Bill # SB50

Dear Chairman Thompson and Members of The Committee,

Never before, in the entire history of this nation, have our freedoms been under such vicious and relentless attack. In the last few years, conservative voices are being targeted and silenced through censorship on most all social media platforms by those who disagree with them politically. The censorship of one political party by the other party interferes with our elections by suppressing information from conservative voices only. This censorship was recently verified after Elon Musk's acquisition of Twitter by the ongoing revelations on Twitter by far left leaning journalist, Matt Taibbi. Mr Taibbi confirmed political censorship of conservatives on Twitter with what is known as the "Twitter Files."

The time has come where we must put a stop to those who violate our Constitutional rights and freedoms the founding fathers put into place over 200 years ago. Therefore, I am writing to request that you vote to pass Bill SB50 on Wednesday, February 1st.

I have attached photos below of two incidents from Next Door where I have been censored and now removed from their site because several of my comments did not align with the far left agenda of Next Door. I was also specifically targeted and *falsely* reported twice as not living at my actual place of residence as a

way to remove me. The red parenthesis in the first two photos are my comments provided to me by Next Door as their reason for censoring me and suspending me from their platform. My account was deactivated after the last comment below, which was actually made in a private Conservative group on Next Door.

I am asking that you please vote this Wednesday to pass SB50 to restore freedom of speech for ALL people.

Thank you!

K Brohn
