Senate Public Health & Welfare Committee

SB352

I support the Covid Visitation Bill. Previously a nurse, I know people get well faster when surrounded by loved ones. Also, these draconian measures have been shown to be false, done not to legitimately control spread, but to control We-The-People. Fauci has acknowledged his inaccurate "guidance". Another consideration is the importance many Americans attach to having spiritual assistance from priest, pastor, or rabbi at the time of serious illness or death. As a Roman Catholic myself, we believe that "The Last Sacraments" are tremendously important and that can only be administered by a priest. Any attempt to obstruct such deeply held religious belief is a grave constitutional violation.

Kathy Brown, Esq.
