Proponent of SB 377
Written Only

To the Chairperson and Committee Members:

Thank you for holding a hearing for SB 377, one that would make a lot of great changes for Kansas Citizens. I believe it will be beneficial to pass this and put into immediate effect for many of the things listed; in particular, eliminating taxation on period products and diapers. These items are not luxury items but medically necessary. Every Kansas citizen deserves to have their very basic needs met and not have any barriers to obtaining them. Extra taxation on these items creates an unfair disadvantage to those that need these products without any choice of their own. The funds saved over years and years of using these products would be beneficial to everyone. This is a family issue and affects any one that requires a diaper or period products.

Babies need diapers. People that menstruate need period products. We should not have to pay more on these items as if they are a choice to purchase. They are medically necessary.

Please make the change to see through SB 377.

Thank you for your time.

Lindsay Weiss
