

HB2603
Neutral Testimony
Written Only

Chairman Proctor and the House Election Committee:

I am submitting my neutral testimony on HB2603. While I like the idea of an entity that investigates election abnormalities, I'm not really sold on this structure. Elected officials appointing people to boards and creating a bureaucracy is not really the way to go about it. We kind of have a group already in the Legislative Post Audit Committee that does the same thing. They can send recommendations, but they are just that, recommendations. The SOS or AG doesn't have to accept any recommendations given. That is kind of what I believe this may be. We need more than recommendations. I have a feeling the Secretary of State's office and the Attorney General will not like being told what to do. I am torn on this, but for right now, this is where I will put my support. Again I am neutral on HB2603

Respectfully,
