

## HB2618 Proponent Written Only Testimony

Chairman Proctor and members of the committee,

People should not impersonate others, but especially not an election official. We need to protect the integrity of our elections, and making false representation of an election official with intent a criminal offense is a good measure to implement. This keeps our elections secure and ensures that those who try to interfere with them face appropriate consequences. I encourage the committee to pass HB2618 favorably out of committee.
