RE: Proponent Testimony on HB 2633 – Written Testimony

We want to thank Chairman Minnix and the members of the Committee for affording the League of Kansas Municipalities the opportunity to provide testimony in support of HB 2633.

Delivering clean and safe water is an essential service all cities provide to the 84% of Kansans who live in a municipality. The public water supply system is vital to our residents. The League of Kansas Municipalities supports remitting all moneys received by or for fees, charges, or penalties from the certification of operators of water supply systems and wastewater treatment facilities to the water program management fund.

Quality and quantity of drinking water is a concern for cities across the state. Our members support a clean and safe public water supply and the protection of public health and aquatic life. As such, our members have directed us, through our Statement of Municipal Policy, to support programs that encourage clean and safe public water.

This bill also sets fees for permits, monitoring, inspecting, and regulation of underground injection class I wells. The League is concerned with the amount of fees and the burden these fees may place on cities in Kansas, especially smaller cities. The League would like to see these fees reduced, possibly in half, and consideration given to cities with multiple underground injection class I wells or lower populations.

The League supports HB 2633 and asks this Committee to recommend it favorably for passage.
