

2012 Kansas Statutes

76-323b. State mineral lease production information reports to geological survey. Each state agency which leases state real property for production of oil, gas, sand, gravel or any other mineral shall prepare and give information to the state geological survey regarding the terms and conditions of the lease, the rates and amounts of royalty and other revenues received under the lease, mineral production data and such other information relating to the lease and mineral production thereunder as may be required by the state geologist. The information shall be given to the state geological survey at the times and in the form required by the state geologist.

History: L. 1983, ch. 263, § 1; July 1.
