

2012 Kansas Statutes

65-6008. Infectious disease testing; certain persons in contact with body fluids; hearing; disclosure of test results. (a) If a corrections officer, emergency services employee, law enforcement employee or juvenile correctional facility staff comes in contact with or otherwise is exposed to transmission of body fluids from one or more other persons while performing duties within the scope of such employee's duties as an employee, the head of the employing agency or entity may make application to a court of competent jurisdiction for an order requiring such other person or persons to submit to infectious disease tests.

(b) Such application shall include an allegation that the person or persons sought to be tested have been requested to submit voluntarily to infectious disease tests and have refused the tests. When any such application is received, the court shall hold a hearing forthwith and shall issue its order thereon immediately if the court finds that: (1) There is probable cause to believe that the employee involved has come in contact with or otherwise has been exposed to transmission of the body fluids of the person or persons sought to be tested; and (2) the person or persons sought to be tested have been requested to submit to the tests and have refused, unless the court makes a further finding that exigent circumstances exist which, in the court's judgment, would excuse the applicant from making such a request.

(c) If an infectious disease test ordered pursuant to this section results in a negative reaction, the court shall order the person tested to submit to another infectious disease test six months from the date the first test was administered.

(d) The results of any infectious disease test ordered pursuant to this section shall be disclosed to the court which ordered the test, the employee and the person tested. If an infectious disease test ordered pursuant to this section results in a positive reaction, the results shall be reported to the employee.
