

Greetings Kansas Legislature

It is with great pleasure to learn of an awesome opportunity to assist the 235,000 Kansas citizens without the privileges of driving due to a suspension or revocation of their drivers licenses. It is with this premise, that I submit this correspondence to express my appreciation for a hearing and implementation of **Senate Bill 87- Amended- Relating to persons with suspended driver's licenses, amnesty agreements.** I am in great support of new strategies to help citizens regain their driving privileges through the recommendations submitted by organizations such as the The Racial Profiling Advisory Board.

A Community Advocate for Families burdened by the inability to acquire their driver's license due to Suspension or a revoked license. I have witnessed in depth the many hardships this has created on many of my district 1 residents, and including my own daughter who has been in a stagnated position in life due to losing her license right out of high school. Many of these instances arrive from the citizens own failures or neglectful duties, nevertheless it is still imperative as a functional society, that we as responsible leaders adhere to a system that restores it's most vulnerable citizens. I am most supportive of the whole bill being presented, but favor this section of the **Senate Bill 87-Amended.**

**Persons who are unable to pay due to hardship or lack of employment may enter into an additional agreement with the court to receive a credit against any fines imposed by performing community service or attending classes, including, but not limited to classes provided online or in other computer-assisted formats, aimed at developing job skills and gaining employment or aimed at defensive and safe driving techniques.**

Thank you for taking the time to invest back into our citizens enduring such hardships, that need an opportunity to be revived and restored for success.

Thanks in advance
