

Robert has had the best three years of his life! Although he has had multiple surgeries to deal with a toe issue, his seizures are still considered under control and his neurologist has labeled him as stable for the past two years. Before Leni's Law and low THC CBD oil, these surgeries would have resulted in days of 1000's of seizures. Today, a bad day is around 1-2 seizures. Before using low THC CBD oil, Robert was 12 years old and never experienced a seizure-free day. After using the oil, Robert sometimes experiences multiple days in a row of seizure freedom.

A week after having surgery on his Achilles' tendon, Robert was walking around the front room, with help, and stood beside the couch a few times. His brain says, "GO!" His body is saying, "SLOW DOWN, BIG GUY!"

This is a true testimony to Leni's Law and low THC CBD oil. Before oil, he was not aware enough most times to realize danger or hurting himself. Today he realizes his limitations! That is HUGE!! And it's a tremendous blessing!

I am just in awe of this child and all he has and will accomplish. And I am incredibly thankful to all those who have helped us get here -- there are so many! Leni's Law has not only saved his life, it has given him a life that he is able to thrive in and not just survive.
