Testimony for Committee Members:

SB 445 provides that additional ballot drop boxes for the return of advanced ballots are prohibited.

It has been shown to be a clear hole in the election process to provide additional drop boxes and possibly other locations for the return of advanced ballots. Many people believe drop boxes in general are not secure enough to guarantee a fair result. These ballot boxes and locations must be monitored 24/7 to assure there is no tampering with any ballots being placed into the box or already in the box. Adding to the number and location adds more uncertainty to the results and requires more effort to make sure results are fair and accurate.
