

2.14.24

House Committee on Health and Human Services

hb 2793

Proponent

Written only

Chairwoman and Committee Members,

I am Debbie Detmer and I am a Proponent on hb 2793 and ask you to pass this bill out of committee.

Our children are our most vulnerable. Their brains do not function at an adult level. Their judgment to perceive the consequences of their choices they make today on tomorrow is impaired until the age of 25 when brain development is completed.

Healthcare providers need to be held accountable for their actions without parents consent. No healthcare service should be allowed without first having the parents consent.

Please protect the children.

Thank you

Debbie Detmer
