effective rates than cigarettes. Increasing the state's tax rates for other tobacco products (OTPs) would increase state revenues, promote public health, and reduce healthcare and other costs caused by tobacco use throughout the state. The following table shows the different current tax rates:

Current T	ax Rates
Cigarettes	\$0.79 per pack
Other Tobacco Products	10% wholesale price

Increasing the state's OTP tax rate to 30% of the wholesale price would produce public health benefits by stopping under-taxed, less-expensive tobacco products from serving as a gateway to cigarette addiction for kids or as an alternative to quitting or cutting back for existing smokers. In addition, it is well established by scientific research and the experiences of numerous states that raising the tax rates on any tobacco product will reduce use rates, especially among youth, thereby reducing related harms and costs, as well. At the same time, the rate increases will also bring in more state revenue because the increased tax rate will bring in far more new revenue than is lost by the reductions to the levels of tobacco product consumption and sales prompted by the tax rate increase.

The following table shows the revenue increases and some of the public health benefits and cost-savings Kansas would enjoy by raising its tax rates on other tobacco products 30% of the wholesale price.

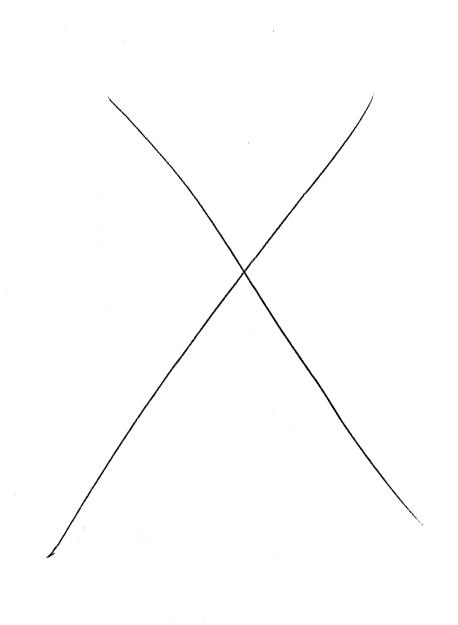

Additional New Annual OTP Revenue	\$10.80 million
Consumption Decline	7.0%
Youth User Decline	13.0%

Revenue projections are conservative, assuming both consumption declines and possible new smuggling and tax evasion after the rate increases. Projected new revenues are net new revenues above the prior year's revenue total.

Kansas' percentage-of-price tax system is the best way to tax OTPs because they come in a wide variety of different types, styles, weights, doses, and prices. A percentage-of-price tax keeps up with inflation and product price increases (which stops state revenue erosion) and works more effectively to prevent and reduce tobacco use, especially among kids. It is also a flat tax that applies the same tax rate to all the tobacco products. While more expensive tobacco products pay a larger amount per dose, that simply means that the higher the revenues and profits per dose the higher the tax amount (and they still pay the exact same percentage tax rate). Nevertheless, the state could add a minimum tax to its percentage-of-price tax on OTPs to stop some tobacco products from evading proper tax payments (and increasing overall tobacco use) when they are dumped on the market at bargain basement prices or sold at predatory prices to steal market share away from properly priced products.
