PROPONENT of HB 2498

Madam Chair Landwehr and the House Committee on Health and Human Services:

COVID-19 vaccine **should absolutely not** be mandated for children to go to school or daycare! This experimental vaccine has not been around long enough to know the long term affects. What data they do have they don't even want the public to know!! They want to keep it hidden for 45 years!!! What does that tell you?! It must not be good!!! Children are not even in the high-risk category for this disease. If they are healthy children, why risk their health on this vaccine? I have two young girls, and they will only get this vaccine over my dead body. School or no school, they will not get the vaccine. My family takes great pride in our health, fitness and clean eating. We will fight this disease by being healthy and active. We do not need the overreaching government to tell us what is healthy for our family.

Please support this bill and prohibit the secretary of health and environment from requiring COVID-19 vaccinations for children attending schools or daycare!!

Sincerely,

Kody Carlson
