Nextdoor is a place to discuss topics that are important to your local community. In order to keep conversations local, local and state politics/issues may be discussed in the main feed, but national politics and issues only may be discussed in Groups. At Nextdoor, here's how we distinguish between "local" and "national" political topics:

- "Local" topics are those that affect the local community or state only (e.g. a new development project, a local ballot initiative, municipal or state government elections, racial equality movements etc.).
- "National" topics are those that extend beyond the local area into national conversations (e.g. presidential politics, Congressional legislation and action, and discussion of issues like immigration and gun ownership as they relate to national policy).

Please let me know if I can help with anything else.

Best,

Shannon
